

## III Semester

<b>TRANSFORM CALCULUS, FOURIER SERIES AND NUMERICAL TECHNIQUES</b>			
Course Code:	<b>21MAT31</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Objectives:</b>			
<p>CLO 1. To have an insight into solving ordinary differential equations by using Laplace transform techniques</p> <p>CLO 2. Learn to use the Fourier series to represent periodical physical phenomena in engineering analysis.</p> <p>CLO 3. To enable the students to study Fourier Transforms and concepts of infinite Fourier Sine and Cosine transforms and to learn the method of solving difference equations by the z-transform method.</p> <p>CLO 4. To develop the proficiency in solving ordinary and partial differential equations arising in engineering applications, using numerical methods</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<p>Definition and Laplace transforms of elementary functions (statements only). Problems on Laplace transform of <math>e^{at}f(t)</math>, <math>t^n f(t)</math>, <math>\frac{f(t)}{t}</math>. Laplace transforms of Periodic functions (statement only) and unit-step function – problems.</p> <p>Inverse Laplace transforms definition and problems, Convolution theorem to find the inverse Laplace transforms (without Proof) and problems. Laplace transforms of derivatives, solution of differential equations.</p> <p><b>Self-study:</b> Solution of simultaneous first-order differential equations.</p>			
<b>Teaching-Learning Process</b>	Chalk and talk method /		
<b>Module-2</b>			
<p>Introduction to infinite series, convergence and divergence. Periodic functions, Dirichlet's condition. Fourier series of periodic functions with period <math>2\pi</math> and arbitrary period. Half range Fourier series. Practical harmonic analysis.</p> <p><b>Self-study:</b> Convergence of series by D'Alembert's Ratio test and, Cauchy's root test</p>			
<b>Teaching-Learning Process</b>	Chalk and talk method / Powerpoint Presentation		

<b>Module-3</b>	
Infinite Fourier transforms definition, Fourier sine and cosine transforms. Inverse Fourier transforms, Inverse Fourier cosine and sine transforms. Problems.	
Difference equations, z-transform-definition, Standard z-transforms, Damping and shifting rules, Problems. Inverse z-transform and applications to solve difference equations.	
<b>Self-Study:</b> Initial value and final value theorems, problems.	
<b>Teaching-Learning Process</b>	Chalk and talk method / Powerpoint Presentation
<b>Module-4</b>	
Classifications of second-order partial differential equations, finite difference approximations to derivatives, Solution of Laplace's equation using standard five-point formula. Solution of heat equation by Schmidt explicit formula and Crank- Nicholson method, Solution of the Wave equation. Problems.	
<b>Self-Study:</b> Solution of Poisson equations using standard five-point formula.	
<b>Teaching-Learning Process</b>	Chalk and talk method / Powerpoint Presentation
<b>Module-5</b>	
Second-order differential equations - Runge-Kutta method and Milne's predictor and corrector method. (No derivations of formulae).	
Calculus of Variations: Functionals, Euler's equation, Problems on extremals of functional. Geodesics on a plane, Variational problems.	
<b>Self-Study:</b> Hanging chain problem	
<b>Teaching-Learning Process</b>	Chalk and talk method / PowerPoint Presentation
<b>Course Outcomes (Course Skill Set)</b>	
At the end of the course the student will be able to:	
<ul style="list-style-type: none"> <li>CO 1. To solve ordinary differential equations using Laplace transform.</li> <li>CO 2. Demonstrate Fourier series to study the behaviour of periodic functions and their applications in system communications, digital signal processing and field theory.</li> <li>CO 3. To use Fourier transforms to analyze problems involving continuous-time signals and to apply Z-Transform techniques to solve difference equations</li> <li>CO 4. To solve mathematical models represented by initial or boundary value problems involving partial differential equations</li> <li>CO 5. Determine the extremals of functionals using calculus of variations and solve problems arising in dynamics of rigid bodies and vibrational analysis.</li> </ul>	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
<ol style="list-style-type: none"> <li>1. First test at the end of 5<sup>th</sup> week of the semester</li> <li>2. Second test at the end of the 10<sup>th</sup> week of the semester</li> <li>3. Third test at the end of the 15<sup>th</sup> week of the semester</li> </ol>	
Two assignments each of <b>10 Marks</b>	
<ol style="list-style-type: none"> <li>4. First assignment at the end of 4<sup>th</sup> week of the semester</li> <li>5. Second assignment at the end of 9<sup>th</sup> week of the semester</li> </ol>	
Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b>	

<p>6. At the end of the 13<sup>th</sup> week of the semester</p> <p>The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b></p> <p>(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).</p> <p><b>CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.</b></p> <p><b>Semester End Examination:</b></p> <p>Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (<b>duration 03 hours</b>)</p> <ol style="list-style-type: none"> <li>1. The question paper will have ten questions. Each question is set for 20 marks.</li> <li>2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), <b>should have a mix of topics</b> under that module.</li> </ol> <p>The students have to answer 5 full questions, selecting one full question from each module Marks scored out of 100 shall be reduced proportionally to 50 marks</p>
<p><b>Suggested Learning Resources:</b></p> <p><b>Textbooks</b></p> <ol style="list-style-type: none"> <li>1. B. S. Grewal: "Higher Engineering Mathematics", Khanna publishers, 44th Ed.2018</li> <li>2. E. Kreyszig: "Advanced Engineering Mathematics", John Wiley &amp; Sons, 10th Ed. (Reprint), 2016.</li> </ol> <p><b>Reference Books:</b></p> <ol style="list-style-type: none"> <li>1. V. Ramana: "Higher Engineering Mathematics" McGraw-Hill Education, 11th Ed.</li> <li>2. Srimanta Pal &amp; Subodh C. Bhunia: "Engineering Mathematics" Oxford University Press, 3rd Reprint, 2016.</li> <li>3. ## III Semester

<b>DATA STRUCTURES AND APPLICATIONS</b>			
Course Code:	<b>21CS32</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:2:0	SEE Marks	50
Total Hours of Pedagogy	40 T + 20 P	Total Marks	100
Credits	04	Exam Hours	03
<b>Course Objectives:</b>			
<p>CLO 1. Explain the fundamentals of data structures and their applications essential for implementing solutions to problems.</p> <p>CLO 2. Illustrate representation of data structures: Stack, Queues, Linked Lists, Trees and Graphs.</p> <p>CLO 3. Design and Develop Solutions to problems using Arrays, Structures, Stack, Queues, Linked Lists.</p> <p>CLO 4. Explore usage of Trees and Graph for application development.</p> <p>CLO 5. Apply the Hashing techniques in mapping key value pairs.</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<p><b>Introduction:</b> Data Structures, Classifications (Primitive &amp; Non-Primitive), Data structure operations (Traversing, inserting, deleting, searching, and sorting). Review of Arrays. Structures: Array of structures Self-Referential Structures.</p> <p>Dynamic Memory Allocation Functions. Representation of Linear Arrays in Memory, dynamically allocated arrays and Multidimensional Arrays.</p> <p>Demonstration of representation of Polynomials and Sparse Matrices with arrays.</p>			
<p><b>Textbook 1: Chapter 1: 1.2, Chapter 2: 2.2 - 2.7, Text Textbook 2: Chapter 1: 1.1 - 1.4, Chapter 3: 3.1 - 3.3, 3.5, 3.7, Chapter 4: 4.1 - 4.9, 4.14 Textbook 3: Chapter 1: 1.3</b></p>			
<b>Laboratory Component:</b>			
<ol style="list-style-type: none"> <li>1. Design, Develop and Implement a menu driven Program in C for the following Array Operations <ol style="list-style-type: none"> <li>a. Creating an Array of N Integer Elements</li> <li>b. Display of Array Elements with Suitable Headings</li> <li>c. Exit.</li> </ol> <p>Support the program with functions for each of the above operations.</p> </li> <li>2. Design, Develop and Implement a menu driven Program in C for the following Array operations <ol style="list-style-type: none"> <li>a. Inserting an Element (ELEM) at a given valid Position (POS)</li> <li>b. Deleting an Element at a given valid Position POS)</li> <li>c. Display of Array Elements</li> </ol> </li> </ol>			

<p>d. Exit. Support the program with functions for each of the above operations.</p>	
<p><b>Teaching-Learning Process</b></p>	<p>Problem based learning (Implementation of different programs to illustrate application of arrays and structures. <a href="https://www.youtube.com/watch?v=3Xo6P_V-qns&amp;t=201s">https://www.youtube.com/watch?v=3Xo6P_V-qns&amp;t=201s</a> <a href="https://ds2-iiith.vlabs.ac.in/exp/selection-sort/index.html">https://ds2-iiith.vlabs.ac.in/exp/selection-sort/index.html</a> <a href="https://ds1-iiith.vlabs.ac.in/data-structures-1/List%20of%20experiments.html">https://ds1-iiith.vlabs.ac.in/data-structures-1/List%20of%20experiments.html</a></p>
<p><b>Module-2</b></p>	
<p><b>Stacks:</b> Definition, Stack Operations, Array Representation of Stacks, Stacks using Dynamic Arrays. Different representation of expression. Stack Applications: Infix to postfix conversion, Infix to prefix conversion, evaluation of postfix expression, recursion.</p> <p><b>Queues:</b> Definition, Array Representation of Queues, Queue Operations, Circular Queues, Queues and Circular queues using Dynamic arrays, Dequeues, Priority Queues.</p> <p><b>Textbook 1: Chapter 3: 3.1 -3.4, 3.6 Textbook 2: Chapter 6: 6.1 -6.4, 6.5, 6.7-6.13</b></p>	
<p><b>Laboratory Component:</b></p> <ol style="list-style-type: none"> <li>Design, Develop and Implement a menu driven Program in C for the following operations on STACK of Integers (Array Implementation of Stack with maximum size MAX) <ol style="list-style-type: none"> <li>Push an Element on to Stack</li> <li>Pop an Element from Stack</li> <li>Demonstrate <i>Overflow</i> and <i>Underflow</i> situations on Stack</li> <li>Display the status of Stack</li> <li>Exit</li> </ol> <p>Support the program with appropriate functions for each of the above operations</p> </li> <li>Design, Develop and Implement a Program in C for the following Stack Applications <ol style="list-style-type: none"> <li>Evaluation of Suffix expression with single digit operands and operators: +, -, *, /, %, ^</li> <li>Solving Tower of Hanoi problem with n disks</li> </ol> </li> </ol>	
<p><b>Teaching-Learning Process</b></p>	<p>Active Learning, Problem based learning <a href="https://nptel.ac.in/courses/106/102/106102064/">https://nptel.ac.in/courses/106/102/106102064/</a> <a href="https://ds1-iiith.vlabs.ac.in/exp/stacks-queues/index.html">https://ds1-iiith.vlabs.ac.in/exp/stacks-queues/index.html</a></p>
<p><b>Module-3</b></p>	
<p><b>Linked Lists:</b> Definition, classification of linked lists. Representation of different types of linked lists in Memory, Traversing, Insertion, Deletion, Searching, Sorting, and Concatenation Operations on Singly linked list, Doubly Linked lists, Circular linked lists, and header linked lists. Linked Stacks and Queues. Applications of Linked lists – Polynomials, Sparse matrix representation. Programming Examples.</p> <p><b>Textbook 1: Chapter 4: 4.1 – 4.4, 4.5.2, 4.7, 4.8, Textbook 2: Chapter 5: 5.1 – 5.9</b></p>	
<p><b>Laboratory Component:</b></p> <ol style="list-style-type: none"> <li>Singly Linked List (SLL) of Integer Data <ol style="list-style-type: none"> <li>Create a SLL stack of N integer.</li> <li>Display of SLL</li> <li>Linear search. Create a SLL queue of N Students Data Concatenation of two SLL of integers.</li> </ol> </li> <li>Design, Develop and Implement a menu driven Program in C for the following operationson Doubly Linked List (DLL) of Professor Data with the fields: ID, Name, Branch, Area of specialization <ol style="list-style-type: none"> <li>Create a DLL stack of N Professor's Data.</li> </ol> </li> </ol>	

<p>b. Create a DLL queue of N Professor's Data Display the status of DLL and count the number of nodes in it.</p>	
<b>Teaching-Learning Process</b>	<p>MOOC, Active Learning, Problem solving based on linked lists.  <a href="https://nptel.ac.in/courses/106/102/106102064/">https://nptel.ac.in/courses/106/102/106102064/</a>  <a href="https://ds1-iiith.vlabs.ac.in/exp/linked-list/basics/overview.html">https://ds1-iiith.vlabs.ac.in/exp/linked-list/basics/overview.html</a>  <a href="https://ds1-iiith.vlabs.ac.in/List%20of%20experiments.html">https://ds1-iiith.vlabs.ac.in/List%20of%20experiments.html</a>  <a href="https://ds1-iiith.vlabs.ac.in/exp/linked-list/basics/overview.html">https://ds1-iiith.vlabs.ac.in/exp/linked-list/basics/overview.html</a>  <a href="https://ds1-iiith.vlabs.ac.in/List%20of%20experiments.html">https://ds1-iiith.vlabs.ac.in/List%20of%20experiments.html</a></p>
<b>Module-4</b>	
<p><b>Trees 1:</b> Terminologies, Binary Trees, Properties of Binary trees, Array and linked Representation of Binary Trees, Binary Tree Traversals - Inorder, postorder, preorder; Threaded binary trees, Binary Search Trees – Definition, Insertion, Deletion, Traversal, and Searching operation on Binary search tree. Application of Trees-Evaluation of Expression.</p> <p><b>Textbook 1: Chapter 5: 5.1 -5.5, 5.7; Textbook 2: Chapter 7: 7.1 – 7.9</b></p>	
<p><b>Laboratory Component:</b></p> <ol style="list-style-type: none"> <li>Given an array of elements, construct a complete binary tree from this array in level order fashion. That is, elements from left in the array will be filled in the tree level wise starting from level 0. Ex: Input : arr[] = {1, 2, 3, 4, 5, 6} Output : Root of the following tree <pre> 1  / \ 2  3  / \ / \ 4  5 6</pre> </li> <li>Design, Develop and Implement a menu driven Program in C for the following operations on Binary Search Tree (BST) of Integers <ol style="list-style-type: none"> <li>Create a BST of N Integers</li> <li>Traverse the BST in Inorder, Preorder and Post Order</li> </ol> </li> </ol>	
<b>Teaching-Learning Process</b>	<p>Problem based learning  <a href="http://www.nptelvideos.in/2012/11/data-structures-and-algorithms.html">http://www.nptelvideos.in/2012/11/data-structures-and-algorithms.html</a>  <a href="https://ds1-iiith.vlabs.ac.in/exp/tree-traversal/index.html">https://ds1-iiith.vlabs.ac.in/exp/tree-traversal/index.html</a>  <a href="https://ds1-iiith.vlabs.ac.in/exp/tree-traversal/depth-first-traversal/dft-practice.html">https://ds1-iiith.vlabs.ac.in/exp/tree-traversal/depth-first-traversal/dft-practice.html</a></p>
<b>Module-5</b>	
<p><b>Trees 2:</b> AVL tree, Red-black tree, Splay tree, B-tree.</p> <p><b>Graphs:</b> Definitions, Terminologies, Matrix and Adjacency List Representation of Graphs, Traversal methods: Breadth First Search and Depth FirstSearch.</p> <p><b>Hashing:</b> Hash Table organizations, Hashing Functions, Static and Dynamic Hashing.</p> <p><b>Textbook 1: Chapter 10:10.2, 10.3, 10.4, Textbook 2:7.10 – 7.12, 7.15 Chapter 11: 11.2, Textbook 1: Chapter 6 : 6.1-6.2, Chapter 8 : 8.1-8.3, Textbook 2: 8.1 – 8.3, 8.5, 8.7</b></p> <p><b>Textbook 3: Chapter 15:15.1, 15.2,15.3, 15.4,15.5 and 15.7</b></p>	

<b>Laboratory Component:</b>	
<ol style="list-style-type: none"> <li>1. Design, Develop and implement a program in C for the following operations on Graph (G) of cities <ol style="list-style-type: none"> <li>a. Create a Graph of N cities using Adjacency Matrix.</li> <li>b. Print all the nodes reachable from a given starting node in a diagraph using DFS/BFS method.</li> </ol> </li> <li>2. Design and develop a program in C that uses Hash Function <math>H:K \rightarrow L</math> as <math>H(K)=K \bmod m</math> (remainder method) and implement hashing technique to map a given key K to the address space L. Resolve the collision (if any) using linear probing.</li> </ol>	
<b>Teaching-Learning Process</b>	NPTL, MOOC etc. courses on trees and graphs. <a href="http://www.nptelvideos.in/2012/11/data-structures-and-algorithms.html">http://www.nptelvideos.in/2012/11/data-structures-and-algorithms.html</a>
<b>Course Outcomes (Course Skill Set)</b>	
At the end of the course the student will be able to:	
<ol style="list-style-type: none"> <li>CO 1. Identify different data structures and their applications.</li> <li>CO 2. Apply stack and queues in solving problems.</li> <li>CO 3. Demonstrate applications of linked list.</li> <li>CO 4. Explore the applications of trees and graphs to model and solve the real-world problem.</li> <li>CO 5. Make use of Hashing techniques and resolve collisions during mapping of key value pairs</li> </ol>	
<b>Assessment Details (both CIE and SEE)</b>	
<p>The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together</p>	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
<ol style="list-style-type: none"> <li>1. First test at the end of 5<sup>th</sup> week of the semester</li> <li>2. Second test at the end of the 10<sup>th</sup> week of the semester</li> <li>3. Third test at the end of the 15<sup>th</sup> week of the semester</li> </ol>	
Two assignments each of <b>10 Marks</b>	
<ol style="list-style-type: none"> <li>4. First assignment at the end of 4<sup>th</sup> week of the semester</li> <li>5. Second assignment at the end of 9<sup>th</sup> week of the semester</li> </ol>	
<p>Practical Sessions need to be assessed by appropriate rubrics and viva-voce method. This will contribute to <b>20 marks</b>.</p>	
<ul style="list-style-type: none"> <li>• Rubrics for each Experiment taken average for all Lab components – 15 Marks.</li> <li>• Viva-Voce– 5 Marks (more emphasized on demonstration topics)</li> </ul>	
<p>The sum of three tests, two assignments, and practical sessions will be out of 100 marks and will be <b>scaled down to 50 marks</b> (to have a less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).</p>	
<b>CIE methods /question paper has to be designed to attain the different levels of Bloom’s taxonomy as per the outcome defined for the course.</b>	
<b>Semester End Examination:</b>	
Theory SEE will be conducted by University as per the scheduled timetable, with common question	

papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Suggested Learning Resources:**

**Textbooks:**

1. Ellis Horowitz and Sartaj Sahni, Fundamentals of Data Structures in C, 2nd Ed, Universities Press, 2014.
2. Seymour Lipschutz, Data Structures Schaum's Outlines, Revised 1st Ed, McGraw Hill, 2014.
3. Reema Thareja, Data Structures using C, 3rd Ed, Oxford press, 2012.

**Reference Books:**

1. Gilberg and Forouzan, Data Structures: A Pseudo-code approach with C, 2nd Ed, Cengage Learning, 2014.
2. Jean-Paul Tremblay & Paul G. Sorenson, An Introduction to Data Structures with Applications, 2nd Ed, McGraw Hill, 2013
3. A M Tenenbaum, Data Structures using C, PHI, 1989
4. Robert Kruse, Data Structures and Program Design in C, 2nd Ed, PHI, 1996.

**Weblinks and Video Lectures (e-Resources):**

1. <http://elearning.vtu.ac.in/econtent/courses/video/CSE/06CS35.html>
2. <https://nptel.ac.in/courses/106/105/106105171/>
3. <http://www.nptelvideos.in/2012/11/data-structures-and-algorithms.html>

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Real world problem solving using group discussion.
- Back/Forward stacks on browsers.
- Undo/Redo stacks in Excel or Word.
- Linked list representation of real-world queues -Music player, image viewer

## III Semester

<b>ANALOG AND DIGITAL ELECTRONICS</b>			
Course Code	<b>21CS33</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:2:0	SEE Marks	50
Total Hours of Pedagogy	40 T + 20 P	Total Marks	100
Credits	04	Exam Hours	03
<b>Course Learning Objectives:</b>			
CLO 1. Explain the use of photo electronics devices, 555 timer IC, Regulator ICs and uA741			
CLO 2. Make use of simplifying techniques in the design of combinational circuits.			
CLO 3. Illustrate combinational and sequential digital circuits			
CLO 4. Demonstrate the use of flipflops and apply for registers			
CLO 5. Design and test counters, Analog-to-Digital and Digital-to-Analog conversion techniques.			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.			
<ol style="list-style-type: none"> <li>1. Lecturer method (L) does not mean only traditional lecture method, but different type of teaching methods may be adopted to develop the outcomes.</li> <li>2. Show Video/animation films to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop thinking skills such as the ability to evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Topics will be introduced in a multiple representation.</li> <li>7. Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
BJT Biasing: Fixed bias, Collector to base Bias, voltage divider bias			
Operational Amplifier Application Circuits: Peak Detector, Schmitt trigger, Active Filters, Non-Linear Amplifier, Relaxation Oscillator, Current-to-Voltage and Voltage-to-Current Converter, Regulated Power Supply Parameters, adjustable voltage regulator, D to A and A to D converter.			
<b>Textbook 1: Part A: Chapter 4 (Sections 4.2, 4.3, 4.4), Chapter 7 (Sections 7.4, 7.6 to 7.11), Chapter 8 (Sections 8.1 and 8.5), Chapter 9.</b>			
<b>Laboratory Component:</b>			
<ol style="list-style-type: none"> <li>1. Simulate BJT CE voltage divider biased voltage amplifier using any suitable circuit simulator.</li> <li>2. Using ua 741 Opamp, design a 1 kHz Relaxation Oscillator with 50% duty cycle</li> <li>3. Design an astable multivibrator circuit for three cases of duty cycle (50%, &lt;50% and &gt;50%) using NE 555 timer IC.</li> <li>4. Using ua 741 opamp, design a window comparator for any given UTP and LTP.</li> </ol>			
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Demonstration of circuits using simulation.</li> <li>2. Project work: Design a integrated power supply and function generator operating at audio frequency. Sine, square and triangular functions are to be generated.</li> <li>3. Chalk and Board for numerical</li> </ol>		
<b>Module-2</b>			

Karnaugh maps: minimum forms of switching functions, two and three variable Karnaugh maps, four variable Karnaugh maps, determination of minimum expressions using essential prime implicants, Quine-McClusky Method: determination of prime implicants, the prime implicant chart, Petricks method, simplification of incompletely specified functions, simplification using map-entered variables

**Textbook 1: Part B: Chapter 5 (Sections 5.1 to 5.4) Chapter 6 (Sections 6.1 to 6.5)**

**Laboratory Component:**

1. Given a 4-variable logic expression, simplify it using appropriate technique and implement the same using basic gates.

**Teaching-Learning Process**

1. Chalk and Board for numerical
2. Laboratory Demonstration

**Module-3**

Combinational circuit design and simulation using gates: Review of Combinational circuit design, design of circuits with limited Gate Fan-in, Gate delays and Timing diagrams, Hazards in combinational Logic, simulation and testing of logic circuits

Multiplexers, Decoders and Programmable Logic Devices: Multiplexers, three state buffers, decoders and encoders, Programmable Logic devices.

**Textbook 1: Part B: Chapter 8, Chapter 9 (Sections 9.1 to 9.6)**

**Laboratory Component:**

1. Given a 4-variable logic expression, simplify it using appropriate technique and realize the simplified logic expression using 8:1 multiplexer IC.
2. Design and implement code converter I) Binary to Gray (II) Gray to Binary Code

**Teaching-Learning Process**

1. Demonstration using simulator
2. Case study: Applications of Programmable Logic device
3. Chalk and Board for numerical

**Module-4**

Introduction to VHDL: VHDL description of combinational circuits, VHDL Models for multiplexers, VHDL Modules.

Latches and Flip-Flops: Set Reset Latch, Gated Latches, Edge-Triggered D Flip Flop 3, SR Flip Flop, J K Flip Flop, T Flip Flop.

**Textbook 1: Part B: Chapter 10(Sections 10.1 to 10.3), Chapter 11 (Sections 11.1 to 11.7)**

**Laboratory Component:**

1. Given a 4-variable logic expression, simplify it using appropriate technique and simulate the same in HDL simulator
2. Realize a J-K Master / Slave Flip-Flop using NAND gates and verify its truth table. And implement the same in HDL.

**Teaching-Learning Process**

1. Demonstration using simulator
2. Case study: Arithmetic and Logic unit in VHDL
3. Chalk and Board for numerical

**Module-5**

Registers and Counters: Registers and Register Transfers, Parallel Adder with accumulator, shift registers, design of Binary counters, counters for other sequences, counter design using SR and J K Flip Flops.

**Textbook 1: Part B: Chapter 12 (Sections 12.1 to 12.5)**

<b>Laboratory Component:</b>	
<ol style="list-style-type: none"> <li>Design and implement a mod-n (<math>n &lt; 8</math>) synchronous up counter using J-K Flip-Flop ICs and demonstrate its working.</li> <li>Design and implement an asynchronous counter using decade counter IC to count up from 0 to n (<math>n \leq 9</math>) and demonstrate on 7-segment display (using IC-7447)</li> </ol>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>Demonstration using simulator</li> <li>Project Work: Designing any counter, use LED / Seven-segment display to display the output</li> <li>Chalk and Board for numerical</li> </ol>
<b>Course outcome (Course Skill Set)</b>	
At the end of the course the student will be able to:	
CO 1. Design and analyze application of analog circuits using photo devices, timer IC, power supply and regulator IC and op-amp.	
CO 2. Explain the basic principles of A/D and D/A conversion circuits and develop the same.	
CO 3. Simplify digital circuits using Karnaugh Map, and Quine-McClusky Methods	
CO 4. Explain Gates and flip flops and make us in designing different data processing circuits, registers and counters and compare the types.	
CO 5. Develop simple HDL programs	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
<ol style="list-style-type: none"> <li>First test at the end of 5<sup>th</sup> week of the semester</li> <li>Second test at the end of the 10<sup>th</sup> week of the semester</li> <li>Third test at the end of the 15<sup>th</sup> week of the semester</li> </ol>	
Two assignments each of <b>10 Marks</b>	
<ol style="list-style-type: none"> <li>First assignment at the end of 4<sup>th</sup> week of the semester</li> <li>Second assignment at the end of 9<sup>th</sup> week of the semester</li> </ol>	
Practical Sessions need to be assessed by appropriate rubrics and viva-voce method. This will contribute to <b>20 marks</b> .	
<ul style="list-style-type: none"> <li>Rubrics for each Experiment taken average for all Lab components – 15 Marks.</li> <li>Viva-Voce– 5 Marks (more emphasized on demonstration topics)</li> </ul>	
The sum of three tests, two assignments, and practical sessions will be out of 100 marks and will be <b>scaled down to 50 marks</b>	
(to have a less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).	
<b>CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.</b>	
<b>Semester End Examination:</b>	
Theory SEE will be conducted by University as per the scheduled timetable, with common question	

papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Suggested Learning Resources:**

**Textbooks**

1. Charles H Roth and Larry L Kinney, Raghunandan G H, Analog and Digital Electronics, Cengage Learning, 2019

**Reference Books**

1. Anil K Maini, Varsha Agarwal, Electronic Devices and Circuits, Wiley, 2012.
2. Donald P Leach, Albert Paul Malvino & Goutam Saha, Digital Principles and Applications, 8th Edition, Tata McGraw Hill, 2015.
3. M. Morris Mani, Digital Design, 4th Edition, Pearson Prentice Hall, 2008.
4. David A. Bell, Electronic Devices and Circuits, 5th Edition, Oxford University Press, 2008

**Weblinks and Video Lectures (e-Resources):**

1. Analog Electronic Circuits: <https://nptel.ac.in/courses/108/102/108102112/>
2. Digital Electronic Circuits: <https://nptel.ac.in/courses/108/105/108105132/>
3. Analog Electronics Lab: <http://vlabs.iitkgp.ac.in/be/>
4. Digital Electronics Lab: <http://vlabs.iitkgp.ac.in/dec>

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

1. Real world problem solving - applying the design concepts of oscillator, amplifier, switch, Digital circuits using Opamps, 555 timer, transistor, Digital ICs and design a application like tone generator, temperature sensor, digital clock, dancing lights etc.

## III Semester

<b>COMPUTER ORGANIZATION AND ARCHITECTURE</b>			
Course Code	<b>21CS34</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
<p>CLO 1. Understand the organization and architecture of computer systems, their structure and operation</p> <p>CLO 2. Illustrate the concept of machine instructions and programs</p> <p>CLO 3. Demonstrate different ways of communicating with I/O devices</p> <p>CLO 4. Describe different types memory devices and their functions</p> <p>CLO 5. Explain arithmetic and logical operations with different data types</p> <p>CLO 6. Demonstrate processing unit with parallel processing and pipeline architecture</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Basic Structure of Computers:</b> Basic Operational Concepts, Bus Structures, Performance – Processor Clock, Basic Performance Equation, Clock Rate, Performance Measurement.			
<b>Machine Instructions and Programs:</b> Memory Location and Addresses, Memory Operations, Instructions and Instruction Sequencing, Addressing Modes			
<b>Textbook 1: Chapter1 – 1.3, 1.4, 1.6 (1.6.1-1.6.4, 1.6.7), Chapter2 – 2.2 to 2.5</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Problem based learning		
<b>Module-2</b>			
<b>Input/Output Organization:</b> Accessing I/O Devices, Interrupts – Interrupt Hardware, Direct Memory Access, Buses, Interface Circuits			
<b>Textbook 1: Chapter4 – 4.1, 4.2, 4.4, 4.5, 4.6</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration		
<b>Module-3</b>			
<b>Memory System:</b> Basic Concepts, Semiconductor RAM Memories, Read Only Memories, Speed, Size, and Cost, Cache Memories – Mapping Functions, Virtual memories			
<b>Textbook 1: Chapter 5 – 5.1 to 5.4, 5.5 (5.5.1, 5.5.2)</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration		

<b>Module-4</b>	
<b>Arithmetic:</b> Numbers, Arithmetic Operations and Characters, Addition and Subtraction of Signed Numbers, Design of Fast Adders, Multiplication of Positive Numbers	
<b>Basic Processing Unit:</b> Fundamental Concepts, Execution of a Complete Instruction, Hardwired control, Microprogrammed control	
<b>Textbook 1: Chapter2-2.1, Chapter6 – 6.1 to 6.3</b>	
<b>Textbook 1: Chapter7 – 7.1, 7.2,7.4, 7.5</b>	
<b>Teaching-Learning Process</b>	Chalk& board, Problem based learning
<b>Module-5</b>	
<b>Pipeline and Vector Processing:</b> Parallel Processing, Pipelining, Arithmetic Pipeline, Instruction Pipeline, Vector Processing, Array Processors	
<b>Textbook 2: Chapter 9 – 9.1, 9.2, 9.3, 9.4, 9.6, 9.7</b>	
<b>Teaching-Learning Process</b>	Chalk and board, MOOC
<b>Course Outcomes</b>	
At the end of the course the student will be able to:	
CO 1. Explain the organization and architecture of computer systems with machine instructions and programs	
CO 2. Analyze the input/output devices communicating with computer system	
CO 3. Demonstrate the functions of different types of memory devices	
CO 4. Apply different data types on simple arithmetic and logical unit	
CO 5. Analyze the functions of basic processing unit, Parallel processing and pipelining	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
1. First test at the end of 5 <sup>th</sup> week of the semester	
2. Second test at the end of the 10 <sup>th</sup> week of the semester	
3. Third test at the end of the 15 <sup>th</sup> week of the semester	
Two assignments each of <b>10 Marks</b>	
4. First assignment at the end of 4 <sup>th</sup> week of the semester	
5. Second assignment at the end of 9 <sup>th</sup> week of the semester	
Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b>	
6. At the end of the 13 <sup>th</sup> week of the semester	
The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b>	
(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).	
<b>CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.</b>	
<b>Semester End Examination:</b>	
Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject ( <b>duration 03 hours</b> )	
1. The question paper will have ten questions. Each question is set for 20 marks.	

2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Discussion and literature survey on real world use cases
- Quizzes

## III Semester

<b>OBJECT ORIENTED PROGRAMMING WITH JAVA LABORATORY</b>			
Course Code	<b>21CSL35</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2:0	SEE Marks	50
Total Hours of Pedagogy	24	Total Marks	100
Credits	1	Exam Hours	03
<b>Course Objectives:</b>			
CLO 1. Demonstrate the use of Eclipse/Netbeans IDE to create Java Applications.			
CLO 2. Using java programming to develop programs for solving real-world problems.			
CLO 3. Reinforce the understanding of basic object-oriented programming concepts.			
<b>Note: two hours tutorial is suggested for each laboratory sessions.</b>			
<b>Prerequisite</b>			
<ul style="list-style-type: none"> <li>• Students should be familiarized about java installation and setting the java environment.</li> <li>• Usage of IDEs like Eclipse/Netbeans should be introduced.</li> </ul>			
<b>Sl. No.</b>	<b><i>PART A - List of problems for which student should develop program and execute in the Laboratory</i></b>		
1	<p>Aim: Introduce the java fundamentals, data types, operators in java</p> <p>Program: Write a java program that prints all real solutions to the quadratic equation <math>ax^2+bx+c=0</math>. Read in a, b, c and use the quadratic formula.</p>		
2	<p>Aim: Demonstrating creation of java classes, objects, constructors, declaration and initialization of variables.</p> <p>Program: Create a Java class called <b>Student</b> with the following details as variables within it. USN Name Branch Phone Write a Java program to create n Student objects and print the USN, Name, Branch, and Phone of these objects with suitable headings.</p>		
3	<p>Aim: Discuss the various Decision-making statements, loop constructs in java</p> <p>Program: A. Write a program to check prime number B. Write a program for Arithmetic calculator using switch case menu</p>		
4	<p>Aim: Demonstrate the core object-oriented concept of Inheritance, polymorphism</p> <p>Design a super class called <b>Staff</b> with details as StaffId, Name, Phone, Salary. Extend this class by writing three subclasses namely Teaching (domain, publications), Technical (skills), and Contract (period). Write a Java program to read and display at least 3 staff objects of all three categories.</p>		
5	<p>Aim: Introduce concepts of method overloading, constructor overloading, overriding.</p> <p>Program: Write a java program demonstrating Method overloading and Constructor overloading.</p>		
6	<p>Aim: Introduce the concept of Abstraction, packages.</p> <p>Program: Develop a java application to implement currency converter (Dollar to INR, EURO to INR, Yen to INR and vice versa), distance converter (meter to KM, miles to KM and vice versa), time converter (hours to minutes, seconds and vice versa) using packages.</p>		
7	<p>Aim: Introduction to abstract classes, abstract methods, and Interface in java</p>		

	Program: Write a program to generate the resume. Create 2 Java classes Teacher (data: personal information, qualification, experience, achievements) and Student (data: personal information, result, discipline) which implements the java interface Resume with the method biodata().
8	Aim: Demonstrate creation of threads using Thread class and Runnable interface, multi-threaded programming.  Program: Write a Java program that implements a <b>multi-thread</b> application that has three threads. First thread generates a random integer for every 1 second; second thread computes the square of the number and prints; third thread will print the value of cube of the number.
9	Aim: Introduce java Collections.  Program: Write a program to perform string operations using ArrayList. Write functions for the following a. Append - add at end b. Insert – add at particular index c. Search d. List all string starts with given letter.
10	Aim: Exception handling in java, introduction to throwable class, throw, throws, finally.  Program: Write a Java program to read two integers a and b. <b>Compute</b> a/b and print, when b is not zero. Raise an exception when b is equal to zero.
11	Aim: Introduce File operations in java.  Program: Write a java program that reads a file name from the user, displays information about whether the file exists, whether the file is readable, or writable, the type of file and the length of the file in bytes
12	Aim: Introduce java Applet, awt, swings.  Programs: Develop an applet that displays a simple message in center of the screen. Develop a simple calculator using Swings.
<b>PART B – Practical Based Learning</b>	
01	A problem statement for each batch is to be generated in consultation with the co-examiner and student should develop an algorithm, program and execute the program for the given problem with appropriate outputs.

**Course Outcome (Course Skill Set)**

At the end of the course the student will be able to:

- CO 1. Use Eclipse/NetBeans IDE to design, develop, debug Java Projects.
- CO 2. Analyze the necessity for Object Oriented Programming paradigm over structured programming and become familiar with the fundamental concepts in OOP.
- CO 3. Demonstrate the ability to design and develop java programs, analyze, and interpret object-oriented data and document results.
- CO 4. Apply the concepts of multiprogramming, exception/event handling, abstraction to develop robust programs.
- CO 5. Develop user friendly applications using File I/O and GUI concepts.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. The student has to secure not less than 35% (18 Marks out of 50) in the semester-end examination (SEE).

**Continuous Internal Evaluation (CIE):**

CIE marks for the practical course is **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio **60:40**.

- Each experiment to be evaluated for conduction with observation sheet and record write-up.

Rubrics for the evaluation of the journal/write-up for hardware/software experiments designed by the faculty who is handling the laboratory session and is made known to students at the beginning of the practical session.

- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to 30 marks (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct 02 tests for 100 marks, the first test shall be conducted after the 8<sup>th</sup> week of the semester and the second test shall be conducted after the 14<sup>th</sup> week of the semester.
- In each test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability. Rubrics suggested in Annexure-II of Regulation book
- The average of 02 tests is scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and average marks of two tests is the total CIE marks scored by the student.

#### **Semester End Evaluation (SEE):**

- SEE marks for the practical course is 50 Marks.
- SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the University
- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.
- Students can pick one question (experiment) from the questions lot prepared by the internal /external examiners jointly.
- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.
- General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)
- *Students can pick one experiment from the questions lot of PART A with equal choice to all the students in a batch. For PART B examiners should frame a question for each batch, student should develop an algorithm, program, execute and demonstrate the results with appropriate output for the given problem.*
- *Weightage of marks for PART A is 80% and for PART B is 20%. General rubrics suggested to be followed for part A and part B.*
- Change of experiment is allowed only once and Marks allotted to the procedure part to be made zero (Not allowed for Part B).
- The duration of SEE is 03 hours
- Rubrics suggested in Annexure-II of Regulation book

#### **Suggested Learning Resources:**

1. E Balagurusamy, Programming with Java, Graw Hill, 6<sup>th</sup> Edition, 2019.
2. Herbert Schildt, C: Java the Complete Reference, McGraw Hill, 11<sup>th</sup> Edition, 2020

## III Semester

<b>MASTERING OFFICE (Practical based)</b>			
Course Code	<b>21CSL381</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2:0	SEE Marks	50
Total Hours of Pedagogy	12T + 12P	Total Marks	100
Credits	01	Exam Hours	02
<b>Course Objectives:</b>			
CLO 1. Understand the basics of computers and prepare documents and small presentations.			
CLO 2. Attain the knowledge about spreadsheet/worksheet with various options.			
CLO 3. Create simple presentations using templates various options available.			
CLO 4. Demonstrate the ability to apply application software in an office environment.			
CLO 5. Use MS Office to create projects, applications.			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.			
<ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>MS-Word</b> -Working with Files, Text – Formatting, Moving, copying and pasting text, Styles – Lists – Bulleted and numbered lists, Nested lists, Formatting lists. Table Manipulations. Graphics – Adding clip Art, add an image from a file, editing graphics, Page formatting - Header and footers, page numbers, Protect the Document, Mail Merge, Macros – Creating & Saving web pages, Hyperlinks.			
<b>Textbook 1: Chapter 2</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, practical based learning		
<b>Module-2</b>			
<b>MS-Excel-</b> Modifying a Worksheet – Moving through cells, adding worksheets, rows and columns, Resizing rows and columns, selecting cells, Moving and copying cells, freezing panes - Macros – recording and running. Linking worksheets - Sorting and Filling, Alternating text and numbers with Auto fill, Auto filling functions. Graphics – Adding clip art, add an image from a file, Charts – Using chart Wizard, Copy a chart to Microsoft Word.			
<b>Textbook 1: Chapter 3</b>			
<b>Teaching-Learning Process</b>	Active Learning, Demonstration, presentation,		
<b>Module-3</b>			
<b>MS-Power Point</b> -Create a Presentation from a template- Working with Slides – Insert a new slide, applying a design template, changing slide layouts – Resizing a text box, Text box properties, delete a text box - Video and Audio effects, Color Schemes & Backgrounds Adding clip art, adding an image from a file, Save as a web page.			

<b>Textbook 1: Chapter 5</b>	
<b>Teaching-Learning Process</b>	Demonstration, presentation preparation for case studies
<b>Module-4</b>	
<b>MS-Access</b> - Using Access database wizard, pages and projects. Creating Tables – Create a Table in design view. Datasheet Records – Adding, Editing, deleting records, Adding and deleting columns Resizing rows and columns, finding data in a table & replacing, Print a datasheet. Queries - MS-Access.	
<b>Textbook 1: Chapter 4</b>	
<b>Teaching-Learning Process</b>	Chalk& board, Practical based learning.
<b>Module-5</b>	
<b>Microsoft Outlook-</b> Introduction, Starting Microsoft Outlook, Outlook Today, Different Views In Outlook, Outlook Data Files	
<b>Textbook 1: Chapter 7</b>	
<b>Teaching-Learning Process</b>	Chalk and board, MOOC
<b>Course Outcomes (Course Skill Set):</b> At the end of the course the student will be able to:	
CO 1. Know the basics of computers and prepare documents, spreadsheets, make small presentations with audio, video and graphs and would be acquainted with internet.	
CO 2. Create, edit, save and print documents with list tables, header, footer, graphic, spellchecker, mail merge and grammar checker	
CO 3. Attain the knowledge about spreadsheet with formula, macros spell checker etc.	
CO 4. Demonstrate the ability to apply application software in an office environment.	
CO 5. Use Google Suite for office data management tasks	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. The student has to secure not less than 35% (18 Marks out of 50) in the semester-end examination (SEE).	
<b>Continuous Internal Evaluation (CIE):</b>	
<b>NOTE: List of experiments to be prepared by the faculty based on the syllabus mentioned above</b>	
CIE marks for the practical course is <b>50 Marks</b> .	
The split-up of CIE marks for record/ journal and test are in the ratio <b>60:40</b> .	
<ul style="list-style-type: none"> <li>• Each experiment to be evaluated for conduction with observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments designed by the faculty who is handling the laboratory session and is made known to students at the beginning of the practical session.</li> <li>• Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.</li> <li>• Total marks scored by the students are scaled down to 30 marks (60% of maximum marks).</li> <li>• Weightage to be given for neatness and submission of record/write-up on time.</li> <li>• Department shall conduct 02 tests for 100 marks, the first test shall be conducted after the 8<sup>th</sup> week of the semester and the second test shall be conducted after the 14<sup>th</sup> week of the semester.</li> <li>• In each test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.</li> <li>• The suitable rubrics can be designed to evaluate each student's performance and learning ability. Rubrics suggested in Annexure-II of Regulation book</li> <li>• The average of 02 tests is scaled down to <b>20 marks</b> (40% of the maximum marks).</li> </ul>	
The Sum of scaled-down marks scored in the report write-up/journal and average marks of two tests is the total CIE marks scored by the student.	
<b>Semester End Evaluation (SEE):</b>	

- SEE marks for the practical course is 50 Marks.
- SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the University
- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.
- Students can pick one question (experiment) from the questions lot prepared by the internal /external examiners jointly.
- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.
- General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)
- The duration of SEE is 02 hours

Rubrics suggested in Annexure-II of Regulation book

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Real world problem solving using group discussion.
- Real world examples of Windows Framework.

## III Semester

<b>PROGRAMMING IN C++</b>			
Course Code	<b>21CS382</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	1:0:0:0	SEE Marks	50
Total Hours of Pedagogy	12	Total Marks	100
Credits	01	Exam Hours	01
<b>Course Objectives:</b>			
CLO 1. Understanding about object oriented programming and Gain knowledge about the capability to store information together in an object.			
CLO 2. Understand the capability of a class to rely upon another class and functions.			
CLO 3. Understand about constructors which are special type of functions.			
CLO 4. Create and process data in files using file I/O functions			
CLO 5. Use the generic programming features of C++ including Exception handling.			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.			
<ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Introduction to Object Oriented Programming:</b> Computer programming background- C++ overview-First C++ Program -Basic C++ syntax, Object Oriented Programming: What is an object, Classes, methods and messages, abstraction and encapsulation, inheritance, abstract classes, polymorphism.			
<b>Textbook 1: Chapter 1(1.1 to 1.8)</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, practical based learning		
<b>Module-2</b>			
<b>Functions in C++:</b> Tokens – Keywords – Identifiers and constants – Operators in C++ – Scope resolution operator – Expressions and their types – Special assignment expressions – Function prototyping – Call by reference – Return by reference – Inline functions -Default arguments – Function overloading.			
<b>Textbook 2: Chapter 3(3.2,3.3,3.4,3.13,3.14,3.19, 3.20) , chapter 4(4.3,4.4,4.5,4.6,4.7,4.9)</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration, presentation, problem solving		
<b>Module-3</b>			
<b>Inheritance &amp; Polymorphism:</b> Derived class Constructors, destructors-Types of Inheritance- Defining Derived classes, Single Inheritance, Multiple, Hierarchical Inheritance, Hybrid Inheritance.			
<b>Textbook 2: Chapter 6 (6.2,6.11) chapter 8 (8.1 to,8.8)</b>			

<b>Teaching-Learning Process</b>	Chalk and board, Demonstration, problem solving
<b>Module-4</b>	
<b>I/O Streams:</b> C++ Class Hierarchy- File Stream-Text File Handling- Binary File Handling during file operations.	
<b>Textbook 1: Chapter 12(12.5) , Chapter 13 (13.6,13.7)</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Practical based learning, practical's
<b>Module-5</b>	
<b>Exception Handling:</b> Introduction to Exception - Benefits of Exception handling- Try and catch block- Throw statement- Pre-defined exceptions in C++ .	
<b>Textbook 2: Chapter 13 (13.2 to13.6)</b>	
<b>Teaching-Learning Process</b>	Chalk and board, MOOC
<b>Course Outcomes (Course Skill Set):</b> At the end of the course the student will be able to:	
<ul style="list-style-type: none"> <li>CO 1. Able to understand and design the solution to a problem using object-oriented programming concepts.</li> <li>CO 2. Able to reuse the code with extensible Class types, User-defined operators and function Overloading.</li> <li>CO 3. Achieve code reusability and extensibility by means of Inheritance and Polymorphism</li> <li>CO 4. Identify and explore the Performance analysis of I/O Streams.</li> <li>CO 5. Implement the features of C++ including templates, exceptions and file handling for providing programmed solutions to complex problems.</li> </ul>	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
<ul style="list-style-type: none"> <li>1. First test at the end of 5<sup>th</sup> week of the semester</li> <li>2. Second test at the end of the 10<sup>th</sup> week of the semester</li> <li>3. Third test at the end of the 15<sup>th</sup> week of the semester</li> </ul>	
Two assignments each of <b>10 Marks</b>	
<ul style="list-style-type: none"> <li>4. First assignment at the end of 4<sup>th</sup> week of the semester</li> <li>5. Second assignment at the end of 9<sup>th</sup> week of the semester</li> </ul>	
Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b>	
<ul style="list-style-type: none"> <li>6. At the end of the 13<sup>th</sup> week of the semester</li> </ul>	
The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b> (to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).	
<b>CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.</b>	
<b>Semester End Examination:</b>	
Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject ( <b>duration 01 hours</b> )	
SEE paper will be set for 50 questions of each of 01 marks. The pattern of the question paper is MCQ. The time allotted for SEE is 01 hours

## IV Semester

<b>DESIGN AND ANALYSIS OF ALGORITHMS</b>			
Course Code	<b>21CS42</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:2:0	SEE Marks	50
Total Hours of Pedagogy	40 T + 20 P	Total Marks	100
Credits	04	Exam Hours	03
<b>Course Learning Objectives:</b>			
<p>CLO 1. Explain the methods of analysing the algorithms and to analyze performance of algorithms.</p> <p>CLO 2. State algorithm's efficiencies using asymptotic notations.</p> <p>CLO 3. Solve problems using algorithm design methods such as the brute force method, greedy method, divide and conquer, decrease and conquer, transform and conquer, dynamic programming, backtracking and branch and bound.</p> <p>CLO 4. Choose the appropriate data structure and algorithm design method for a specified application.</p> <p>CLO 5. Introduce P and NP classes.</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) does not mean only traditional lecture method, but different type of teaching methods may be adopted to develop the outcomes.</li> <li>2. Show Video/animation films to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop thinking skills such as the ability to evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Topics will be introduced in a multiple representation.</li> <li>7. Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<p><b>Introduction:</b> What is an Algorithm? It's Properties. Algorithm Specification-using natural language, using Pseudo code convention, Fundamentals of Algorithmic Problem solving, Analysis Framework-Time efficiency and space efficiency, Worst-case, Best-case and Average case efficiency.</p> <p><b>Performance Analysis:</b> Estimating Space complexity and Time complexity of algorithms.</p> <p><b>Asymptotic Notations:</b> Big-Oh notation (<math>O</math>), Omega notation (<math>\Omega</math>), Theta notation (<math>\Theta</math>) with examples, Basic efficiency classes, Mathematical analysis of Non-Recursive and Recursive Algorithms with Examples.</p> <p><b>Brute force design technique:</b> Selection sort, sequential search, string matching algorithm with complexity Analysis.</p> <p><b>Textbook 1:</b> Chapter 1 (Sections 1.1,1.2), Chapter 2(Sections 2.1,2.2,2.3,2.4), Chapter 3(Section 3.1,3.2)</p> <p><b>Textbook 2:</b> Chapter 1(section 1.1,1.2,1.3)</p>			
<b>Laboratory Component:</b>			

<p>1. Sort a given set of n integer elements using Selection Sort method and compute its time complexity. Run the program for varied values of <math>n &gt; 5000</math> and record the time taken to sort. Plot a graph of the time taken versus n. The elements can be read from a file or can be generated using the random number generator. Demonstrate using C++/Java how the brute force method works along with its time complexity analysis: worst case, average case and best case.</p>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Problem based Learning.</li> <li>2. Chalk &amp; board, Active Learning.</li> <li>3. Laboratory Demonstration.</li> </ol>
<b>Module-2</b>	
<p><b>Divide and Conquer:</b> General method, Recurrence equation for divide and conquer, solving it using Master's theorem. , Divide and Conquer algorithms and complexity Analysis of Finding the maximum &amp; minimum, Binary search, Merge sort, Quick sort.</p> <p><b>Decrease and Conquer Approach:</b> Introduction, Insertion sort, Graph searching algorithms, Topological Sorting. It's efficiency analysis.</p> <p><b>Textbook 2: Chapter 3(Sections 3.1,3.3,3.4,3.5,3.6)</b></p> <p><b>Textbook 1: Chapter 4 (Sections 4.1,4.2,4.3), Chapter 5(Section 5.1,5.2,5.3)</b></p>	
<b>Laboratory Component:</b>	
<ol style="list-style-type: none"> <li>1. Sort a given set of n integer elements using Quick Sort method and compute its time complexity. Run the program for varied values of <math>n &gt; 5000</math> and record the time taken to sort. Plot a graph of the time taken versus n. The elements can be read from a file or can be generated using the random number generator. Demonstrate using C++/Java how the divide-and-conquer method works along with its time complexity analysis: worst case, average case and best case.</li> <li>2. Sort a given set of n integer elements using Merge Sort method and compute its time complexity. Run the program for varied values of <math>n &gt; 5000</math>, and record the time taken to sort. Plot a graph of the time taken versus n. The elements can be read from a file or can be generated using the random number generator. Demonstrate using C++/Java how the divide-and-conquer method works along with its time complexity analysis: worst case, average case and best case.</li> </ol>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Chalk &amp; board, Active Learning, MOOC, Problem based Learning.</li> <li>2. Laboratory Demonstration.</li> </ol>
<b>Module-3</b>	
<p><b>Greedy Method:</b> General method, Coin Change Problem, Knapsack Problem, solving Job sequencing with deadlines Problems.</p> <p><b>Minimum cost spanning trees:</b> Prim's Algorithm, Kruskal's Algorithm with performance analysis.</p> <p><b>Single source shortest paths:</b> Dijkstra's Algorithm.</p> <p><b>Optimal Tree problem:</b> Huffman Trees and Codes.</p> <p><b>Transform and Conquer Approach:</b> Introduction, Heaps and Heap Sort.</p> <p><b>Textbook 2: Chapter 4(Sections 4.1,4.3,4.5)</b></p> <p><b>Textbook 1: Chapter 9(Section 9.1,9.2,9.3,9.4), Chapter 6( section 6.4)</b></p>	
<b>Laboratory Component:</b>	

Write & Execute C++/Java Program	
<ol style="list-style-type: none"> <li>1. To solve Knapsack problem using Greedy method.</li> <li>2. To find shortest paths to other vertices from a given vertex in a weighted connected graph, using Dijkstra's algorithm.</li> <li>3. To find Minimum Cost Spanning Tree of a given connected undirected graph using Kruskal's algorithm. Use Union-Find algorithms in your program.</li> <li>4. To find Minimum Cost Spanning Tree of a given connected undirected graph using Prim's algorithm.</li> </ol>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Chalk &amp; board, Active Learning, MOOC, Problem based Learning.</li> <li>2. Laboratory Demonstration.</li> </ol>
<b>Module-4</b>	
<p><b>Dynamic Programming:</b> General method with Examples, Multistage Graphs.</p> <p><b>Transitive Closure:</b> Warshall's Algorithm. <b>All Pairs Shortest Paths:</b> Floyd's Algorithm, Knapsack problem, Bellman-Ford Algorithm, Travelling Sales Person problem.</p> <p><b>Space-Time Tradeoffs:</b> Introduction, Sorting by Counting, Input Enhancement in String Matching-Harspool's algorithm.</p> <p><b>Textbook 2: Chapter 5 (Sections 5.1,5.2,5.4,5.9)</b></p> <p><b>Textbook 1: Chapter 8(Sections 8.2,8.4), Chapter 7 (Sections 7.1,7.2)</b></p>	
<b>Laboratory Component:</b>	
Write C++/Java programs to	
<ol style="list-style-type: none"> <li>1. Solve All-Pairs Shortest Paths problem using Floyd's algorithm.</li> <li>2. Solve Travelling Sales Person problem using Dynamic programming.</li> <li>3. Solve 0/1 Knapsack problem using Dynamic Programming method.</li> </ol>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Chalk &amp; board, Active Learning, MOOC, Problem based Learning.</li> <li>2. Laboratory Demonstration.</li> </ol>
<b>Module-5</b>	
<p><b>Backtracking:</b> General method, solution using back tracking to N-Queens problem, Sum of subsets problem, Graph coloring, Hamiltonian cycles Problems.</p> <p><b>Branch and Bound:</b> Assignment Problem, Travelling Sales Person problem, 0/1 Knapsack problem</p> <p><b>NP-Complete and NP-Hard problems:</b> Basic concepts, non- deterministic algorithms, P, NP, NP-Complete, and NP-Hard classes.</p> <p><b>Textbook 1: Chapter 12 (Sections 12.1,12.2) Chapter 11(11.3)</b></p> <p><b>Textbook 2: Chapter 7 (Sections 7.1,7.2,7.3,7.4,7.5) Chapter 11 (Section 11.1)</b></p>	
<b>Laboratory Component:</b>	
<ol style="list-style-type: none"> <li>1. Design and implement C++/Java Program to find a subset of a given set <math>S = \{S_1, S_2, \dots, S_n\}</math> of <math>n</math> positive integers whose SUM is equal to a given positive integer <math>d</math>. For example, if <math>S = \{1, 2, 5, 6, 8\}</math> and <math>d = 9</math>, there are two solutions <math>\{1, 2, 6\}</math> and <math>\{1, 8\}</math>. Display a suitable message, if the given problem instance doesn't have a solution.</li> </ol>	

2. Design and implement C++/Java Program to find all Hamiltonian Cycles in a connected undirected Graph G of n vertices using backtracking principle.	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Chalk &amp; board, Active Learning, MOOC, Problem based learning.</li> <li>2. Laboratory Demonstration.</li> </ol>
<b>Course outcome (Course Skill Set)</b>	
At the end of the course the student will be able to:	
<ol style="list-style-type: none"> <li>CO 1. Analyze the performance of the algorithms, state the efficiency using asymptotic notations and analyze mathematically the complexity of the algorithm.</li> <li>CO 2. Apply divide and conquer approaches and decrease and conquer approaches in solving the problems analyze the same</li> <li>CO 3. Apply the appropriate algorithmic design technique like greedy method, transform and conquer approaches and compare the efficiency of algorithms to solve the given problem.</li> <li>CO 4. Apply and analyze dynamic programming approaches to solve some problems. and improve an algorithm time efficiency by sacrificing space.</li> <li>CO 5. Apply and analyze backtracking, branch and bound methods and to describe P, NP and NP-Complete problems.</li> </ol>	
<b>Assessment Details (both CIE and SEE)</b>	
<p>The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together</p>	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
<ol style="list-style-type: none"> <li>1. First test at the end of 5<sup>th</sup> week of the semester</li> <li>2. Second test at the end of the 10<sup>th</sup> week of the semester</li> <li>3. Third test at the end of the 15<sup>th</sup> week of the semester</li> </ol>	
Two assignments each of <b>10 Marks</b>	
<ol style="list-style-type: none"> <li>4. First assignment at the end of 4<sup>th</sup> week of the semester</li> <li>5. Second assignment at the end of 9<sup>th</sup> week of the semester</li> </ol>	
<p>Practical Sessions need to be assessed by appropriate rubrics and viva-voce method. This will contribute to <b>20 marks</b>.</p>	
<ul style="list-style-type: none"> <li>• Rubrics for each Experiment taken average for all Lab components – 15 Marks.</li> <li>• Viva-Voce– 5 Marks (more emphasized on demonstration topics)</li> </ul>	
<p>The sum of three tests, two assignments, and practical sessions will be out of 100 marks and will be <b>scaled down to 50 marks</b></p>	

(to have a less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

#### **Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

#### **Suggested Learning Resources:**

##### **Textbooks**

1. Introduction to the Design and Analysis of Algorithms, Anany Levitin: 2nd Edition, 2009. Pearson.
2. Computer Algorithms/C++, Ellis Horowitz, SatrajSahni and Rajasekaran, 2nd Edition, 2014, Universities Press.

##### **Reference Books**

1. Introduction to Algorithms, Thomas H. Cormen, Charles E. Leiserson, Ronal L. Rivest, Clifford Stein, 3rd Edition, PHI.
2. Design and Analysis of Algorithms, S. Sridhar, Oxford (Higher Education)

#### **Weblinks and Video Lectures (e-Resources):**

1. <http://elearning.vtu.ac.in/econtent/courses/video/CSE/06CS43.html>
2. <https://nptel.ac.in/courses/106/101/106101060/>
3. <http://elearning.vtu.ac.in/econtent/courses/video/FEP/ADA.html>
4. <http://cse01-iiith.vlabs.ac.in/>
5. <http://openclassroom.stanford.edu/MainFolder/CoursePage.php?course=IntroToAlgorithms>

#### **Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

1. Real world problem solving and puzzles using group discussion. E.g., Fake coin identification, Peasant, wolf, goat, cabbage puzzle, Konigsberg bridge puzzle etc.,
2. Demonstration of solution to a problem through programming.

## IV Semester

<b>MICROCONTROLLER AND EMBEDDED SYSTEMS</b>			
Course Code	<b>21CS43</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:2:0	SEE Marks	50
Total Hours of Pedagogy	40 T + 20 P	Total Marks	100
Credits	04	Exam Hours	03
<b>Course Learning Objectives:</b>			
CLO 1: Understand the fundamentals of ARM-based systems, including programming modules with registers and the CPSR.			
CLO 2: Use the various instructions to program the ARM controller.			
CLO 3: Program various embedded components using the embedded C program.			
CLO 4: Identify various components, their purpose, and their application to the embedded system's applicability.			
CLO 5: Understand the embedded system's real-time operating system and its application in IoT.			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.			
<ol style="list-style-type: none"> <li>1. The lecturer method (L) does not mean only the traditional lecture method, but different types of teaching methods may be adopted to develop the outcomes.</li> <li>2. Show video/animation films to explain the functioning of various concepts.</li> <li>3. Encourage collaborative (group learning) learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop thinking skills such as the ability to evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Topics will be introduced in multiple representations.</li> <li>7. Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world, and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
Microprocessors versus Microcontrollers, ARM Embedded Systems: The RISC design philosophy, The ARM Design Philosophy, Embedded System Hardware, Embedded System Software.			
<b>ARM Processor Fundamentals:</b> Registers, Current Program Status Register, Pipeline, Exceptions, Interrupts, and the Vector Table, Core Extensions			
<b>Textbook 1: Chapter 1 - 1.1 to 1.4, Chapter 2 - 2.1 to 2.5</b>			
<b>Laboratory Component:</b>			
<ol style="list-style-type: none"> <li>1. Using Keil software, observe the various registers, dump, CPSR, with a simple ALP programme.</li> </ol>			
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Demonstration of registers, memory access, and CPSR in a programme module.</li> <li>2. For concepts, numerical, and discussion, use chalk and a whiteboard, as well as a PowerPoint presentation.</li> </ol>		
<b>Module-2</b>			
<b>Introduction to the ARM Instruction Set:</b> Data Processing Instructions, Branch Instructions, Software Interrupt Instructions, Program Status Register Instructions, Coprocessor Instructions, Loading Constants			
<b>C Compilers and Optimization :</b> Basic C Data Types, C Looping Structures, Register Allocation, Function			

Calls, Pointer Aliasing,	
<b>Textbook 1: Chapter 3: Sections 3.1 to 3.6 (Excluding 3.5.2), Chapter 5</b>	
<b>Laboratory Component:</b>	
<ol style="list-style-type: none"> <li>2. Write a program to find the sum of the first 10 integer numbers.</li> <li>3. Write a program to find the factorial of a number.</li> <li>4. Write a program to add an array of 16 bit numbers and store the 32 bit result in internal RAM.</li> <li>5. Write a program to find the square of a number (1 to 10) using a look-up table.</li> <li>6. Write a program to find the largest or smallest number in an array of 32 numbers.</li> </ol>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Demonstration of sample code using Keil software.</li> <li>2. Laboratory Demonstration</li> </ol>
<b>Module-3</b>	
<b>C Compilers and Optimization</b> :Structure Arrangement, Bit-fields, Unaligned Data and Endianness, Division, Floating Point, Inline Functions and Inline Assembly, Portability Issues.	
<b>ARM programming using Assembly language:</b> Writing Assembly code, Profiling and cycle counting, instruction scheduling, Register Allocation, Conditional Execution, Looping Constructs	
<b>Textbook 1: Chapter-5,6</b>	
<b>Laboratory Component:</b>	
<ol style="list-style-type: none"> <li>1. Write a program to arrange a series of 32 bit numbers in ascending/descending order.</li> <li>2. Write a program to count the number of ones and zeros in two consecutive memory locations.</li> <li>3. Display "Hello World" message using Internal UART.</li> </ol>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Demonstration of sample code using Keil software.</li> <li>2. Chalk and Board for numerical</li> </ol>
<b>Module-4</b>	
<b>Embedded System Components:</b> Embedded Vs General computing system, History of embedded systems, Classification of Embedded systems, Major applications areas of embedded systems, purpose of embedded systems.	
Core of an Embedded System including all types of processor/controller, Memory, Sensors, Actuators, LED, 7 segment LED display, stepper motor, Keyboard, Push button switch, Communication Interface (onboard and external types), Embedded firmware, Other system components.	
<b>Textbook 2: Chapter 1 (Sections 1.2 to 1.6), Chapter 2 (Sections 2.1 to 2.6)</b>	
<b>Laboratory Component:</b>	
<ol style="list-style-type: none"> <li>1. Interface and Control a DC Motor.</li> <li>2. Interface a Stepper motor and rotate it in clockwise and anti-clockwise direction.</li> <li>3. Determine Digital output for a given Analog input using Internal ADC of ARM controller.</li> <li>4. Interface a DAC and generate Triangular and Square waveforms.</li> <li>5. Interface a 4x4 keyboard and display the key code on an LCD.</li> <li>6. Demonstrate the use of an external interrupt to toggle an LED On/Off.</li> <li>7. Display the Hex digits 0 to F on a 7-segment LED interface, with an appropriate delay in between.</li> </ol>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Demonstration of sample code for various embedded components using keil.</li> <li>2. Chalk and Board for numerical and discussion</li> </ol>
<b>Module-5</b>	
<b>RTOS and IDE for Embedded System Design:</b> Operating System basics, Types of operating systems, Task, process and threads (Only POSIX Threads with an example program), Thread preemption, Multiprocessing and Multitasking, Task Communication (without any program), Task synchronization	

issues – Racing and Deadlock, Concept of Binary and counting semaphores (Mutex example without any program), How to choose an RTOS, Integration and testing of Embedded hardware and firmware, Embedded system Development Environment – Block diagram (excluding Keil), Disassembler/decompiler, simulator, emulator and debugging techniques, target hardware debugging, boundary scan.

**Textbook 2: Chapter-10 (Sections 10.1, 10.2, 10.3, 10.4 , 10.7, 10.8.1.1, 10.8.1.2, 10.8.2.2, 10.10 only), Chapter 12, Chapter-13 ( block diagram before 13.1, 13.3, 13.4, 13.5, 13.6 only)**

**Laboratory Component:**

1. Demonstration of IoT applications by using Arduino and Raspberry Pi

**Teaching-Learning Process**

1. Chalk and Board for numerical and discussion
2. Significance of real time operating system [RTOS] using raspberry pi

**Course outcome (Course Skill Set)**

At the end of the course, the student will be able to:

- CO 1. Explain C-Compilers and optimization
- CO 2. Describe the ARM microcontroller's architectural features and program module.
- CO 3. Apply the knowledge gained from programming on ARM to different applications.
- CO 4. Program the basic hardware components and their application selection method.
- CO 5. Demonstrate the need for a real-time operating system for embedded system applications.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous Internal Evaluation:**

Three Unit Tests each of **20 Marks (duration 01 hour)**

1. First test at the end of 5<sup>th</sup> week of the semester
2. Second test at the end of the 10<sup>th</sup> week of the semester
3. Third test at the end of the 15<sup>th</sup> week of the semester

Two assignments each of **10 Marks**

4. First assignment at the end of 4<sup>th</sup> week of the semester
5. Second assignment at the end of 9<sup>th</sup> week of the semester

Practical Sessions need to be assessed by appropriate rubrics and viva-voce method. This will contribute to **20 marks**.

- Rubrics for each Experiment taken average for all Lab components – 15 Marks.
- Viva-Voce– 5 Marks (more emphasized on demonstration topics)

The sum of three tests, two assignments, and practical sessions will be out of 100 marks and will be **scaled down to 50 marks**

(to have a less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Suggested Learning Resources:****Textbooks**

1. Andrew N Sloss, Dominic Symes and Chris Wright, ARM system developers guide, Elsevier, Morgan Kaufman publishers, 2008.
2. Shibu K V, "Introduction to Embedded Systems", Tata McGraw Hill Education, Private Limited, 2<sup>nd</sup> Edition.

**Reference Books**

1. Raghunandan. G.H, Microcontroller (ARM) and Embedded System, Cengage learning Publication,2019
2. The Insider's Guide to the ARM7 Based Microcontrollers, Hitex Ltd.,1st edition, 2005.
3. Steve Furber, ARM System-on-Chip Architecture, Second Edition, Pearson, 2015.
4. Raj Kamal, Embedded System, Tata McGraw-Hill Publishers, 2nd Edition, 2008.

## IV Semester

<b>OPERATING SYSTEMS</b>			
Course Code:	<b>21CS44</b>	CIE Marks	50
Teaching Hours/Week (L:T:P:S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Objectives:</b>			
<p>CLO 1. Demonstrate the need for OS and different types of OS</p> <p>CLO 2. Apply suitable techniques for management of different resources</p> <p>CLO 3. Use processor, memory, storage and file system commands</p> <p>CLO 4. Realize the different concepts of OS in platform of usage through case studies</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer methods (L) need not to be only traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<p><b>Introduction to operating systems, System structures:</b> What operating systems do; Computer System organization; Computer System architecture; Operating System structure; Operating System operations; Process management; Memory management; Storage management; Protection and Security; Distributed system; Special-purpose systems; Computing environments.</p> <p><b>Operating System Services:</b> User - Operating System interface; System calls; Types of system calls; System programs; Operating system design and implementation; Operating System structure; Virtual machines; Operating System generation; System boot.</p> <p><b>Process Management:</b> Process concept; Process scheduling; Operations on processes; Inter process communication</p>			
<b>Textbook 1: Chapter - 1,2,3</b>			
<b>Teaching-Learning Process</b>	<p>Active learning and problem solving</p> <ol style="list-style-type: none"> <li>1. <a href="https://www.youtube.com/watch?v=vBURt97EkA&amp;list=PLBlnK6fEyqRiVhbXDGLXDk_OQAeuVcp2Q">https://www.youtube.com/watch?v=vBURt97EkA&amp;list=PLBlnK6fEyqRiVhbXDGLXDk_OQAeuVcp2Q</a></li> <li>2. <a href="https://www.youtube.com/watch?v=a2B69vCtjOU&amp;list=PL3-wYxht4yCjpcfUDz-TgD_ainZ2K3MUZ&amp;index=2">https://www.youtube.com/watch?v=a2B69vCtjOU&amp;list=PL3-wYxht4yCjpcfUDz-TgD_ainZ2K3MUZ&amp;index=2</a></li> </ol>		
<b>Module-2</b>			
<p><b>Multi-threaded Programming:</b> Overview; Multithreading models; Thread Libraries; Threading issues. Process Scheduling: Basic concepts; Scheduling Criteria; Scheduling Algorithms; Multiple-processor</p>			

scheduling; Thread scheduling.	
<b>Process Synchronization:</b> Synchronization: The critical section problem; Peterson's solution; Synchronization hardware; Semaphores; Classical problems of synchronization; Monitors.	
<b>Textbook 1: Chapter - 4,5</b>	
<b>Teaching-Learning Process</b>	Active Learning and problem solving 1. <a href="https://www.youtube.com/watch?v=HW2Wcx-ktsc">https://www.youtube.com/watch?v=HW2Wcx-ktsc</a> 2. <a href="https://www.youtube.com/watch?v=9YRxlvt9Zo">https://www.youtube.com/watch?v=9YRxlvt9Zo</a>
<b>Module-3</b>	
<b>Deadlocks:</b> Deadlocks; System model; Deadlock characterization; Methods for handling deadlocks; Deadlock prevention; Deadlock avoidance; Deadlock detection and recovery from deadlock.	
<b>Memory Management:</b> Memory management strategies: Background; Swapping; Contiguous memory allocation; Paging; Structure of page table; Segmentation.	
<b>Textbook 1: Chapter - 7,8</b>	
<b>Teaching-Learning Process</b>	Active Learning, Problem solving based on deadlock with animation 1. <a href="https://www.youtube.com/watch?v=MYgmmJfdBg">https://www.youtube.com/watch?v=MYgmmJfdBg</a> 2. <a href="https://www.youtube.com/watch?v=Y14b7_T3AEw&amp;list=PLEJxKK7AcSEGPOCFtQTJhOEU44J_JAun&amp;index=30">https://www.youtube.com/watch?v=Y14b7_T3AEw&amp;list=PLEJxKK7AcSEGPOCFtQTJhOEU44J_JAun&amp;index=30</a>
<b>Module-4</b>	
<b>Virtual Memory Management:</b> Background; Demand paging; Copy-on-write; Page replacement; Allocation of frames; Thrashing.	
<b>File System, Implementation of File System:</b> File system: File concept; Access methods; Directory structure; File system mounting; File sharing; Protection: Implementing File system: File system structure; File system implementation; Directory implementation; Allocation methods; Free space management.	
<b>Textbook 1: Chapter - 9,10,11</b>	
<b>Teaching-Learning Process</b>	Active learning about memory management and File system 1. <a href="https://www.youtube.com/watch?v=pJ6qrCB8pDw&amp;list=PLLY8eNdw5tW-BxRY0yK3fYTYVqytw8qhp">https://www.youtube.com/watch?v=pJ6qrCB8pDw&amp;list=PLLY8eNdw5tW-BxRY0yK3fYTYVqytw8qhp</a> 2. <a href="https://www.youtube.com/watch?v=-orfFhvNBzY">https://www.youtube.com/watch?v=-orfFhvNBzY</a>
<b>Module-5</b>	
<b>Secondary Storage Structures, Protection:</b> Mass storage structures; Disk structure; Disk attachment; Disk scheduling; Disk management; Swap space management. Protection: Goals of protection, Principles of protection, Domain of protection, Access matrix, Implementation of access matrix, Access control, Revocation of access rights, Capability- Based systems.	
<b>Case Study: The Linux Operating System:</b> Linux history; Design principles; Kernel modules; Process management; Scheduling; Memory Management; File systems, Input and output; Inter-process communication.	
<b>Textbook 1: Chapter - 2,21</b>	
<b>Teaching-Learning Process</b>	Active learning about case studies 1. <a href="https://www.youtube.com/watch?v=TTBkc5eiju4">https://www.youtube.com/watch?v=TTBkc5eiju4</a> 2. <a href="https://www.youtube.com/watch?v=8hkvMRGTzCM&amp;list=PLEAYkSg4uSQ2PAch478muxnoeTNz_QeUJ&amp;index=36">https://www.youtube.com/watch?v=8hkvMRGTzCM&amp;list=PLEAYkSg4uSQ2PAch478muxnoeTNz_QeUJ&amp;index=36</a> 3. <a href="https://www.youtube.com/watch?v=mX1FEur4VCw">https://www.youtube.com/watch?v=mX1FEur4VCw</a>
<b>Course Outcomes (Course Skill Set)</b>	
At the end of the course the student will be able to:	
CO 1. Identify the structure of an operating system and its scheduling mechanism.	

<p>CO 2. Demonstrate the allocation of resources for a process using scheduling algorithm.  CO 3. Identify root causes of deadlock and provide the solution for deadlock elimination  CO 4. Explore about the storage structures and learn about the Linux Operating system.  CO 5. Analyze Storage Structures and Implement Customized Case study</p>
<p><b>Assessment Details (both CIE and SEE)</b>  The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together</p> <p><b>Continuous Internal Evaluation:</b>  Three Unit Tests each of <b>20 Marks (duration 01 hour)</b></p> <ol style="list-style-type: none"> <li>1. First test at the end of 5<sup>th</sup> week of the semester</li> <li>2. Second test at the end of the 10<sup>th</sup> week of the semester</li> <li>3. Third test at the end of the 15<sup>th</sup> week of the semester</li> </ol> <p>Two assignments each of <b>10 Marks</b></p> <ol style="list-style-type: none"> <li>4. **Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Real world problem solving using group discussion.
- Role play for process scheduling.
- Present animation for Deadlock.
- Real world examples of memory management concepts

## IV Semester

PYTHON PROGRAMMING LABORATORY			
Course Code	21CSL46	CIE Marks	50
Teaching Hours/Weeks (L: T: P: S)	0: 0: 2: 0	SEE Marks	50
Total Hours of Pedagogy	24	Total Marks	100
Credits	01	Exam Hours	03
<b>Course Objectives:</b>			
CLO 1. Demonstrate the use of IDLE or PyCharm IDE to create Python Applications			
CLO 2. Using Python programming language to develop programs for solving real-world problems			
CLO 3. Implement the Object-Oriented Programming concepts in Python.			
CLO 4. Appraise the need for working with various documents like Excel, PDF, Word and Others			
CLO 5. Demonstrate regular expression using python programming			
<b>Note: two hours tutorial is suggested for each laboratory sessions.</b>			
<b>Prerequisite</b>			
<ul style="list-style-type: none"> <li>Students should be familiarized about Python installation and setting Python environment</li> <li>Usage of IDLE or IDE like PyCharm should be introduced</li> </ul> Python Installation: <a href="https://www.youtube.com/watch?v=Kn1HF3oD19c">https://www.youtube.com/watch?v=Kn1HF3oD19c</a> PyCharm Installation: <a href="https://www.youtube.com/watch?v=SZUNUB6nz3g">https://www.youtube.com/watch?v=SZUNUB6nz3g</a>			
<b>Sl. No.</b>	<b>PART A - List of problems for which student should develop program and execute in the Laboratory</b>		
1	<b>Aim:</b> Introduce the Python fundamentals, data types, operators, flow control and exception handling in Python  a) Write a python program to find the best of two test average marks out of three test's marks accepted from the user. b) Develop a Python program to check whether a given number is palindrome or not and also count the number of occurrences of each digit in the input number.  Datatypes: <a href="https://www.youtube.com/watch?v=gCCVsvgR2KU">https://www.youtube.com/watch?v=gCCVsvgR2KU</a> Operators: <a href="https://www.youtube.com/watch?v=v5MR5JnKcZI">https://www.youtube.com/watch?v=v5MR5JnKcZI</a> Flow Control: <a href="https://www.youtube.com/watch?v=PqFKRqpHrjw">https://www.youtube.com/watch?v=PqFKRqpHrjw</a> For loop: <a href="https://www.youtube.com/watch?v=0ZvaDa8eT5s">https://www.youtube.com/watch?v=0ZvaDa8eT5s</a> While loop: <a href="https://www.youtube.com/watch?v=HZARImviDxg">https://www.youtube.com/watch?v=HZARImviDxg</a> Exceptions: <a href="https://www.youtube.com/watch?v=6SPDvPK38tw">https://www.youtube.com/watch?v=6SPDvPK38tw</a>		
2	<b>Aim:</b> Demonstrating creation of functions, passing parameters and return values  a) Defined as a function F as $F_n = F_{n-1} + F_{n-2}$ . Write a Python program which accepts a value for N (where $N > 0$ ) as input and pass this value to the function. Display suitable error message if the condition for input value is not followed. b) Develop a python program to convert binary to decimal, octal to hexadecimal using functions.  Functions: <a href="https://www.youtube.com/watch?v=BVfCWuca9nw">https://www.youtube.com/watch?v=BVfCWuca9nw</a> Arguments: <a href="https://www.youtube.com/watch?v=ijXMGpoMkhQ">https://www.youtube.com/watch?v=ijXMGpoMkhQ</a> Return value: <a href="https://www.youtube.com/watch?v=nuNXiEDnM44">https://www.youtube.com/watch?v=nuNXiEDnM44</a>		
3	<b>Aim:</b> Demonstration of manipulation of strings using string methods  a) Write a Python program that accepts a sentence and find the number of words, digits, uppercase letters and lowercase letters.		

	<p>b) Write a Python program to find the string similarity between two given strings</p> <table border="0"> <tr> <td><b>Sample Output:</b></td> <td><b>Sample Output:</b></td> </tr> <tr> <td>Original string:</td> <td>Original string:</td> </tr> <tr> <td>Python Exercises</td> <td>Python Exercises</td> </tr> <tr> <td>Python Exercises</td> <td>Python Exercise</td> </tr> <tr> <td>Similarity between two said strings:</td> <td>Similarity between two said strings:</td> </tr> <tr> <td>1.0</td> <td>0.967741935483871</td> </tr> </table> <p>Strings: <a href="https://www.youtube.com/watch?v=ISItwlnF0eU">https://www.youtube.com/watch?v=ISItwlnF0eU</a> String functions: <a href="https://www.youtube.com/watch?v=9a3CxJyTq00">https://www.youtube.com/watch?v=9a3CxJyTq00</a></p>	<b>Sample Output:</b>	<b>Sample Output:</b>	Original string:	Original string:	Python Exercises	Python Exercises	Python Exercises	Python Exercise	Similarity between two said strings:	Similarity between two said strings:	1.0	0.967741935483871
<b>Sample Output:</b>	<b>Sample Output:</b>												
Original string:	Original string:												
Python Exercises	Python Exercises												
Python Exercises	Python Exercise												
Similarity between two said strings:	Similarity between two said strings:												
1.0	0.967741935483871												
4	<p><b>Aim:</b> Discuss different collections like list, tuple and dictionary</p> <p>a) Write a python program to implement insertion sort and merge sort using lists b) Write a program to convert roman numbers in to integer values using dictionaries.</p> <p>Lists: <a href="https://www.youtube.com/watch?v=Eaz5e6M8tL4">https://www.youtube.com/watch?v=Eaz5e6M8tL4</a> List methods: <a href="https://www.youtube.com/watch?v=8-RDVWGktuI">https://www.youtube.com/watch?v=8-RDVWGktuI</a> Tuples: <a href="https://www.youtube.com/watch?v=bdS4dHIJGbc">https://www.youtube.com/watch?v=bdS4dHIJGbc</a> Tuple operations: <a href="https://www.youtube.com/watch?v=TIItKabcTTQ4">https://www.youtube.com/watch?v=TIItKabcTTQ4</a> Dictionary: <a href="https://www.youtube.com/watch?v=4Q0pW8XB0kc">https://www.youtube.com/watch?v=4Q0pW8XB0kc</a> Dictionary methods: <a href="https://www.youtube.com/watch?v=oLeNHuORpNY">https://www.youtube.com/watch?v=oLeNHuORpNY</a></p>												
5	<p><b>Aim:</b> Demonstration of pattern recognition with and without using regular expressions</p> <p>a) Write a function called isphonenumber () to recognize a pattern 415-555-4242 without using regular expression and also write the code to recognize the same pattern using regular expression. b) Develop a python program that could search the text in a file for phone numbers (+919900889977) and email addresses (<a href="mailto:sample@gmail.com">sample@gmail.com</a>)</p> <p>Regular expressions: <a href="https://www.youtube.com/watch?v=LnzFnZfHLS4">https://www.youtube.com/watch?v=LnzFnZfHLS4</a></p>												
6	<p><b>Aim:</b> Demonstration of reading, writing and organizing files.</p> <p>a) Write a python program to accept a file name from the user and perform the following operations</p> <ol style="list-style-type: none"> <li>1. Display the first N line of the file</li> <li>2. Find the frequency of occurrence of the word accepted from the user in the file</li> </ol> <p>b) Write a python program to create a ZIP file of a particular folder which contains several files inside it.</p> <p>Files: <a href="https://www.youtube.com/watch?v=vuyb7CxZgbU">https://www.youtube.com/watch?v=vuyb7CxZgbU</a> <a href="https://www.youtube.com/watch?v=FqcjKewJTQ0">https://www.youtube.com/watch?v=FqcjKewJTQ0</a></p> <p>File organization: <a href="https://www.youtube.com/watch?v=MRuq3SRXses">https://www.youtube.com/watch?v=MRuq3SRXses</a></p>												
7	<p><b>Aim:</b> Demonstration of the concepts of classes, methods, objects and inheritance</p>												

	<p>a) By using the concept of inheritance write a python program to find the area of triangle, circle and rectangle.</p> <p>b) Write a python program by creating a class called Employee to store the details of Name, Employee_ID, Department and Salary, and implement a method to update salary of employees belonging to a given department.</p> <p>OOP's concepts: <a href="https://www.youtube.com/watch?v=qiSCMNbIP2g">https://www.youtube.com/watch?v=qiSCMNbIP2g</a>          Inheritance: <a href="https://www.youtube.com/watch?v=Cn7AkDb4pIU">https://www.youtube.com/watch?v=Cn7AkDb4pIU</a></p>
8	<p><b>Aim:</b> Demonstration of classes and methods with polymorphism and overriding</p> <p>a) Write a python program to find the whether the given input is palindrome or not (for both string and integer) using the concept of polymorphism and inheritance.</p> <p>Overriding: <a href="https://www.youtube.com/watch?v=CcTzTulsoFk">https://www.youtube.com/watch?v=CcTzTulsoFk</a></p>
9	<p><b>Aim:</b> Demonstration of working with excel spreadsheets and web scraping</p> <p>a) Write a python program to download the all XKCD comics</p> <p>b) Demonstrate python program to read the data from the spreadsheet and write the data in to the spreadsheet</p> <p>Web scraping: <a href="https://www.youtube.com/watch?v=ng2o98k983k">https://www.youtube.com/watch?v=ng2o98k983k</a></p> <p>Excel: <a href="https://www.youtube.com/watch?v=nsKNPHJ9iPc">https://www.youtube.com/watch?v=nsKNPHJ9iPc</a></p>
10	<p><b>Aim:</b> Demonstration of working with PDF, word and JSON files</p> <p>a) Write a python program to combine select pages from many PDFs</p> <p>b) Write a python program to fetch current weather data from the JSON file</p> <p>PDFs: <a href="https://www.youtube.com/watch?v=q70xzDG6nls">https://www.youtube.com/watch?v=q70xzDG6nls</a>  <a href="https://www.youtube.com/watch?v=JhQVD7Y1bsA">https://www.youtube.com/watch?v=JhQVD7Y1bsA</a>  <a href="https://www.youtube.com/watch?v=FcrW-ESdY-A">https://www.youtube.com/watch?v=FcrW-ESdY-A</a></p> <p>Word files: <a href="https://www.youtube.com/watch?v=ZU3cSI51jWE">https://www.youtube.com/watch?v=ZU3cSI51jWE</a></p> <p>JSON files: <a href="https://www.youtube.com/watch?v=9N6a-VLBa2I">https://www.youtube.com/watch?v=9N6a-VLBa2I</a></p>
<b>Python (Full Course):</b> <a href="https://www.youtube.com/watch?v=_uQrJ0TkZlc">https://www.youtube.com/watch?v=_uQrJ0TkZlc</a>	
<b>Pedagogy</b>	For the above experiments the following pedagogy can be considered. Problem based learning, Active learning, MOOC, Chalk &Talk
<b>PART B – Practical Based Learning</b>	
A problem statement for each batch is to be generated in consultation with the co-examiner and student should develop an algorithm, program and execute the program for the given problem with appropriate outputs.	
<b>Course Outcomes:</b>	
CO 1. Demonstrate proficiency in handling of loops and creation of functions. CO 2. Identify the methods to create and manipulate lists, tuples and dictionaries. CO 3. Discover the commonly used operations involving regular expressions and file system. CO 4. Interpret the concepts of Object-Oriented Programming as used in Python. CO 5. Determine the need for scraping websites and working with PDF, JSON and other file formats.	

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. The student has to secure not less than 35% (18 Marks out of 50) in the semester-end examination (SEE).

**Continuous Internal Evaluation (CIE):**

CIE marks for the practical course is **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio **60:40**.

- Each experiment to be evaluated for conduction with observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments designed by the faculty who is handling the laboratory session and is made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to 30 marks (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct 02 tests for 100 marks, the first test shall be conducted after the 8<sup>th</sup> week of the semester and the second test shall be conducted after the 14<sup>th</sup> week of the semester.
- In each test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability. Rubrics suggested in Annexure-II of Regulation book
- The average of 02 tests is scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and average marks of two tests is the total CIE marks scored by the student.

**Semester End Evaluation (SEE):**

- SEE marks for the practical course is 50 Marks.
- SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the University
- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.
- Students can pick one question (experiment) from the questions lot prepared by the internal /external examiners jointly.
- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.
- General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)
- *Students can pick one experiment from the questions lot of PART A with equal choice to all the students in a batch. For PART B examiners should frame a question for each batch, student should develop an algorithm, program, execute and demonstrate the results with appropriate output for the given problem.*

- *Weightage of marks for PART A is 80% and for PART B is 20%. General rubrics suggested to be followed for part A and part B.*
- Change of experiment is allowed only once and Marks allotted to the procedure part to be made zero (Not allowed for Part B).
- The duration of SEE is 03 hours

Rubrics suggested in Annexure-II of Regulation book

## IV Semester

<b>WEB PROGRAMMING (Practical based)</b>			
Course Code	<b>21CSL481</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2:0	SEE Marks	50
Total Hours of Pedagogy	12T + 12P	Total Marks	100
Credits	01	Exam Hours	02
<b>Course Objectives:</b>			
CLO 1. Learn Web tool box and history of web browsers.			
CLO 2. Learn HTML, XHTML tags with utilizations.			
CLO 3. Know CSS with dynamic document utilizations.			
CLO 4. Learn JavaScript with Element access in JavaScript.			
CLO 5. Logically plan and develop web pages..			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.			
<ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Introduction to WEB Programming:</b> Internet, WWW, Web Browsers, and Web Servers, URLs, MIME, HTTP, Security, The Web Programmers Toolbox.			
<b>Textbook 1: Chapter 1(1.1 to 1.9)</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, practical based learning		
<b>Module-2</b>			
<b>HTML and XHTML:</b> Origins of HTML and XHTML, Basic syntax, Standard XHTML document structure, Basic text markup, Images, Hypertext Links, Lists, Tables. Forms, Frames in HTML and XHTML, Syntactic differences between HTML and XHTML.			
<b>Textbook 1: Chapter 2(2.1 to 2.10)</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration, presentation, problem solving		
<b>Module-3</b>			
<b>CSS:</b> Introduction, Levels of style sheets, Style specification formats, Selector forms, Property value forms, Font properties, List properties, Color, Alignment of text, Background images, tags.			
<b>Textbook 1: Chapter 3(3.1 to 3.12)</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Demonstration, problem solving		
<b>Module-4</b>			
<b>Java Script - I:</b> Object orientation and JavaScript; General syntactic characteristics; Primitives,			

Operations, and expressions; Screen output and keyboard input.	
<b>Textbook 1: Chapter 4(4.1 to 4.5)</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Practical based learning, practical's
<b>Module-5</b>	
<b>Java Script – II:</b> Control statements, Object creation and Modification; Arrays; Functions; Constructor; Pattern matching using expressions; Errors, Element access in JavaScript.	
<b>Textbook 1: Chapter 4(4.6 to 4.14)</b>	
<b>Teaching-Learning Process</b>	Chalk and board, MOOC
<b>Course Outcomes (Course Skill Set):</b> At the end of the course the student will be able to:	
CO 1. Describe the fundamentals of web and concept of HTML.	
CO 2. Use the concepts of HTML, XHTML to construct the web pages.	
CO 3. Interpret CSS for dynamic documents.	
CO 4. Evaluate different concepts of JavaScript & Construct dynamic documents.	
CO 5. Design a small project with JavaScript and XHTML.	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. The student has to secure not less than 35% (18 Marks out of 50) in the semester-end examination (SEE).	
<b>Continuous Internal Evaluation (CIE):</b>	
<b>NOTE: List of experiments to be prepared by the faculty based on the syllabus mentioned above</b>	
CIE marks for the practical course is <b>50 Marks</b> .	
The split-up of CIE marks for record/ journal and test are in the ratio <b>60:40</b> .	
<ul style="list-style-type: none"> <li>• Each experiment to be evaluated for conduction with observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments designed by the faculty who is handling the laboratory session and is made known to students at the beginning of the practical session.</li> <li>• Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.</li> <li>• Total marks scored by the students are scaled down to 30 marks (60% of maximum marks).</li> <li>• Weightage to be given for neatness and submission of record/write-up on time.</li> <li>• Department shall conduct 02 tests for 100 marks, the first test shall be conducted after the 8<sup>th</sup> week of the semester and the second test shall be conducted after the 14<sup>th</sup> week of the semester.</li> <li>• In each test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.</li> <li>• The suitable rubrics can be designed to evaluate each student's performance and learning ability. ## IV Semester

<b>UNIX SHELL PROGRAMMING</b>			
Course Code	<b>21CS482</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	1:0:0:0	SEE Marks	50
Total Hours of Pedagogy	12	Total Marks	100
Credits	01	Exam Hours	01
<b>Course Objectives:</b>			
CLO 1. To help the students to understand effective use of Unix concepts, commands and terminology.			
CLO 2. Identify, access, and evaluate UNIX file system.			
CLO 3. Understand UNIX command syntax and semantics.			
CLO 4. Ability to read and understand specifications, scripts and programs.			
CLO 5. Analyze Facility with UNIX Process.			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.			
<ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Introduction of UNIX</b> -Introduction, History, Architecture, Experience the Unix environment, Basic commands ls, cat, cal, date, calendar, who, printf, tty, sty, uname, passwd, echo, tput, and bc.			
<b>Textbook 1: Chapter 1(1.1 to 1.4) , Chapter 2- 2.1</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, practical based learning		
<b>Module-2</b>			
<b>UNIX File System</b> -The file, what's in a filename? The parent-child relationship, pwd, the Home directory, absolute pathnames, using absolute pathnames for a command, cd, mkdir, rmdir, Relative pathnames, The UNIX file system.			
<b>Textbook 1: Chapter 4</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration, presentation, problem solving		
<b>Module-3</b>			
<b>Basic File Attributes - Is - l</b> , the -d option, File Permissions, chmod, Security and File Permission, users and groups, security level, changing permission, user masks, changing ownership and group, File Attributes, More file attributes: hard link, symbolic link, umask, find.			
<b>Textbook 1: Chapter 6</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Demonstration, problem solving		
<b>Module-4</b>			
<b>Introduction to the Shell Scripting</b> -Introduction to Shell Scripting, Shell Scripts, read, Command Line			

Arguments, Exit Status of a Command, The Logical Operators && and ||, exit, if, and case conditions, expr, sleep and wait, while, until, for, \$, @, redirection. The here document, set, trap, Sample Validation and Data Entry Scripts.

**Textbook 1: Chapter 11,12,14**

**Teaching-Learning Process** | Chalk and board, Practical based learning, practical's

**Module-5**

**Introduction to UNIX System process:** Mechanism of process creation. Parent and child process. The ps command with its options. Executing a command at a specified point of time: at command. Executing a command periodically: cron command and the crontab file.. Signals.

**Textbook 1: Chapter 9,19**

**Teaching-Learning Process** | Chalk and board, MOOC

**Course Outcomes (Course Skill Set):**

At the end of the course the student will be able to:

- CO 1. Know the basics of Unix concepts and commands.
- CO 2. Evaluate the UNIX file system.
- CO 3. Apply Changes in file system.
- CO 4. Understand scripts and programs.
- CO 5. Analyze Facility with UNIX system process

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous Internal Evaluation:**

Three Unit Tests each of **20 Marks (duration 01 hour)**

1. First test at the end of 5<sup>th</sup> week of the semester
2. Second test at the end of the 10<sup>th</sup> week of the semester
3. Third test at the end of the 15<sup>th</sup> week of the semester

Two assignments each of **10 Marks**

4. First assignment at the end of 4<sup>th</sup> week of the semester
5. Second assignment at the end of 9<sup>th</sup> week of the semester

Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for **20 Marks (duration 01 hours)**

6. At the end of the 13<sup>th</sup> week of the semester

The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be **scaled down to 50 marks**

(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

**Theory SEE** will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 01 hours**)

SEE paper will be set for 50 questions of each of 01 marks. The pattern of the question paper is MCQ. The time allotted for SEE is 01 hours

**Textbooks**

1. Unix Concepts & Applications 4<sup>th</sup> Edition, Sumitabha Das, Tata McGraw Hill

References:

2. Unix Shell Programming, Yashwant Kanetkar
3. Introduction to UNIX by M G Venkatesh Murthy.

**Weblinks and Video Lectures (e-Resources):**

1. <https://www.youtube.com/watch?v=ffYUfAqEamY>
2. <https://www.youtube.com/watch?v=Q05NZiYFcD0>
3. <https://www.youtube.com/watch?v=8GdT53KDIyY>
4. <https://www.youtube.com/watch?app=desktop&v=3Pga3y7rCgo>

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Real world problem solving using group discussion.
- Real world examples of Linux operating system Utilizations.

## IV Semester

<b>R PROGRAMMING (Practical based)</b>			
Course Code	<b>21CSL483</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2:0	SEE Marks	50
Total Hours of Pedagogy	12T + 12P	Total Marks	100
Credits	01	Exam Hours	02
<b>Course Objectives:</b>			
CLO 1. Explore and understand how R and R Studio interactive environment.			
CLO 2. To learn and practice programming techniques using R programming.			
CLO 3. Read Structured Data into R from various sources.			
CLO 4. Understand the different data Structures, data types in R.			
CLO 5. To develop small applications using R Programming			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.			
<ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Numeric, Arithmetic, Assignment, and Vectors:</b> R for Basic Math, Arithmetic, Variables, Functions, Vectors, Expressions and assignments Logical expressions.			
<b>Textbook 1: Chapter 2(2.1 to 2.7)</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, practical based learning		
<b>Module-2</b>			
<b>Matrices and Arrays:</b> Defining a Matrix, Sub-setting, Matrix Operations, <b>Conditions and Looping:</b> if statements, looping with for, looping with while, vector based programming.			
<b>Textbook 1: Chapter 2- 2.8, chapter 3- 3.2 to 3.5</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration, presentation, problem solving		
<b>Module-3</b>			
<b>Lists and Data Frames:</b> Data Frames, <b>Lists</b> , Special values, The apply family.			
<b>Textbook 1: Chapter 6- 6.2 to 6.4</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Demonstration, problem solving		
<b>Module-4</b>			
<b>Functions:</b> Calling functions, scoping, Arguments matching, writing functions: The function command, Arguments, specialized function.			
<b>Textbook 1: Chapter 5- 5.1 to 5.6</b>			

<b>Teaching-Learning Process</b>	Chalk and board, Practical based learning, practical's
<b>Module-5</b>	
Pointers: packages, frames, de bugging, manipulation of code, compilation of the code.	
<b>Textbook 1: Chapter 8- 8.1 to 8.8</b>	
<b>Teaching-Learning Process</b>	Chalk and board, MOOC
<b>Course Outcomes (Course Skill Set):</b> At the end of the course the student will be able to:	
<ul style="list-style-type: none"> <li>CO 1. To understand the fundamental syntax of R through readings, practice exercises,</li> <li>CO 2. To demonstrations, and writing R code.</li> <li>CO 3. To apply critical programming language concepts such as data types, iteration,</li> <li>CO 4. To understand control structures, functions, and Boolean operators by writing R programs and through examples</li> <li>CO 5. To import a variety of data formats into R using R-Studio</li> <li>CO 6. To prepare or tidy data for in preparation for analyze.</li> </ul>	
<b>Assessment Details (both CIE and SEE)</b>	
<p>The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. The student has to secure not less than 35% (18 Marks out of 50) in the semester-end examination (SEE).</p> <p><b>Continuous Internal Evaluation (CIE):</b> <i>NOTE: List of experiments to be prepared by the faculty based on the syllabus mentioned above</i> CIE marks for the practical course is <b>50 Marks</b>.</p> <p>The split-up of CIE marks for record/ journal and test are in the ratio <b>60:40</b>.</p> <ul style="list-style-type: none"> <li>• Each experiment to be evaluated for conduction with observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments designed by the faculty who is handling the laboratory session and is made known to students at the beginning of the practical session.</li> <li>• Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.</li> <li>• Total marks scored by the students are scaled down to 30 marks (60% of maximum marks).</li> <li>• Weightage to be given for neatness and submission of record/write-up on time.</li> <li>• Department shall conduct 02 tests for 100 marks, the first test shall be conducted after the 8<sup>th</sup> week of the semester and the second test shall be conducted after the 14<sup>th</sup> week of the semester.</li> <li>• In each test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.</li> <li>• The suitable rubrics can be designed to evaluate each student's performance and learning ability. Rubrics suggested in Annexure-II of Regulation book</li> <li>• The average of 02 tests is scaled down to <b>20 marks</b> (40% of the maximum marks).</li> </ul> <p>The Sum of scaled-down marks scored in the report write-up/journal and average marks of two tests is the total CIE marks scored by the student.</p>	
<b>Semester End Evaluation (SEE):</b>	
<ul style="list-style-type: none"> <li>• SEE marks for the practical course is 50 Marks.</li> <li>• SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the University</li> <li>• All laboratory experiments are to be included for practical examination.</li> <li>• (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. <b>OR</b> based on the course requirement evaluation rubrics shall be decided jointly by examiners.</li> <li>• Students can pick one question (experiment) from the questions lot prepared by the internal</li> </ul>	

<p>/external examiners jointly.</p> <ul style="list-style-type: none"> <li>• Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.</li> <li>• General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)</li> <li>• The duration of SEE is 02 hours</li> </ul> <p>Rubrics suggested in Annexure-II of Regulation book</p>

## V Semester

<b>CYBER SECURITY</b>			
Course Code	21IC51	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
CLO 1. List the threats, vulnerabilities in Computer system CLO 2. Understand the importance of cyber security CLO 3. Explain the importance and role of security in programming, web, OS and Network CLO 4. Identify the types of attacks –web ,browser, email			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes. <ol style="list-style-type: none"> <li>Lecturer method (L) needs not to be only traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>Use of Video/Animation to explain functioning of various concepts.</li> <li>Encourage collaborative (Group Learning) Learning in the class.</li> <li>Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyse information rather than simply recall it.</li> <li>Introduce Topics in manifold representations.</li> <li>Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Introduction;</b> What Is Computer Security? Threats, Harm, Vulnerabilities, Controls, Conclusion, What's Next?			
<b>Toolbox: Authentication, Access Control, and Cryptography:</b> Authentication, Access Control.			
<b>Textbook 1: Ch1, Ch2: 2.1, 2.2</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Problem based learning		
<b>Module-2</b>			
<b>Programs and Programming:</b> Unintentional (Nonmalicious) Programming Oversights, Malicious Code—Malware, Countermeasures			
<b>Textbook 1:: Ch3</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration		
<b>Module-3</b>			
<b>The Web—User Side:</b> Browser Attacks, Web Attacks Targeting Users, Obtaining User or Website Data, Email Attacks			
<b>Textbook 1:: CH 4</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration		

<b>Process</b>	
<b>Module-4</b>	
<b>Operating Systems:</b> Security in Operating Systems, Security in the Design of Operating Systems, Rootkit	
<b>Textbook 1:Ch5</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration
<b>Module-5</b>	
Networks: Network concepts, War on Networks: Threats to Network Communications, Wireless Network Security, Denial of Service, Distributed Denial-of-Service,	
<b>Textbook 1: Ch6 - 6.1 - 6.5</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration
<b>Course Outcomes</b>	
At the end of the course the student will be able to:	
<ul style="list-style-type: none"> <li>CO 1. Define Computer security, threats, vulnerabilities and identify the counter measures.</li> <li>CO 2. Develop the programs for classifying malicious and non-malicious software</li> <li>CO 3. Design the security concepts in web, OS and Networks</li> <li>CO 4. Demonstrate the tools and methods to identify threats</li> <li>CO 5. Illustrate the challenges in wireless Network security</li> </ul>	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 35% ( 18 Marks out of 50)in the semester-end examination(SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
<ul style="list-style-type: none"> <li>1. First test at the end of 5<sup>th</sup> week of the semester</li> <li>2. Second test at the end of the 10<sup>th</sup> week of the semester</li> <li>3. Third test at the end of the 15<sup>th</sup> week of the semester</li> </ul>	
Two assignments each of <b>10 Marks</b>	
<ul style="list-style-type: none"> <li>4. First assignment at the end of 4<sup>th</sup> week of the semester</li> <li>5. Second assignment at the end of 9<sup>th</sup> week of the semester</li> </ul>	
Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b>	
<ul style="list-style-type: none"> <li>6. At the end of the 13<sup>th</sup> week of the semester</li> </ul>	
The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b>	
(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).	
<b>CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.</b>	
<b>Semester End Examination:</b>	
Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject ( <b>duration 03 hours</b> )	
<ul style="list-style-type: none"> <li>1. The question paper will have ten questions. Each question is set for 20 marks.</li> </ul>	

2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Suggested Learning Resources:****Text Books**

4. Charles P. Pfleeger, Shari Lawrence Pfleeger, Jonathan Margulies, Security in Computing, Pearson Education, 2015

**Reference:**

1. Lester evans, Cyber Security, independent publish, 2018.
2. Nina Godbole and Sunit Belapure, Cyber security, Wiley India, 2011

**Web links and Video Lectures (e-Resources):****Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

Skill development activities in areas of forensics, scripting using open source tools like Kali Linux, Wireshark etc.

## V Semester

<b>COMPUTER NETWORK</b>			
Course Code:	21CS52	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:2:0	SEE Marks	50
Total Hours of Pedagogy	40T + 20P	Total Marks	100
Credits	04	Exam Hours	03
<b>Course Objectives:</b>			
<p>CLO 1. Fundamentals of data communication networks.            CLO 2. Software and hardware interfaces            CLO 3. Application of various physical components and protocols            CLO 4. Communication challenges and remedies in the networks.</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Introduction to networks:</b> Network hardware, Network software, Reference models,			
<b>Physical Layer:</b> Guided transmission media, Wireless transmission			
<b>Textbook 1: Ch.1.2 to 1.4, Ch.2.2 to 2.3</b>			
<b>Laboratory Component:</b>			
<ol style="list-style-type: none"> <li>1. Implement Three nodes point – to – point network with duplex links between them for different topologies. 1Set the queue size, vary the bandwidth, and find the number of packets dropped for various iterations.</li> </ol>			
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration		
<b>Module-2</b>			
<b>The Data link layer:</b> Design issues of DLL, Error detection and correction, Elementary data link protocols, Sliding window protocols.			
<b>The medium access control sublayer:</b> The channel allocation problem, Multiple access protocols.			
<b>Textbook 1: Ch.3.1 to 3.4, Ch.4.1 and 4.2</b>			
<b>Laboratory Component:</b>			
<ol style="list-style-type: none"> <li>1. Implement simple ESS and with transmitting nodes in wire-less LAN by simulation and determine the throughput with respect to transmission of packets</li> <li>2. Write a program for error detecting code using CRC-CCITT (16- bits).</li> </ol>			

<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration
<b>Module-3</b>	
<b>The Network Layer:</b> Network Layer Design Issues, Routing Algorithms, Congestion Control Algorithms, QoS.	
<b>Textbook 1: Ch 5.1 to 5.4</b>	
<b>Laboratory Component:</b>	
<ol style="list-style-type: none"> <li>1. Implement transmission of ping messages/trace route over a network topology consisting of 6 nodes and find the number of packets dropped due to congestion in the network.</li> <li>2. Write a program to find the shortest path between vertices using bellman-ford algorithm.</li> </ol>	
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration
<b>Module-4</b>	
<b>The Transport Layer:</b> The Transport Service, Elements of transport protocols, Congestion control, The internet transport protocols.	
<b>Textbook 1: Ch 6.1 to 6.4 and 6.5.1 to 6.5.7</b>	
<b>Laboratory Component:</b>	
<ol style="list-style-type: none"> <li>1. Implement an Ethernet LAN using n nodes and set multiple traffic nodes and plot congestion window for different source / destination.</li> <li>2. Write a program for congestion control using leaky bucket algorithm.</li> </ol>	
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration
<b>Module-5</b>	
<b>Application Layer:</b> Principles of Network Applications, The Web and HTTP, Electronic Mail in the Internet, DNS—The Internet's Directory Service.	
<b>Textbook 2: Ch 2.1 to 2.4</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration
<b>Course Outcomes (Course Skill Set)</b>	
At the end of the course the student will be able to:	
<ol style="list-style-type: none"> <li>CO 1. Learn the basic needs of communication system.</li> <li>CO 2. Interpret the communication challenges and its solution.</li> <li>CO 3. Identify and organize the communication system network components</li> <li>CO 4. Design communication networks for user requirements.</li> </ol>	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
<ol style="list-style-type: none"> <li>1. First test at the end of 5<sup>th</sup> week of the semester</li> <li>2. Second test at the end of the 10<sup>th</sup> week of the semester</li> <li>3. Third test at the end of the 15<sup>th</sup> week of the semester</li> </ol>	
Two assignments each of <b>10 Marks</b>	
<ol style="list-style-type: none"> <li>4. First assignment at the end of 4<sup>th</sup> week of the semester</li> <li>5. Second assignment at the end of 9<sup>th</sup> week of the semester</li> </ol>	
Practical Sessions need to be assessed by appropriate rubrics and viva-voce method. This will contribute to <b>20 marks</b> .	

- Rubrics for each Experiment taken average for all Lab components – 15 Marks.
- Viva-Voce– 5 Marks (more emphasized on demonstration topics)

The sum of three tests, two assignments, and practical sessions will be out of 100 marks and will be **scaled down to 50 marks**

(to have a less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper has to be designed to attain the different levels of Bloom’s taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Suggested Learning Resources:**

**Textbooks:**

1. Computer-Networks- Andrew S. Tanenbaum and David J. Wetherall, Pearson Education, 5th-Edition. (www.pearsonhighered.com/tanenbaum)
2. Computer Networking A Top-Down Approach -James F. Kurose and Keith W. RossPearson Education 7<sup>th</sup> Edition.

**Reference Books:**

1. Behrouz A Forouzan, Data and Communications and Networking, Fifth Edition, McGraw Hill,Indian Edition
2. Larry L Peterson and Brusce S Davie, Computer Networks, fifth edition, ELSEVIER

**Weblinks and Video Lectures (e-Resources):**

1. <https://www.digimat.in/nptel/courses/video/106105183/L01.html>
2. <http://www.digimat.in/nptel/courses/video/106105081/L25.html>
3. <https://nptel.ac.in/courses/106105081>
4. VTU e-Shikshana Program

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

Simulation of Personal area network, Home area network, achieve QoS etc.

**Note:** For the Simulation experiments modify the topology and parameters set for the experiment and take multiple rounds of reading and analyze the results available in log files. Plot necessary graphs and conclude using NS2. Installation procedure of the required software must be demonstrated, carried out in groups, and documented in the report. Non simulation programs can be implemented using Java

## V Semester

<b>SENSORS AND SENSING SYSTEM</b>			
Course Code	21IC53	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
CLO 1. Identify various types of sensors used in IOT			
CLO 2. Illustrate connection of sensors to processing devices.			
CLO 3. Explain the communication protocols used for IOT sensing			
CLO 4. Explain the IEEE standards for IOT sensing.			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.			
<ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
What are sensors/transducers?, Principles, Classification, Parameters, Environmental Parameters Characteristics.			
Mechanical and Electromechanical Sensors: Introduction, Resistive Potentiometer, Strain gauge, Inductive Sensors, Capacitive Sensors, Force/Stress sensors, Ultrasonic Sensors.			
<b>Textbook1: Chapter 1,2</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Problem based learning		
<b>Module-2</b>			
Thermal Sensors: Introduction, Gas Thermometric Sensors, Thermal Expansion type thermometric sensors, Dielectric constant and refractive index thermosensors, magnetic thermometer, resistance change type thermometric sensors, thermoelectric sensors, thermal radiation sensors, Quartz crystal thermoelectric sensors, Spectroscopic thermometry, noise thermometry, heat flux sensors			
Magnetic sensors: Introduction, Sensors and principles, magnetoresistive sensors, Hall effect sensors, inductive and eddy current sensors, Angular/Rotary movement sensors, Eddy current sensors, Electromagnetic flowmeter, SQUID sensors			
<b>Textbook1: Chapter 3,4</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration		
<b>Module-3</b>			
Electroanalytical Sensors: Introduction, Electrochemical cell, cell potential, SHE, Liquid junction and			

other potentiometers, polarization, reference electrodes, Sensor electrodes, electroceramics in gas media, ChemFET.

**Textbook1: Chapter 6**

Getting Sensor Information Into the MCU : Introduction, Amplification and Signal Conditioning, Digital Conversion

**Textbook2: Chapter 4**

<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration
----------------------------------	--

**Module-4**

Using MCUs/DSPs to Increase Sensor IQ: Introduction, MCU Control, MCUs for Sensor Interface, DSP Control, Techniques and Systems Considerations, Software, Tools, and Support, Sensor Integration

Communications for Smart Sensors: Introduction, Definitions and Background, Sources (Organizations) and Standards, Automotive Protocols, Industrial Networks, Office/Building Automation, Home Automation, Protocols in Silicon, Other Aspects of Network Communications

**Textbook2: Chapter 5, 6**

<b>Teaching-Learning Process</b>	Chalk& board, Problem based learning
----------------------------------	--------------------------------------

**Module-5**

Mechatronics and Sensing Systems: Introduction, Smart-Power ICs, Embedded Sensing, Sensing Arrays, Other System Aspects

Standards for Smart Sensing: Introduction, Setting the Standards for Smart Sensors and Systems, IEEE 1451.1, IEEE 1451.2, IEEE P1451.3, IEEE P1451.4, Extending the System to the Network

**Textbook2: Chapter 11, 12**

<b>Teaching-Learning Process</b>	Chalk and board, MOOC
----------------------------------	-----------------------

**Course Outcomes**

At the end of the course the student will be able to:

- CO 1. Define sensors / transducers and summarize the different types of sensors
- CO 2. Illustrate the mechanism to connect the sensors to processing devices
- CO 3. Demonstrate the communication mechanism for IOT sensors
- CO 4. Explain IEEE standards

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous Internal Evaluation:**

Three Unit Tests each of **20 Marks (duration 01 hour)**

1. First test at the end of 5<sup>th</sup> week of the semester
2. Second test at the end of the 10<sup>th</sup> week of the semester
3. Third test at the end of the 15<sup>th</sup> week of the semester

Two assignments each of **10 Marks**

4. First assignment at the end of 4<sup>th</sup> week of the semester
5. Second assignment at the end of 9<sup>th</sup> week of the semester

Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for **20 Marks (duration 01 hours)**

6. At the end of the 13<sup>th</sup> week of the semester

The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be **scaled down to 50 marks**

(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Suggested Learning Resources:**

**Textbooks**

- 1.
2. Patranabis D, "Sensors and Transducers," Prentice Hall
3. Frank R, "Understanding Smart Sensors", Artech House

**Reference Books:**

1. Callaway EH, "Wireless Sensor Networks : Architecture and Protocols," Auerbach Publications
2. Anand MMS, "Electronic Instruments and Instrumentation Techniques," Prentice Hall IEEE Standard 1451, "Smart Transducer Interface for Sensor and Actuators"

<b>Textbook 2: Chapter 1 and 2</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration		
<b>Module-3</b>			
Basics of Learning theory			
Similarity Based Learning			
Regression Analysis			

<b>Textbook 2: Chapter 3 - 3.1 to 3.4, Chapter 4, chapter 5.1 to 5.4</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration
<b>Module-4</b>	
Decision Tree learning Bayesian Learning	
<b>Textbook 2: Chapter 6 and 8</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration
<b>Module-5</b>	
Artificial neural Network Clustering Algorithms	
<b>Textbook 2: Chapter 10 and 13</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning.
<b>Course Outcomes Course Skill Set)</b>	
At the end of the course the student will be able to:	
CO 1. Apply the knowledge of searching and reasoning techniques for different applications.	
CO 2. Have a good understanding of machine learning in relation to other fields and fundamental issues and challenges of machine learning.	
CO 3. Apply the knowledge of classification algorithms on various dataset and compare results	
CO 4. Model the neuron and Neural Network, and to analyze ANN learning and its applications.	
CO 5. Identifying the suitable clustering algorithm for different pattern	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
<ol style="list-style-type: none"> <li>1. First test at the end of 5<sup>th</sup> week of the semester</li> <li>2. Second test at the end of the 10<sup>th</sup> week of the semester</li> <li>3. Third test at the end of the 15<sup>th</sup> week of the semester</li> </ol>	
Two assignments each of <b>10 Marks</b>	
<ol style="list-style-type: none"> <li>4. First assignment at the end of 4<sup>th</sup> week of the semester</li> <li>5. Second assignment at the end of 9<sup>th</sup> week of the semester</li> </ol>	
Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours) OR</b> Suitable Programming experiments based on the syllabus contents can be given to the students to submit the same as laboratory work( for example; Implementation of concept learning, implementation of decision tree learning algorithm for suitable data set, etc...)	
<ol style="list-style-type: none"> <li>6. At the end of the 13<sup>th</sup> week of the semester</li> </ol>	
The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b>	
(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the	

methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

Role play for strategies– DFS & BFS, Outlier detection in Banking and insurance transaction for identifying fraudulent behaviour etc. Uncertainty and reasoning Problem- reliability of sensor used to detect pedestrians using Bayes Rule

## V Semester

ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING LABORATORY			
CourseCode	21ICL55	CIEMarks	50
TeachingHours/Week(L:T:P:S)	0:0:2:0	SEEMarks	50
TotalHoursofPedagogy	24	TotalMarks	100
Credits	01	ExamHours	03
<b>Course Learning Objectives:</b>			
CLO 1. Explain the Search algorithms, Heuristics search algorithms for solving a problem.			
CLO 2. Develop Regression methods, supervised learning algorithms for prediction / Classification			
CLO 3. Develop Unsupervised learning algorithms for clustering.			
<b>Sl. No.</b>	<b>PART-A</b>		
1	<p>Aim: To implement and evaluate DFS and BFS algorithms.</p> <p>Program: Given city map compare the following uniform search algorithm DFS and BFS.</p>		
2	<p>Aim: To implement, evaluate A* algorithm and . identify the difference between BFS / DFS and A*.</p> <p>Program: Given city map and heuristic values implement A* algorithm and identify the difference between uniform search and heuristic search algorithm.</p>		
3	<p>Aim: To evaluate linear regression for prediction.</p> <p>Program: Demonstrate and analyse the application of Linear regression model for predicting insurance cost. Dataset can be downloaded from <a href="https://github.com/stedy/Machine-Learning-with-R-datasets/blob/master/insurance.csv">https://github.com/stedy/Machine-Learning-with-R-datasets/blob/master/insurance.csv</a> or any other opensource data available.</p>		
3	<p>Aim: To construct the Decision tree using the training data sets under supervised learning concept.</p> <p>Program: Write a program to demonstrate the working of the decision tree based ID3 algorithm. Use an appropriate data set for building the decision tree and apply this knowledge to classify a new sample.</p>		
4	<p>Aim: To understand the working principle of Artificial Neural network with feed forward and feed backward principle.</p> <p>Program: Build an Artificial Neural Network by implementing the Backpropagation algorithm and test the same using appropriate data sets.</p>		
5	<p>Aim: Demonstrate the text classifier using Naïve bayes classifier algorithm.</p> <p>Program: Write a program to implement the naive Bayesian classifier for a sample training data set stored as a .CSV file. Compute the accuracy of the classifier, considering few test data sets.</p>		
6	<p>Aim: Demonstrate and Analyse the results sets obtained from Bayesian belief network Principle.</p> <p>Program: Write a program to construct a Bayesian network considering medical data. Use this model to demonstrate the diagnosis of heart patients using standard Heart Disease Data Set. You can use Python ML library classes/API.</p>		
7	<p>Aim: Implement and demonstrate the working model of K-means clustering algorithm with Expectation Maximization Concept.</p> <p>Program: Apply EM algorithm to cluster a set of data stored in a .CSV file. Use the same data set</p>		

	for clustering using k-Means algorithm. Compare the results of these two algorithms and comment on the quality of clustering. You can add Python ML library classes/API in the program.
8	Aim: Demonstrate and analyse the results of classification based on KNN Algorithm.  Program: Write a program to implement k-Nearest Neighbour algorithm to classify the iris data set. Print both correct and wrong predictions. Java/Python ML library classes can be used for this problem.
<b>Pedagogy</b>	For the above experiments the following pedagogy can be considered. Problembasedlearning,Activelearning,MOOC,Chalk&Talk
<b>PART B</b>	
	A problem statement for each batch is to be generated in consultation with the co-examiner and student should develop an algorithm, program and execute the Program for the given problem with appropriate outputs.
<b>Course Outcomes:</b> At the end of the course the student will be able to: CO 1. Evaluate the performance of uniform and heuristic search algorithms. CO 2. Develop supervised algorithm and analyze each on them for their accuracy. CO 3. Identify the requirement for unsupervised machine learning algorithm, Develop a algorithm and evaluate the same. CO 4. Identify the problem to solved using AI or ML techniques and evaluate the algorithm.	
<b>Assessment Details (both CIE and SEE)</b>  The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. The student has to secure not less than 35% (18 Marks out of 50) in the semester-end examination (SEE).  <b>Continuous Internal Evaluation (CIE):</b>  CIE marks for the practical course is <b>50 Marks</b> .  The split-up of CIE marks for record/ journal and test are in the ratio <b>60:40</b> .  Each experiment to be evaluated for conduction with an observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments designed by the faculty who is handling the laboratory session and is made known to students at the beginning of the practical session. Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks. Total marks scored by the students are scaled down to 30 marks (60% of maximum marks). Weightage to be given for neatness and submission of record/write-up on time. Department shall conduct 02 tests for 100 marks, the first test shall be conducted after the 8th week of the semester and the second test shall be conducted after the 14th week of the semester. In each test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce. The suitable rubrics can be designed to evaluate each student's performance and learning ability. Rubrics suggested in Annexure-II of Regulation book The average of 02 tests is scaled down to 20 marks (40% of the maximum marks). The Sum of scaled-down marks scored in the report write-up/journal and average marks of two tests is the total CIE marks scored by the student.	
<b>Semester End Evaluation (SEE):</b>  • SEE marks for the practical course is 50 Marks.	

- SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the University
- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.
- Students can pick one question (experiment) from the questions lot prepared by the internal /external examiners jointly.
- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.
- General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)
- *Students can pick one experiment from the questions lot of PART A with an equal choice to all the students in a batch. For PART B, the project group (Maximum of 4 students per batch) should demonstrate the mini-project.*
- *Weightage of marks for PART A is 60% and for PART B is 40%. General rubrics suggested to be followed for part A and part B.*
- Change of experiment is allowed only once and Marks allotted to the procedure part to be made zero (Not allowed for Part B).
- The duration of SEE is 03 hours

Rubrics suggested in Annexure-II of Regulation book

## V Semester

<b>ANGULAR JS AND NODE JS (Practical based)</b>			
Course Code:	<b>21CSL581</b>	CIE Marks	50
Teaching Hours/Week	0:0:2:0	SEE Marks	50
Total No. of Hours	12T + 12P	Total Marks	100
Credits	01	Exam Hours	02
<b>Course Objectives:</b> The student should be made to:			
CLO 1. To learn the basics of Angular JS.			
CLO 2. To understand the Angular JS Modules.			
CLO 3. To implement Forms, inputs and Services			
CLO 4. To implement Directives and Databases			
CLO 5. To understand basics of Node JS.			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.			
<ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Introduction To Angular JS:</b> Introduction – Features – Angular JSModel-View-Controller – Expression - Directives and Controllers.			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, practical based learning		
<b>Module-2</b>			
<b>Angular JS Modules:</b> Arrays –Working with ng-model – Working with Forms – Form Validation – Error Handling with Forms – Nested Forms with ng-form – Other Form Controls.			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, practical based learning		
<b>Module-3</b>			
<b>Directives&amp; Building Databases:</b>			
<b>Part I-</b> Filters – Using Filters in Controllers and Services – Angular JS Services – Internal Angular JS Services – Custom Angular JS Services			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, practical based learning		
<b>Module-4</b>			
<b>Directives&amp; Building Databases:</b>			
<b>Part-II-</b> Directives – Alternatives to Custom Directives – Understanding the Basic options – Interacting with Server –HTTP Services – Building Database, Front End and BackEnd			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, practical based learning		
<b>Module-5</b>			
<b>Introduction to NODE .JS:</b> Introduction –Using the Terminals – Editors –Building a Webserver with Node – The HTTPModule – Views and Layouts.			

<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, practical based learning
<b>Course Outcomes (Course Skill Set)</b>	
At the end of the course the student will be able to:	
CO 1. Describe the features of Angular JS.	
CO 2. Recognize the form validations and controls.	
CO 3. Implement Directives and Controllers.	
CO 4. Evaluate and createdatabase for simple application.	
CO 5. Plan and build webservers with node usingNode .JS.	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. The student has to secure not less than 35% (18 Marks out of 50) in the semester-end examination (SEE).	
<b>Continuous Internal Evaluation (CIE):</b>	
<b>NOTE: List of experiments to be prepared by the faculty based on the syllabus mentioned above</b>	
CIE marks for the practical course is <b>50 Marks</b> .	
The split-up of CIE marks for record/ journal and test are in the ratio <b>60:40</b> .	
<ul style="list-style-type: none"> <li>• Each experiment to be evaluated for conduction with observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments designed by the faculty who is handling the laboratory session and is made known to students at the beginning of the practical session.</li> <li>• Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.</li> <li>• Total marks scored by the students are scaled down to 30 marks (60% of maximum marks).</li> <li>• Weightage to be given for neatness and submission of record/write-up on time.</li> <li>• Department shall conduct 02 tests for 100 marks, the first test shall be conducted after the 8<sup>th</sup> week of the semester and the second test shall be conducted after the 14<sup>th</sup> week of the semester.</li> <li>• In each test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.</li> <li>• The suitable rubrics can be designed to evaluate each student's performance and learning ability. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Introduction to C#</b>			
<b>Part-I:</b> Understanding C#, .NET, overview of C#, Variables, Data Types, Operators, Expressions, Branching, Looping, Methods, implicit and explicit casting.			
<b>Teaching-Learning Process</b>	Active learning		
<b>Module-2</b>			
<b>Part-II:</b> Constants, Arrays, Array Class, Array List, String, String Builder, Structure, Enumerations, boxing and unboxing.			
<b>Teaching-Learning Process</b>	Active learning		
<b>Module-3</b>			
<b>Object Oriented Concepts-I:</b>			
Class, Objects, Constructors and its types, inheritance, properties, indexers, index overloading, polymorphism.			
<b>Teaching-Learning Process</b>	Active learning		
<b>Module-4</b>			
<b>Object Oriented Concepts-II:</b>			

Sealed class and methods, interface, abstract class, abstract and interface, operator overloading, delegates, events, errors and exception, Threading.	
<b>Teaching-Learning Process</b>	Active learning
<b>Module-5</b>	
<b>Introduction to .NET FRAMEWORK:</b>	
Assemblies, Versioning, Attributes, reflection, viewing meta data, remoting, security in .NET, Environment Setup of .NET Core and create a small project.	
<b>Teaching-Learning Process</b>	Active learning
<b>Course Outcomes (Course Skill Set)</b>	
At the end of the course the student will be able to:	
CO 1. Able to explain how C# fits into the .NET platform.	
CO 2. Describe the utilization of variables and constants of C#	
CO 3. Use the implementation of object-oriented aspects in applications.	
CO 4. Analyze and Set up Environment of .NET Core.	
CO 5. Evaluate and create a simple project application.	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination(SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
<ol style="list-style-type: none"> <li>1. First test at the end of 5<sup>th</sup> week of the semester</li> <li>2. Second test at the end of the 10<sup>th</sup> week of the semester</li> <li>3. Third test at the end of the 15<sup>th</sup> week of the semester</li> </ol>	
Two assignments each of <b>10 Marks</b>	
<ol style="list-style-type: none"> <li>4. First assignment at the end of 4<sup>th</sup> week of the semester</li> <li>5. Second assignment at the end of 9<sup>th</sup> week of the semester</li> </ol>	
Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b>	
<ol style="list-style-type: none"> <li>6. At the end of the 13<sup>th</sup> week of the semester</li> </ol>	
The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b>	
(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).	
<b>CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.</b>	
<b>Semester End Examination:</b>	
<b>Theory SEE</b> will be conducted by University as per the scheduled timetable, with common question papers for the subject ( <b>duration 01 hours</b> )	
SEE paper will be set for 50 questions of each of 01 marks. The pattern of the question paper is MCQ. The time allotted for SEE is 01 hours

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

Real world problem solving using group discussion.

## VI Semester

<b>SOFTWARE ENGINEERING &amp; PROJECT MANAGEMENT</b>			
Course Code	<b>21CS61</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	2:2:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
<p>CLO 1. Outline software engineering principles and activities involved in building large software programs. Identify ethical and professional issues and explain why they are of concern to Software Engineers.</p> <p>CLO 2. Describe the process of requirement gathering, requirement classification, requirement specification and requirements validation.</p> <p>CLO 3. Infer the fundamentals of object oriented concepts, differentiate system models, use UML diagrams and apply design patterns.</p> <p>CLO 4. Explain the role of DevOps in Agile Implementation.</p> <p>CLO 5. Discuss various types of software testing practices and software evolution processes.</p> <p>CLO 6. Recognize the importance Project Management with its methods and methodologies.</p> <p>CLO 7. Identify software quality parameters and quantify software using measurements and metrics. List software quality standards and outline the practices involved</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>Use of Video/Animation to explain functioning of various concepts.</li> <li>Encourage collaborative (Group Learning) Learning in the class.</li> <li>Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>Introduce Topics in manifold representations.</li> <li>Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<p><b>Introduction:</b>The evolving role of software, Software, The changing nature of software, Software engineering, A Process Framework, Process Patterns, Process Assessment, Personal and Team Process Models, Process Technology, Product and Process.</p> <p><b>Textbook 1: Chapter 1: 1.1 to 1.3</b></p> <p><b>Process Models:</b>Prescriptive models, Waterfall model, Incremental process models, Evolutionary process models, Specialized process models.</p> <p><b>Textbook 1: Chapter 2: 2.1, 2.2, 2.4 to 2.7</b></p> <p><b>Requirements Engineering:</b>Requirements Engineering Task, Initiating the RequirementsEngineering process, Eliciting Requirements, Developing use cases, Building the analysis model, Negotiating Requirements, Validating Requirements, Software Requirement Document (<b>Sec 4.2</b>)</p> <p><b>Textbook 1: Chapter 3: 3.1 to 3.6, Textbook 5: Chapter 4: 4.2</b></p>			

<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Problem based learning
<b>Module-2</b>	
<p><b>Introduction, Modelling Concepts and Class Modelling:</b>What is Object orientation? What is OO development? OO Themes; Evidence for usefulness of OO development; OO modelling history. Modelling as Design technique: Modelling, abstraction, The Three models. Class Modelling: Object and Class Concept, Link and associations concepts, Generalization and Inheritance, A sample class model, Navigation of class models, Introduction to RUP(<b>Textbook: 5 Sec 2.4</b>)and UML diagrams</p> <p><b>Textbook 2: Chapter 1,2,3</b></p> <p><b>Building the AnalysisModels:</b> Requirement Analysis, Analysis Model Approaches, Data modeling Concepts, Object Oriented Analysis, Scenario-Based Modeling, Flow-Oriented Modeling, class Based Modeling, Creating a Behavioral Model.</p> <p><b>Textbook 1: Chapter 8: 8.1 to 8.8</b></p>	
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration
<b>Module-3</b>	
<p><b>Software Testing:</b> A Strategic Approach to Software Testing,Strategic Issues, Test Strategies for Conventional Software, Test Strategies for Object -Oriented Software, Validation Testing, System Testing, The Art of Debugging.</p> <p><b>Textbook 1: Chapter 13: 13.1 to 13.7</b></p> <p><b>Agile Methodology &amp; DevOps:</b> Before Agile – Waterfall, Agile Development,</p> <p><b>Self-Learning Section:</b> What is DevOps?, DevOps Importance and Benefits, DevOps Principles and Practices, 7 C's of DevOps Lifecycle for Business Agility, DevOps and Continuous Testing, How to Choose Right DevOps Tools?, Challenges with DevOps Implementation.</p> <p><b>Textbook 4: Chapter 2: 2.1 to 2.9</b></p>	
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration
<b>Module-4</b>	
<p><b>Introduction to Project Management:</b> Introduction, Project and Importance of Project Management, Contract Management, Activities Covered by Software Project Management, Plans, Methods and Methodologies, Some ways of categorizing Software Projects, Stakeholders, Setting Objectives, Business Case, Project Success and Failure, Management and Management Control, Project Management life cycle, Traditional versus Modern Project Management Practices.</p> <p><b>Textbook 3: Chapter 1: 1.1 to 1.17</b></p>	
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration
<b>Module-5</b>	
<p><b>Activity Planning:</b> Objectives of Activity Planning, When to Plan, Project Schedules, Sequencing and Scheduling Activities, Network Planning Models, Forward Pass– Backward Pass, Identifying critical path, Activity Float, Shortening Project Duration, Activity on Arrow Networks.</p> <p><b>Textbook 3: Chapter 6: 6.1 to 6.16</b></p> <p><b>Software Quality:</b> Introduction, The place of software quality in project planning, Importance of software quality, software quality models, ISO 9126, quality management systems, process capability models, techniques to enhance software quality, quality plans.</p> <p><b>Textbook 3: Chapter 13: (13.1 to 13.6 , 13.9, 13.11, 13.14),</b></p>	

<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration
<p><b>Course Outcomes</b></p> <p>At the end of the course the student will be able to:</p> <ul style="list-style-type: none"> <li>CO 1. Understand the activities involved in software engineering and analyze the role of various process models</li> <li>CO 2. Explain the basics of object-oriented concepts and build a suitable class model using modelling techniques</li> <li>CO 3. Describe various software testing methods and to understand the importance of agile methodology and DevOps</li> <li>CO 4. Illustrate the role of project planning and quality management in software development</li> <li>CO 5. Understand the importance of activity planning and different planning models</li> </ul>	
<p><b>Assessment Details (both CIE and SEE)</b></p> <p>The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together</p> <p><b>Continuous Internal Evaluation:</b></p> <p>Three Unit Tests each of <b>20 Marks (duration 01 hour)</b></p> <ul style="list-style-type: none"> <li>1. First test at the end of 5<sup>th</sup> week of the semester</li> <li>2. Second test at the end of the 10<sup>th</sup> week of the semester</li> <li>3. Third test at the end of the 15<sup>th</sup> week of the semester</li> </ul> <p>Two assignments each of <b>10 Marks</b></p> <ul style="list-style-type: none"> <li>4. First assignment at the end of 4<sup>th</sup> week of the semester</li> <li>5. Second assignment at the end of 9<sup>th</sup> week of the semester</li> </ul> <p>Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b></p> <ul style="list-style-type: none"> <li>6. At the end of the 13<sup>th</sup> week of the semester</li> </ul> <p>The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b> (to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).</p> <p><b>CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.</b></p> <p><b>Semester End Examination:</b></p> <p>Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (<b>duration 03 hours</b>)</p> <ul style="list-style-type: none"> <li>1. The question paper will have ten questions. Each question is set for 20 marks.</li> <li>2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), <b>should have a mix of topics</b> under that module.</li> </ul> <p>The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks</p>

<b>Activity Based Learning (Suggested Activities in Class)/ Practical Based learning</b>  Case study, Field visit

## VI Semester

<b>INTERNET OF THINGS</b>			
Course Code	21IC62	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:2:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	04	Exam Hours	03
<b>Course Learning Objectives</b>			
<p>CLO 1. Understand about the fundamentals of Internet of Things and its building blocks along with their characteristics.</p> <p>CLO 2. Understand the recent application domains of IoT in everyday life.</p> <p>CLO 3. Understand the protocols and standards designed for IoT and the current research on it.</p> <p>CLO 4. Understand the other associated technologies like cloud and fog computing in the domain of IoT.</p> <p>CLO 5. Improve their knowledge about the various cutting-edge technologies in the field IoT and machine learning applications.</p> <p>CLO 6. Gain insights about the current trends of machine learning and AI techniques used in IoT to orient towards the present industrial scenario.</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Emergence of IoT:</b> Introduction, Evolution of IoT, Enabling IoT and the Complex Interdependence of Technologies, IoT Networking Components, Addressing Strategies in IoT.			
<b>Textbook 1: Chapter 4 – 4.1 to 4.5</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Problem based learning		
<b>Module-2</b>			
<b>IoT Sensing and Actuation:</b> Introduction, Sensors, Sensor Characteristics, Sensorial Deviations, Sensing Types, Sensing Considerations, Actuators, Actuator Types, Actuator Characteristics.			
<b>Textbook 1: Chapter 5 – 5.1 to 5.9</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration		
<b>Module-3</b>			
<b>IoT Processing Topologies and Types:</b> Data Format, Importance of Processing in IoT, Processing Topologies, IoT Device Design and Selection Considerations, Processing Offloading.			

<b>Textbook 1: Chapter 6 – 6.1 to 6.5</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration
<b>Module-4</b>	
<b>IoT Connectivity Technologies:</b> Introduction, IEEE 802.15.4, Zigbee, Thread, ISA100.11A, WirelessHART, RFID, NFC, DASH7, Z-Wave, Weightless, Sigfox, LoRa, NB-IoT, Wi-Fi, Bluetooth	
<b>Textbook 1: Chapter 7 – 7.1 to 7.16</b>	
<b>Teaching-Learning Process</b>	Chalk & board, Problem based learning
<b>Module-5</b>	
<b>IoT Communication Technologies:</b> Introduction, Infrastructure Protocols, Discovery Protocols, Data Protocols, Identification Protocols, Device Management, Semantic Protocols	
<b>IoT Interoperability:</b> Introduction, Taxonomy of interoperability, Standards, Frameworks	
<b>Textbook 1: Chapter 8 – 8.1, 6.2, 8.3, 8.4, 8.5, 8.6, .7</b>	
<b>Textbook 1: Chapter 9 – 9.1, 9.2, 9.3</b>	
<b>Teaching-Learning Process</b>	Chalk and board, MOOC
<b>Course Outcomes</b>	
At the end of the course the student will be able to:	
CO 1. Understand the evolution of IoT, IoT networking components, and addressing strategies in IoT.	
CO 2. Analyze various sensing devices and actuator types.	
CO 3. Demonstrate the processing in IoT.	
CO 4. Apply different connectivity technologies.	
CO 5. Understand the communication technologies , protocols and interoperability in IoT.	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 35% (18 Marks out of 50)in the semester-end examination(SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>CIE for the theory component of IPCC</b>	
Two Tests each of <b>20 Marks (duration 01 hour)</b>	
<ul style="list-style-type: none"> <li>• First test at the end of 5<sup>th</sup> week of the semester</li> <li>• Second test at the end of the 10<sup>th</sup> week of the semester</li> </ul>	
Two assignments each of <b>10 Marks</b>	
<ul style="list-style-type: none"> <li>• First assignment at the end of 4<sup>th</sup> week of the semester</li> <li>• Second assignment at the end of 9<sup>th</sup> week of the semester</li> </ul>	
Scaled-down marks of two tests and two assignments added will be CIE marks for the theory component of IPCC for <b>30 marks</b> .	
<b>CIE for the practical component of IPCC</b>	
<ul style="list-style-type: none"> <li>• On completion of every experiment/program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day. The<b>15 marks</b> are for conducting the experiment and preparation of the laboratory record, the other <b>05 marks shall be for the test</b> conducted at the end of the semester.</li> <li>• The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to 15 marks.</li> <li>• The laboratory test (<b>duration 02/03 hours</b>) at the end of the 15<sup>th</sup> week of the semester /after completion of all the experiments (whichever is early) shall be conducted for 50 marks and scaled down to 05 marks.</li> </ul>	

Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **20 marks**.

**SEE for IPCC**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (duration 03 hours)

3. The question paper will have ten questions. Each question is set for 20 marks. Marks scored shall be proportionally scaled down to 50 Marks
4. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
5. The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be proportionally reduced to 50 marks

**The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper shall include questions from the practical component).**

- The minimum marks to be secured in CIE to appear for SEE shall be the 12 (40% of maximum marks-30) in the theory component and 08 (40% of maximum marks -20) in the practical component. The laboratory component of the IPCC shall be for CIE only. However, in SEE, the questions from the laboratory component shall be included. The maximum of 04/05 questions to be set from the practical component of IPCC, the total marks of all questions should not be more than the 20 marks.

SEE will be conducted for 100 marks and students shall secure 35% of the maximum marks to qualify in the SEE. Marks scored out of 100 shall be proportionally reduced to 50 marks

## VI Semester

<b>CLOUD COMPUTING AND ITS APPLICATIONS</b>			
Course Code	<b>21IC63</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Objectives:</b>			
CLO 1. Interpret the data in the context of cloud computing.			
CLO 2. Identify an appropriate method to analyze the data in cloud environment			
CLO 3. Understanding of virtualization concept			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes.			
<ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyse information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
Introduction, Cloud Infrastructure: Cloud computing, Cloud computing delivery models and services, Ethical issues, Cloud vulnerabilities, Cloud computing at Amazon, Cloud computing the Google perspective, Microsoft Windows Azure and online services, Open-source software platforms for private clouds, Cloud storage diversity and vendor lock-in, Energy use and ecological impact, Service level agreements, Exercises and problems.			
<b>Textbook 1: Chapter 1 ( 1.3-1.6), Chapter 3 (3.1-3.5, 3.7,3.8)</b>			
<b>Teaching-Learning Process</b>	Chalk&board,Active Learning Virtual Lab		
<b>Module-2</b>			
Cloud Computing: Application Paradigms.: Challenges of cloud computing, Architectural styles of cloud computing, Workflows: Coordination of multiple activities, Coordination based on a state machine model: The Zookeeper, The Map Reduce programming model, A case study: The Gre The Web application, Cloud for science and engineering, High-performance computing on a cloud, Cloud computing for Biology research, Social computing, digital content and cloud computing.			
<b>Textbook 1: Chapter 4 (4.1-4.11)</b>			
<b>Teaching-Learning Process</b>	Chalk & board, Active Learning, Problem based learning Virtual Lab:		
<b>Module-3</b>			

<p>Cloud Resource Virtualization: Virtualization, Layering and virtualization, Virtual machine monitors, Virtual Machines, Performance and Security Isolation, Full virtualization and paravirtualization, Hardware support for virtualization, Case Study: Xen a VMM based paravirtualization, Optimization of network virtualization, vBlades, Performance comparison of virtual machines, The dark side of virtualization, Exercises and problems</p> <p><b>Textbook 1: Chapter 5 (5.1-5.9, 5.11,5.12,5.16)</b></p>	
<b>Teaching-Learning Process</b>	Chalk & board, MOOC, Active Learning
<b>Module-4</b>	
<p>Cloud Resource Management and Scheduling: Policies and mechanisms for resource management, Application of control theory to task scheduling on a cloud, Stability of a two-level resource allocation architecture, Feedback control based on dynamic thresholds, Coordination of specialized autonomic performance managers, A utility-based model for cloud-based Web services, Resourcing bundling: Combinatorial auctions for cloud resources, Scheduling algorithms for computing clouds, Fair queuing, Start-time fair queuing, Borrowed virtual time, Cloud scheduling subject to deadlines, Scheduling MapReduce applications subject to deadlines, Resource management and dynamic scaling, Exercises and problems.</p> <p><b>Textbook1: Chapter 6 (6.1-6.14, 6.16)</b></p>	
<b>Teaching-Learning Process</b>	Chalk& board, Problem based learning Lab practice for OpenCV for basic geometric objects and basic image operation
<b>Module-5</b>	
<p>Cloud Security, Cloud Application Development: Cloud security risks, Security: The top concern for cloud users, Privacy and privacy impact assessment, Trust, Operating system security, Virtual machine Security, Security of virtualization, Security risks posed by shared images, Security risks posed by a management OS, A trusted virtual machine monitor, Amazon web services: EC2 instances, Connecting clients to cloud instances through firewalls, Security rules for application and transport layer protocols in EC2, How to launch an EC2 Linux instance and connect to it, How to use S3 in java</p> <p><b>Textbook1: Chapter 9 (9.1-9.9, 11.1-11.5)</b></p>	
<b>Teaching-Learning Process</b>	Chalk & board, MOOC Lab practice on image processing. Virtual Lab:
<p><b>Course Outcomes:</b> At the end of the course the student will be able to:</p> <ul style="list-style-type: none"> <li>CO 1. Understand the concepts of cloud computing, virtualization and classify services of cloud computing</li> <li>CO 2. Illustrate architecture and programming in cloud</li> <li>CO 3. Define the platforms for development of cloud applications and List the application of cloud.</li> </ul>	
<p><b>Assessment Details (both CIE and SEE)</b> The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 35% (18 Marks out of 50)in the semester-end examination(SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.</p> <p><b>Continuous Internal Evaluation:</b></p>	

Three Unit Tests each of **20 Marks (duration 01 hour)**

1. First test at the end of 5<sup>th</sup> week of the semester
2. Second test at the end of the 10<sup>th</sup> week of the semester
3. Third test at the end of the 15<sup>th</sup> week of the semester

Two assignments each of **10 Marks**

4. First assignment at the end of 4<sup>th</sup> week of the semester
5. Second assignment at the end of 9<sup>th</sup> week of the semester

Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for **20 Marks (duration 01 hours)**

6. At the end of the 13<sup>th</sup> week of the semester

The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be **scaled down to 50 marks**

(To have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

3. The question paper will have ten questions. Each question is set for 20 marks.
4. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Suggested Learning Resources:**

<b>Module-1</b>			
<p><b>Why Agile?</b> : Understanding Success, Beyond Deadlines, The Importance of Organizational Success, Enter Agility, How to Be Agile?: Agile Methods, Don't Make Your Own Method, The Road to Mastery, Find a Mentor.</p> <p>The Genesis of Agile, Introduction and background, Agile Manifesto, and Principles, Simple Design, User Stories, Agile Testing, Agile Tools</p> <p><b>Textbook 1: Part I – Ch 1, Ch 2.</b></p> <p><b>Textbook 2: Ch 1</b></p>			
<b>Teaching-Learning Process</b>	<p>Chalk and board, Active Learning</p> <p><a href="https://www.nptelvideos.com/video.php?id=904">https://www.nptelvideos.com/video.php?id=904</a>  <a href="https://www.youtube.com/watch?v=x90kIAFGYKE">https://www.youtube.com/watch?v=x90kIAFGYKE</a>  <a href="http://www.digimat.in/nptel/courses/video/110104073/L02.html">http://www.digimat.in/nptel/courses/video/110104073/L02.html</a>  <a href="https://onlinecourses.nptel.ac.in/noc19_mg30/preview">https://onlinecourses.nptel.ac.in/noc19_mg30/preview</a></p>		
<b>Module-2</b>			
Understanding XP: The XP Lifecycle, The XP Team, XP Concepts, Adopting XP: Is XP Right for Us?, Go!,			

Assess Your Agility	
Overview of Extreme Programming, The Practices of Extreme Programming, Conclusion, Bibliography, Planning Initial Exploration, Release Planning, Iteration Planning, Defining "Done", Task Planning Iterating, Tracking.	
<b>Textbook 1: Part I: Ch 3, Ch 4.</b>	
<b>Textbook 3: Section 1: Ch 1</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning  <a href="https://www.nptelvideos.com/video.php?id=904">https://www.nptelvideos.com/video.php?id=904</a> <a href="https://www.youtube.com/watch?v=x90kIAFGYKE">https://www.youtube.com/watch?v=x90kIAFGYKE</a> <a href="http://www.digimat.in/nptel/courses/video/110104073/L02.html">http://www.digimat.in/nptel/courses/video/110104073/L02.html</a> <a href="https://onlinecourses.nptel.ac.in/noc19_mg30/preview">https://onlinecourses.nptel.ac.in/noc19_mg30/preview</a>
<b>Module-3</b>	
<b>Practicing XP:</b> Thinking: Pair Programming, Energized Work, Informative Workspace, Root Cause Analysis, Retrospectives,	
<b>Collaborating:</b> Trust, Sit Together, Real Customer Involvement, Ubiquitous Language, Stand-Up Meetings, Coding Standards, Iteration Demo, Reporting,	
<b>Releasing:</b> "Done Done", No Bugs, Version Control, Ten-Minute Build, Continuous Integration, Collective Code Ownership, Documentation. <b>Planning:</b> Vision, Release Planning, The Planning Game, Risk Management, Iteration Planning, Slack, Stories, Estimating. <b>Developing:</b> Incremental requirements, Customer Tests, Test-Driven Development, Refactoring, Simple Design, Incremental Design and Architecture, Spike Solutions, Performance Optimization, Exploratory Testing	
<b>Textbook 1: Part II: Ch 5, Ch 6, Ch 7, Ch 8, Ch 9.</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Demonstration  <a href="https://www.nptelvideos.com/video.php?id=904">https://www.nptelvideos.com/video.php?id=904</a> <a href="https://www.youtube.com/watch?v=x90kIAFGYKE">https://www.youtube.com/watch?v=x90kIAFGYKE</a> <a href="http://www.digimat.in/nptel/courses/video/110104073/L02.html">http://www.digimat.in/nptel/courses/video/110104073/L02.html</a> <a href="https://onlinecourses.nptel.ac.in/noc19_mg30/preview">https://onlinecourses.nptel.ac.in/noc19_mg30/preview</a>
<b>Module-4</b>	
<b>Mastering Agility :</b> Values and Principles: Commonalities, About Values, Principles, and Practices, Further Reading, Improve the Process: Understand Your Project, Tune and Adapt, Break the Rules, Rely on People :Build Effective Relationships, Let the Right People Do the Right Things, Build the Process for the People, Eliminate Waste :Work in Small, Reversible Steps, Fail Fast, Maximize Work Not Done, Pursue Throughput	
<b>Textbook 1: Part III- Ch 10, Ch 11, Ch 12, Ch 13.</b>	
<b>Teaching-Learning Process</b>	Chalk and board  <a href="https://www.nptelvideos.com/video.php?id=904">https://www.nptelvideos.com/video.php?id=904</a> <a href="https://www.youtube.com/watch?v=x90kIAFGYKE">https://www.youtube.com/watch?v=x90kIAFGYKE</a> <a href="http://www.digimat.in/nptel/courses/video/110104073/L02.html">http://www.digimat.in/nptel/courses/video/110104073/L02.html</a> <a href="https://onlinecourses.nptel.ac.in/noc19_mg30/preview">https://onlinecourses.nptel.ac.in/noc19_mg30/preview</a>
<b>Module-5</b>	
<b>Deliver Value:</b> Exploit Your Agility, Only Releasable Code Has Value, Deliver Business Results, Deliver Frequently, Seek Technical Excellence: Software Doesn't Exist, Design Is for Understanding, Design Trade-offs, Quality with a Name, Great Design, Universal Design Principles, Principles in Practice, Pursue Mastery	

<b>Textbook 1: Part IV- Ch 14, Ch 15.</b>	
<b>Teaching-Learning Process</b>	Chalk and board <a href="https://www.nptelvideos.com/video.php?id=904">https://www.nptelvideos.com/video.php?id=904</a> <a href="https://www.youtube.com/watch?v=x90kIAFGYKE">https://www.youtube.com/watch?v=x90kIAFGYKE</a> <a href="http://www.digimat.in/nptel/courses/video/110104073/L02.html">http://www.digimat.in/nptel/courses/video/110104073/L02.html</a> <a href="https://onlinecourses.nptel.ac.in/noc19_mg30/preview">https://onlinecourses.nptel.ac.in/noc19_mg30/preview</a>
<b>Course outcome (Course Skill Set)</b>	
At the end of the course the student will be able to:	
CO 1. Understand the fundamentals of agile technologies	
CO 2. Explain XP Lifecycle, XP Concepts and Adopting XP	
CO 3. Apply different techniques on Practicing XP, Collaborating and Releasing	
CO 4. Analyze the Values and Principles of Mastering Agility	
CO 5. Demonstrate the agility to deliver good values	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
<ol style="list-style-type: none"> <li>1. First test at the end of 5<sup>th</sup> week of the semester</li> <li>2. Second test at the end of the 10<sup>th</sup> week of the semester</li> <li>3. Third test at the end of the 15<sup>th</sup> week of the semester</li> </ol>	
Two assignments each of <b>10 Marks</b>	
<ol style="list-style-type: none"> <li>4. First assignment at the end of 4<sup>th</sup> week of the semester</li> <li>5. Second assignment at the end of 9<sup>th</sup> week of the semester</li> </ol>	
Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b>	
<ol style="list-style-type: none"> <li>6. At the end of the 13<sup>th</sup> week of the semester</li> </ol>	
The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b>	
(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).	
<b>CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.</b>	
<b>Semester End Examination:</b>	
Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject ( <b>duration 03 hours</b> )	
<ol style="list-style-type: none"> <li>1. The question paper will have ten questions. Each question is set for 20 marks.</li> <li>2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), <b>should have a mix of topics</b> under that module.</li> </ol>	

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Suggested Learning Resources:**

**Textbooks**

1. James Shore, Chromatic, O'Reilly, The Art of Agile Development, 2007

**Reference Books**

1. Ken Schwaber, Mike Beedle, "Agile Software Development with Scrum", Pearson, 2008
2. Agile-Principles-Patterns-and-Practices-in-C by Robert C Martin & Mic Martin.

**Weblinks and Video Lectures (e-Resources):**

Model wise mentioned

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Demonstration of the project based on Agile technologies.

## VI Semester

<b>ADVANCED JAVA PROGRAMMING</b>			
Course Code	21CS642	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
<p>CLO 1. Understanding the fundamental concepts of Enumerations and Annotations</p> <p>CLO 2. Apply the concepts of Generic classes in Java programs</p> <p>CLO 3. Demonstrate the fundamental concepts of String operations</p> <p>CLO 4. Design and develop web applications using Java servlets and JSP</p> <p>CLO 5. Apply database interaction through Java database Connectivity</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>Use of Video/Animation to explain functioning of various concepts.</li> <li>Encourage collaborative (Group Learning) Learning in the class.</li> <li>Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>Introduce Topics in manifold representations.</li> <li>Show the different ways to solve the same program</li> <li>Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Enumerations, Autoboxing and Annotations:</b>			
<p>Enumerations, Enumeration fundamentals, the values() and valueOf() methods, Java enumerations are class types, enumerations inherits Enum, example, type wrappers, Autoboxing, Autoboxing methods, Autoboxing/Unboxing occurs in Expressions, Autoboxing/Unboxing, Boolean and character values, Autoboxing/Unboxing helps prevent errors, A word of warning</p> <p>Annotations, Annotation basics, specifying retention policy, obtaining annotations at run time by use of reflection, Annotated element interface, Using default values, Marker Annotations, Single member annotations, Built in annotations</p>			
<b>Textbook 1: Chapter12</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Online demonstration, Problem based learning		
<b>Module-2</b>			
<b>Generics:</b> What are Generics, A Simple Generics Example, A Generic Class with Two Type Parameters, The General Form of a Generic Class, Bounded Types, Using Wildcard Arguments, Bounded Wildcards, Creating a Generic Method, Generic Interfaces, Raw types and Legacy code, Generic Class Hierarchies, Erasure, Ambiguity errors, Some Generic Restrictions			
<b>Textbook 1: Chapter 14</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Online Demonstration		
<b>Module-3</b>			
<b>String Handling:</b> The String Constructors, String Length, Special String Operations, Character Extraction,			

String Comparison, Searching Strings, Modifying a String, Data Conversion Using valueOf(), Changing the case of characters within a String, String Buffer, String Builder

**Textbook 1: Chapter 15**

<b>Teaching-Learning Process</b>	Chalk and board, Online Demonstration
----------------------------------	---------------------------------------

**Module-4**

Background; The life cycle of a servlet; A simple servlet; the servlet API; The javax.servlet package Reading servlet parameter; the javax.servlet.http package; Handling HTTP Requests and Responses; using Cookies; Session Tracking, Java Server Pages (JSP); JSP tags, Variables and Objects, Methods, Control statements, Loops, Request String, Parsing other information, User sessions, Cookies, Session Objects

**Textbook 1: Chapter 31**

**Textbook 2: Chapter 11**

<b>Teaching-Learning Process</b>	Chalk and board, Online Demonstration
----------------------------------	---------------------------------------

**Module-5**

The concept of JDBC; JDBC Driver Types; JDBC packages; A brief overview of the JDBC Process; Database Connection; Associating the JDBC/ODBC Bridge with the Database; Statement Objects; ResultSet; Transaction Processing; Metadata, Data Types; Exceptions.

**Textbook 2: Chapter 6**

<b>Teaching-Learning Process</b>	Chalk and board, Online Demonstration
----------------------------------	---------------------------------------

**Course Outcomes**

At the end of the course the student will be able to:

- CO 1. Understanding the fundamental concepts of Enumerations and Annotations
- CO 2. Apply the concepts of Generic classes in Java programs
- CO 3. Demonstrate the concepts of String operations in Java
- CO 4. Develop web based applications using Java servlets and JSP
- CO 5. Illustrate database interaction and transaction processing in Java

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous Internal Evaluation:**

Three Unit Tests each of **20 Marks (duration 01 hour)**

1. First test at the end of 5<sup>th</sup> week of the semester
2. Second test at the end of the 10<sup>th</sup> week of the semester
3. Third test at the end of the 15<sup>th</sup> week of the semester

Two assignments each of **10 Marks**

4. First assignment at the end of 4<sup>th</sup> week of the semester
5. Second assignment at the end of 9<sup>th</sup> week of the semester

Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for **20 Marks (duration 01 hours)**

6. At the end of the 13<sup>th</sup> week of the semester

The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be **scaled down to 50 marks**

(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Suggested Learning Resources:**

**Textbooks**

1. Herbert Schildt: JAVA the Complete Reference. 9<sup>th</sup> Edition, Tata McGraw-Hill
2. Jim Keogh, The Complete Reference J2EE, Tata McGraw-Hill

**Reference Books:**

1. Y. Daniel Liang: Introduction to JAVA Programming, 7<sup>th</sup> Edition, Pearson Education, 2007.

2. <https://nptel.ac.in/courses/106/105/106105225/>

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Programming exercises

## VI Semester

<b>ADVANCED COMPUTER ARCHITECTURE</b>			
Course Code	21CS643	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
<p>CLO 1. Describe computer architecture.</p> <p>CLO 2. Measure the performance of architectures in terms of right parameters.</p> <p>CLO 3. Summarize parallel architecture and the software used for them</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same program</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<p>Theory of Parallelism: Parallel Computer Models, The State of Computing, Multiprocessors and Multicomputer, Multivector and SIMD Computers, PRAM and VLSI Models, Program and Network Properties, Conditions of Parallelism, Program Partitioning and Scheduling, Program Flow Mechanisms, System Interconnect Architectures, Principles of Scalable Performance, Performance Metrics and Measures, Parallel Processing Applications, Speedup Performance Laws. For all Algorithm or mechanism any one example is sufficient.</p> <p><b>Chapter 1 (1.1to 1.4), Chapter 2( 2.1 to 2.4) Chapter 3 (3.1 to 3.3)</b></p>			
<b>Teaching-Learning Process</b>	Chalk and board, Online demonstration, Problem based learning		
<b>Module-2</b>			
<p>Hardware Technologies 1: Processors and Memory Hierarchy, Advanced Processor Technology, Superscalar and Vector Processors, Memory Hierarchy Technology, Virtual Memory Technology. For all Algorithms or mechanisms any one example is sufficient.</p> <p><b>Chapter 4 ( 4.1 to 4.4)</b></p>			
<b>Teaching-Learning Process</b>	Chalk and board, Online Demonstration		
<b>Module-3</b>			
<p>Hardware Technologies 2: Bus Systems, Cache Memory Organizations, Shared Memory Organizations, Sequential and Weak Consistency Models, Pipelining and Superscalar Techniques, Linear Pipeline Processors, Nonlinear Pipeline Processors. For all Algorithms or mechanisms any one example is sufficient.</p>			

<b>Chapter 5 (5.1 to 5.4) Chapter 6 (6.1 to 6.2)</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Online Demonstration
<b>Module-4</b>	
Parallel and Scalable Architectures: Multiprocessors and Multicomputers, Multiprocessor System Interconnects, Cache Coherence and Synchronization Mechanisms, Message-Passing Mechanisms, Multivector and SIMD Computers, Vector Processing Principles, Multivector Multiprocessors, Compound Vector Processing, Scalable, Multithreaded, and Dataflow Architectures, Latency-Hiding Techniques, Principles of Multithreading, Fine- Grain Multicomputers. For all Algorithms or mechanisms any one example is sufficient.	
<b>Chapter 7 (7.1,7.2 and 7.4) Chapter 8( 8.1 to 8.3) Chapter 9(9.1 to 9.3)</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Online Demonstration
<b>Module-5</b>	
Software for parallel programming: Parallel Models, Languages, and Compilers ,Parallel Programming Models, Parallel Languages and Compilers, Dependence Analysis of Data Arrays. Instruction and System Level Parallelism, Instruction Level Parallelism, Computer Architecture, Contents, Basic Design Issues, Problem Definition, Model of a Typical Processor, Compiler-detected Instruction Level Parallelism ,Operand Forwarding ,Reorder Buffer, Register Renaming ,Tomasulo's Algorithm. For all Algorithms or mechanisms any one example is sufficient.	
<b>Chapter 10(10.1 to 10.3) Chapter 12( 12.1 to 12.9)</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Online Demonstration
<b>Course Outcomes</b>	
At the end of the course the student will be able to:	
<ul style="list-style-type: none"> <li>CO 1. Explain the concepts of parallel computing</li> <li>CO 2. Explain and identify the hardware technologies</li> <li>CO 3. Compare and contrast the parallel architectures</li> <li>CO 4. Illustrate parallel programming concepts</li> </ul>	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
<ul style="list-style-type: none"> <li>1. First test at the end of 5<sup>th</sup> week of the semester</li> <li>2. Second test at the end of the 10<sup>th</sup> week of the semester</li> <li>3. Third test at the end of the 15<sup>th</sup> week of the semester</li> </ul>	
Two assignments each of <b>10 Marks</b>	
<ul style="list-style-type: none"> <li>4. First assignment at the end of 4<sup>th</sup> week of the semester</li> <li>5. Second assignment at the end of 9<sup>th</sup> week of the semester</li> </ul>	
Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b>	
<ul style="list-style-type: none"> <li>6. At the end of the 13<sup>th</sup> week of the semester</li> </ul>	
The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b>	
(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).	
<b>CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy</b>	

**as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

## VI Semester

<b>DATA SCIENCE AND VISUALIZATION</b>			
Course Code	21CS644	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
<p>CLO 1. To introduce data collection and pre-processing techniques for data science</p> <p>CLO 2. Explore analytical methods for solving real life problems through data exploration techniques</p> <p>CLO 3. Illustrate different types of data and its visualization</p> <p>CLO 4. Find different data visualization techniques and tools</p> <p>CLO 5. Design and mapelement of visualization well to perceive information</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Introduction to Data Science</b>			
<p><b>Introduction:</b> What is Data Science? Big Data and Data Science hype – and getting past the hype, Whynow? – Datafication, Current landscape of perspectives, Skill sets. Needed Statistical Inference:Populationsandsamples,Statisticalmodelling,probabilitydistributions,fittingamodel.</p>			
<b>Textbook 1: Chapter 1</b>			
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. PPT – Recognizing different types of data, Data science process</li> <li>2. Demonstration of different steps, learning definition and relation with data science</li> </ol>		
<b>Module-2</b>			
<b>Exploratory Data Analysis and the Data Science Process</b>			
<p>Basic tools (plots, graphs and summarystatistics)ofEDA,PhilosophyofEDA, TheDataScienceProcess,CaseStudy:Real Direct(onlinerealestatefirm).ThreeBasicMachineLearningAlgorithms:LinearRegression,k-NearestNeighbours(k-NN),k-means.</p>			
<b>Textbook 1: Chapter 2, Chapter 3</b>			
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. PPT –Plots, Graphs, Summary Statistics</li> </ol>		

	2. Demonstration of Machine Learning Algorithms
<b>Module-3</b>	
<b>Feature Generation and Feature Selection</b>	
Extracting Meaning from Data: Motivating application: user (customer) retention. Feature Generation (brainstorming, role of domain expertise, and place for imagination), Feature Selection algorithms. Filters; Wrappers; Decision Trees; Random Forests. Recommendation Systems: Building a User-Facing Data Product, Algorithmic ingredients of a Recommendation Engine, Dimensionality Reduction, Singular Value Decomposition, Principal Component Analysis, Exercise: build your own recommendation system.	
<b>Textbook 1: Chapter 6</b>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. PPT – Feature generation, selection</li> <li>2. Demonstration recommendation engine</li> </ol>
<b>Module-4</b>	
<b>Data Visualization and Data Exploration</b>	
<b>Introduction:</b> Data Visualization, Importance of Data Visualization, Data Wrangling, Tools and Libraries for Visualization	
<b>Comparison Plots:</b> Line Chart, Bar Chart and Radar Chart; <b>Relation Plots:</b> Scatter Plot, Bubble Plot, Correlogram and Heatmap; <b>Composition Plots:</b> Pie Chart, Stacked Bar Chart, Stacked Area Chart, Venn Diagram; <b>Distribution Plots:</b> Histogram, Density Plot, Box Plot, Violin Plot; <b>Geo Plots:</b> Dot Map, Choropleth Map, Connection Map; What Makes a Good Visualization?	
<b>Textbook 2: Chapter 1, Chapter 2</b>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Demonstration of different data visualization tools.</li> </ol>
<b>Module-5</b>	
<b>A Deep Dive into Matplotlib</b>	
Introduction, Overview of Plots in Matplotlib, <b>Pyplot Basics:</b> Creating Figures, Closing Figures, Format Strings, Plotting, Plotting Using pandas DataFrames, Displaying Figures, Saving Figures; <b>Basic Text and Legend Functions:</b> Labels, Titles, Text, Annotations, Legends; <b>Basic Plots:</b> Bar Chart, Pie Chart, Stacked Bar Chart, Stacked Area Chart, Histogram, Box Plot, Scatter Plot, Bubble Plot; <b>Layouts:</b> Subplots, Tight Layout, Radar Charts, GridSpec; <b>Images:</b> Basic Image Operations, Writing Mathematical Expressions	
<b>Textbook 2: Chapter 3</b>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. PPT – Comparison of plots</li> <li>2. Demonstration charts</li> </ol>
<b>Course Outcomes</b>	
At the end of the course the student will be able to:	
CO 1. Understand the data in different forms	
CO 2. Apply different techniques to Explore Data Analysis and the Data Science Process	
CO 3. Analyze feature selection algorithms & design a recommender system.	
CO 4. Evaluate data visualization tools and libraries and plot graphs.	
CO 5. Develop different charts and include mathematical expressions.	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	

**Continuous Internal Evaluation:**

Three Unit Tests each of **20 Marks (duration 01 hour)**

1. First test at the end of 5<sup>th</sup> week of the semester
2. Second test at the end of the 10<sup>th</sup> week of the semester
3. Third test at the end of the 15<sup>th</sup> week of the semester

Two assignments each of **10 Marks**

4. First assignment at the end of 4<sup>th</sup> week of the semester
5. Second assignment at the end of 9<sup>th</sup> week of the semester

Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for **20 Marks (duration 01 hours)**

6. At the end of the 13<sup>th</sup> week of the semester

The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be **scaled down to 50 marks**

(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module Marks scored out of 100 shall be reduced proportionally to 50 marks

**Suggested Learning Resources:****Textbooks**

Demonstration using projects

## VI Semester

<b>INTRODUCTION TO DATA STRUCTURES</b>			
Course Code	21CS651	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
<p>CLO 1. Introduce elementary data structures.</p> <p>CLO 2. Analyze Linear Data Structures: Stack, Queues, Lists</p> <p>CLO 3. Analyze Non Linear Data Structures: Trees</p> <p>CLO 4. Assess appropriate data structure during program development/Problem Solving.</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>Use of Video/Animation to explain functioning of various concepts.</li> <li>Encourage collaborative (Group Learning) Learning in the class.</li> <li>Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>Introduce Topics in manifold representations.</li> <li>Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> </ol> <p>Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</p>			
<b>Module-1</b>			
<b>Introduction:</b>			
Introduction to arrays: one-dimensional arrays, two dimensional arrays, initializing two dimensional arrays, Multidimensional arrays.			
Introduction to Pointers: Pointer concepts, accessing variables through pointers, Dynamic memory allocation, pointers applications.			
Introduction to structures and unions: Declaring structures, Giving values to members, structure initialization, arrays of structures, nested structure, unions, size of structures.			
<b>Textbook 1: Ch 8.3 to 8.15,Ch 12.3 to 12.19</b>			
<b>Textbook 2:Ch 2.1 to2.13,2.51 ,2.80 to 2.98</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning		
<b>Module-2</b>			
<b>Linear Data Structures-Stacks and queues:</b>			
Introduction, Stack representation in Memory, Stack Operations, Stack Implementation, Applications of Stack. Introduction, Queues-Basic concept, Logical representation of Queues, Queue Operations and its types, Queue Implementation, Applications of Queue.			
<b>Textbook 2: Ch 6.1 to 6.14 ,Ch 8.1,8.2</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Problem Based Learning		
<b>Module-3</b>			
<b>Linear Data Structures-Linked List:</b>			
Introduction, Linked list Basic concept, Logical representation of Linked list, Self-Referential structure, Singly-linked List Operations and Implementation, Circular Linked List, applications of Linked list.			

<b>Textbook 1: Ch 15.1,15.3,15.4,15.8</b>	
<b>Textbook 2: Ch 9.2.9.5</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Problem based learning
<b>Module-4</b>	
<b>Non Linear Data Structures – Trees</b>	
Introduction, Basic concept, Binary Tree and its types, Binary Tree Representation, Binary Tree Traversal, Binary Search tree, Expression Trees.	
<b>Textbook1: Ch 16.1,16.2</b>	
<b>Textbook2:Ch 10.1,10.2,10.4,10.6.3</b>	
<b>Teaching-Learning Process</b>	Chalk& board, Active Learning, Problem based learning
<b>Module-5</b>	
<b>Sorting and Searching</b>	
Sorting: Introduction, Bubble sort, Selection sort, Insertion sort	
Searching: Introduction, Linear search, Binary search.	
<b>Textbook1: Ch 17.1,17.2.2, 17.2.4, 17.3.1,17.3.2</b>	
<b>Textbook2: Ch 11.1.,11.2,11.3,11.7,11.10.1,11.10.2</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Problem based learning
<b>Course Outcomes</b>	
At the end of the course the student will be able to:	
CO 1. Express the fundamentals of static and dynamic data structure.	
CO 2. Summarize the various types of data structure with their operations.	
CO 3. Interpret various searching and sorting techniques.	
CO 4. Choose appropriate data structure in problem solving.	
CO 5. Develop all data structures in a high level language for problem solving.	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
1. First test at the end of 5 <sup>th</sup> week of the semester	
2. Second test at the end of the 10 <sup>th</sup> week of the semester	
3. Third test at the end of the 15 <sup>th</sup> week of the semester	
Two assignments each of <b>10 Marks</b>	
4. First assignment at the end of 4 <sup>th</sup> week of the semester	
5. Second assignment at the end of 9 <sup>th</sup> week of the semester	
Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b>	
6. At the end of the 13 <sup>th</sup> week of the semester	
The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b>	
(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).	
<b>CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.</b>	
<b>Semester End Examination:</b>	
Theory SEE will be conducted by University as per the scheduled timetable, with common question	

<p>papers for the subject (<b>duration 03 hours</b>)</p> <ol style="list-style-type: none"><li>1. The question paper will have ten questions. Each question is set for 20 marks.</li><li>2. There will be 2 questions from each module. ## VI Semester

<b>INTRODUCTION TO DATABASE MANAGEMENT SYSTEMS</b>			
Course Code	21CS652	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
CLO 1. Understand the basic concepts and the applications of database systems.			
CLO 2. Understand the relational database design principles.			
CLO 3. Master the basics of SQL and construct queries using SQL.			
CLO 4. Familiar with the basic issues of transaction processing and concurrency control.			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.			
<ol style="list-style-type: none"> <li>1. Lecturer method (L) need not be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain the functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develops design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Introduction to Databases:</b> Introduction, Characteristics of database approach, Advantages of using the DBMS approach, History of database applications.			
<b>Overview of Database Languages and Architectures:</b> Data Models, Schemas, and Instances. Three schema architecture and data independence, database languages, and interfaces, The Database System environment.			
<b>Conceptual Data Modelling using Entities and Relationships:</b> Entity types, Entity sets, attributes, roles, and structural constraints, Weak entity types, ER diagrams, Examples			
<b>Textbook 1: Ch 1.1 to 1.8, 2.1 to 2.6, 3.1 to 3.7</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Problem based learning		
<b>Module-2</b>			
<b>Relational Model:</b> Relational Model Concepts, Relational Model Constraints and relational database schemas, Update operations, transactions, and dealing with constraint violations.			
<b>Relational Algebra:</b> Relational algebra: introduction, Selection and projection, set operations, renaming, Joins, Division, syntax, semantics. Operators, grouping and ungrouping, relational comparison. Examples of Queries in relational algebra.			
<b>Mapping Conceptual Design into a Logical Design:</b> Relational Database Design using ER-to-Relational mapping.			
<b>Textbook 1: ch5.1 to 5.3, 8.1 to 8.5, 9.1;</b>			

<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration
<b>Module-3</b>	
<p><b>SQL:</b>SQL data definition and data types, specifying constraints in SQL, retrieval queries in SQL, INSERT, DELETE, and UPDATE statements in SQL, Additional features of SQL.</p> <p><b>Advances Queries:</b> More complex SQL retrieval queries, Specifying constraints as assertions and action triggers, Views in SQL, Schema change statements in SQL.Database</p> <p><b>Textbook 1: Ch 6.1 to 6.5, 7.1 to 7.4; Textbook 2: 6.1 to 6.6;</b></p>	
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration
<b>Module-4</b>	
<p><b>Normalization: Database Design Theory</b> - Introduction to Normalization using Functional and Multivalued Dependencies: Informal design guidelines for relation schema, Functional Dependencies, Normal Forms based on Primary Keys, Second and Third Normal Forms, Boyce-Codd Normal Form, Multivalued Dependency and Fourth Normal Form, Join Dependencies and Fifth Normal Form. Examples on normal forms.</p> <p><b>Textbook 1: Ch 14.1 to -14.7, 15.1 to 15.6</b></p>	
<b>Teaching-Learning Process</b>	Chalk& board, Problem based learning
<b>Module-5</b>	
<p><b>Transaction management and Concurrency</b> –Control Transaction management: ACID properties, serializability and concurrency control, Lock based concurrency control (2PL, Deadlocks), Time stamping methods, optimistic methods, database recovery management.</p> <p><b>Textbook 1: Ch 20.1 to 20.6, 21.1 to 21.7;</b></p>	
<b>Teaching-Learning Process</b>	Chalk and board, MOOC
<b>Course Outcomes</b>	
At the end of the course the student will be able to:	
<ul style="list-style-type: none"> <li>CO 1. Identify, analyze and define database objects, enforce integrity constraints on a database using RDBMS</li> <li>CO 2. Use Structured Query Language (SQL) for database manipulation.</li> <li>CO 3. Design and build simple database systems</li> <li>CO 4. Develop application to interact with databases.</li> </ul>	
<b>Assessment Details (both CIE and SEE)</b>	
<p>The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together</p>	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
<ul style="list-style-type: none"> <li>1. First test at the end of 5<sup>th</sup> week of the semester</li> <li>2. Second test at the end of the 10<sup>th</sup> week of the semester</li> <li>3. Third test at the end of the 15<sup>th</sup> week of the semester</li> </ul>	
Two assignments each of <b>10 Marks</b>	
<ul style="list-style-type: none"> <li>4. First assignment at the end of 4<sup>th</sup> week of the semester</li> <li>5. Second assignment at the end of 9<sup>th</sup> week of the semester</li> </ul>	
Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b>	
<ul style="list-style-type: none"> <li>6. At the end of the 13<sup>th</sup> week of the semester</li> </ul>	

The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be **scaled down to 50 marks**

(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Suggested Learning Resources:**

**Textbooks**

1. Fundamentals of Database Systems, RamezElmasri and Shamkant B. Navathe, 7th Edition, 2017, Pearson.
2. Database management systems, Ramakrishnan, and Gehrke, 3rd Edition, 2014, McGraw Hill

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

Real world problem solving: Developing and demonstration of models / projects based on DBMS application

## VI Semester

<b>INTRODUCTION TO CYBER SECURITY</b>			
Course Code	21CS653	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
CLO 1. To familiarize cybercrime terminologies and ACTs			
CLO 2. Understanding cybercrime in mobiles and wireless devices along with the tools for Cybercrime and prevention			
CLO 3. Understand the motive and causes for cybercrime, cybercriminals, and investigators			
CLO 4. Understanding criminal case and evidence, detection standing criminal case and evidence.			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.			
<ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Introduction to Cybercrime:</b>			
<b>Cybercrime:</b> Definition and Origins of the Word, Cybercrime and Information Security, Who are Cybercriminals? Classifications of Cybercrimes,			
<b>Cybercrime:</b> The Legal Perspectives,			
<b>Cybercrimes:</b> An Indian Perspective, Cybercrime and the Indian ITA 2000.			
<b>Textbook1:Ch1 (1.1 to 1.8).</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning		
<b>Module-2</b>			
<b>Cyber offenses:</b>			
<b>How Criminals Plan Them:</b> Introduction, How Criminals Plan the Attacks, Social Engineering, Cyber stalking, Cybercafe and Cybercrimes.			
<b>Botnets:</b> The Fuel for Cybercrime, Attack Vector			
<b>Textbook1: Ch2 (2.1 to 2.7).</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning		
<b>Module-3</b>			
<b>Tools and Methods Used in Cybercrime:</b> Introduction, Proxy Servers and Anonymizers, Phishing, Password Cracking, Key loggers and Spywares, Virus and Worms, Trojan Horses and Backdoors, Steganography, DoS and DDoS Attacks, Attacks on Wireless Networks.			

<b>Textbook1: Ch4 (4.1 to 4.9, 4.12).</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Case studies
<b>Module-4</b>	
<b>Understanding the people on the scene:</b> Introduction, understanding cyber criminals, understanding cyber victims, understanding cyber investigators.	
<b>The Computer Investigation process:</b> investigating computer crime.	
<b>Understanding Cybercrime Prevention:</b> Understanding Network Security Concepts, Understanding Basic Cryptography Concepts, Making the Most of Hardware and Software Security	
<b>Textbook 2:Ch3,Ch 4, Ch 7.</b>	
<b>Teaching-Learning Process</b>	Chalk& board, Case studies
<b>Module-5</b>	
<b>Cybercrime Detection Techniques:</b> Security Auditing and Log Firewall Logs, Reports, Alarms, and Alerts, Commercial Intrusion Detection Systems, Understanding E-Mail Headers Tracing a Domain Name or IP Address.	
<b>Collecting and preserving digital Evidence:</b> Introduction, understanding the role of evidence in a criminal case, collecting digital evidence, preserving digital evidence, recovering digital evidence, documenting evidence.	
<b>TextBook 2:Ch 9, Ch 10.</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Case studies
<b>Course Outcomes</b>	
At the end of the course the student will be able to:	
CO 1. Describe the cyber crime terminologies	
CO 2. Analyze cybercrime in mobiles and wireless devices along with the tools for Cybercrime and prevention	
CO 3. Analyze the motive and causes for cybercrime, cybercriminals, and investigators	
CO 4. Apply the methods for understanding criminal case and evidence, detection standing criminal case and evidence.	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
1. First test at the end of 5 <sup>th</sup> week of the semester	
2. Second test at the end of the 10 <sup>th</sup> week of the semester	
3. Third test at the end of the 15 <sup>th</sup> week of the semester	
Two assignments each of <b>10 Marks</b>	
4. First assignment at the end of 4 <sup>th</sup> week of the semester	
5. Second assignment at the end of 9 <sup>th</sup> week of the semester	
Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b>	
6. At the end of the 13 <sup>th</sup> week of the semester	
The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b>	
(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the	

methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

Real world problem solving: Demonstration of projects related to Cyber security.

## VI Semester

<b>PROGRAMMING IN JAVA</b>			
Course Code	21CS654	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
CLO 1. Learn fundamental features of object oriented language and JAVA.			
CLO 2. To create, debug and run simple Java programs.			
CLO 3. Learn object oriented concepts using programming examples.			
CLO 4. Study the concepts of importing of packages and exception handling mechanism.			
CLO 5. Discuss the String Handling examples with Object Oriented concepts.			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.			
<ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>An Overview of Java:</b> Object-Oriented Programming, A First Simple Program, A Second Short Program, Two Control Statements, Using Blocks of Code, Lexical Issues, The Java Class Libraries.			
<b>Data Types, Variables, and Arrays:</b> Java Is a Strongly Typed Language, The Primitive Types, Integers, Floating-Point Types, Characters, Booleans, A Closer Look at Literals, Variables, Type Conversion and Casting, Automatic Type Promotion in Expressions, Arrays, A Few Words About Strings			
<b>Textbook 1:Ch 2,Ch 3.</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning.		
<b>Module-2</b>			
<b>Operators:</b> Arithmetic Operators, The Bitwise Operators, Relational Operators, Boolean Logical Operators, The Assignment Operator, The ? Operator, Operator Precedence, Using Parentheses,			
<b>Control Statements:</b> Java's Selection Statements, Iteration Statements, Jump Statements.			
<b>Textbook 1:Ch 4,Ch 5.</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration		
<b>Module-3</b>			
<b>Introducing Classes:</b> Class Fundamentals, Declaring Objects, Assigning Object Reference Variables, Introducing Methods, Constructors, The this Keyword, Garbage Collection, The finalize( ) Method, A Stack Class.			
<b>A Closer Look at Methods and Classes:</b> Overloading Methods, Using Objects as Parameters, A Closer			

Look at Argument Passing, Returning Objects, Recursion, Introducing Access Control, Understanding static, Introducing final, Arrays Revisited. <b>Inheritance:</b> Inheritance, Using super, Creating a Multilevel Hierarchy, When Constructors Are Called, Method Overriding.	
<b>Textbook 1: Ch 6, Ch 7.1-7.9, Ch 8.1-8.5</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration
<b>Module-4</b>	
<b>Packages and Interfaces:</b> Packages, Access Protection, Importing Packages, Interfaces.	
<b>Exception Handling:</b> Exception-Handling Fundamentals, Exception Types, Uncaught Exceptions, Using try and catch, Multiple catch Clauses, Nested try Statements, throw, throws, finally, Java's Built-in Exceptions, Creating Your Own Exception Subclasses, Chained Exceptions, Using Exceptions	
<b>Textbook 1: Ch 9, Ch 10.</b>	
<b>Teaching-Learning Process</b>	Chalk & board, Problem based learning, Demonstration
<b>Module-5</b>	
<b>Enumerations :</b> Enumerations, Type Wrappers.	
<b>String Handling:</b> The String Constructors, String Length, Special String Operations, Character Extraction, String Comparison, Searching Strings, Modifying a String, Data Conversion Using valueOf( ), Changing the Case of Characters Within a String, Additional String Methods, StringBuffer, StringBuilder.	
<b>Textbook 1: Ch 12.1, 12.2, Ch 15.</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration
<b>Course Outcomes</b>	
At the end of the course the student will be able to:	
CO 1. Develop JAVA programs using OOP principles and proper program structuring.	
CO 2. Develop JAVA program using packages, inheritance and interface.	
CO 3. Develop JAVA programs to implement error handling techniques using exception handling	
CO 4. Demonstrate string handling concepts using JAVA.	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
1. First test at the end of 5 <sup>th</sup> week of the semester	
2. Second test at the end of the 10 <sup>th</sup> week of the semester	
3. Third test at the end of the 15 <sup>th</sup> week of the semester	
Two assignments each of <b>10 Marks</b>	
4. First assignment at the end of 4 <sup>th</sup> week of the semester	
5. Second assignment at the end of 9 <sup>th</sup> week of the semester	
Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b>	
6. At the end of the 13 <sup>th</sup> week of the semester	
The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b>	
(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).	
<b>CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.</b>	

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Suggested Learning Resources:****Textbooks**

1. Herbert Schildt, Java The Complete Reference, 7th Edition, Tata McGraw Hill, 2007. (Chapters 2, 3, 4, 5, 6,7, 8, 9,10, 12,15)

## VI Semester

<b>CLOUD COMPUTING LABORATORY</b>			
Course Code	21ICL66	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2:0	SEE Marks	50
Total Hours of Pedagogy	24	Total Marks	100
Credits	1	Exam Hours	03
<b>Course Objectives:</b>			
CLO 1: Demonstrate the tools used and develop applications in cloud			
<b>Sl. No.</b>	<b>Instructions</b>		
	<ul style="list-style-type: none"> <li>lab Experiments need access to Amazon Web Services/ Google Cloud Platform. The Experiments cover all the aspects such as IAAS,PAAS and SAAS of Cloud.</li> </ul>		
	<b>PART A</b>		
	<b>List of problems for which student should develop program and execute in the Laboratory using OpenGL/openCV/ Python</b>		
1.	Installation of various hypervisors and instantiation of VMs with image file using open source hypervisors such as Virtual Box, VMWare Player, Xen and KVM.		
2.	Create and Launch Virtual Machines in Amazon Web Services and Google App Engine. Access Windows Server using RDP and Linux Instances using Putty/ssh.		
3.	Develop the Storage Services Using Buckets and EBS in Amazon Web Services.		
4.	Write a Google app engine program to generate n even numbers and deploy it to Google cloud.		
5.	Develop a Virtual Private Cloud using AWS/GCP Platform.		
6.	Demonstrate Cloud Database Services in AWS/GCP		
7.	Working in Codenvy to demonstrate Provisioning and Scaling of a website.		
	<b>PART B</b>		
	<b>Practical Based Learning</b>		
	Student should develop mini project on an application.		
<b>Course Outcome (Course Skill Set)</b>			
At the end of the course the student will be able to:			
CO 1. Demonstrate the use of development tools for cloud			
CO 2. Develop applications for cloud using online services			
<b>Assessment Details (both CIE and SEE)</b>			
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. The student has to secure not less than 35% (18 Marks out of 50) in the semester-end examination (SEE).			
<b>Continuous Internal Evaluation (CIE):</b>			
CIE marks for the practical course is <b>50 Marks</b> .			
The split-up of CIE marks for record/ journal and test are in the ratio <b>60:40</b> .			
<ul style="list-style-type: none"> <li>Each experiment to be evaluated for conduction with observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments designed by the faculty who is handling the laboratory session and is made known to students at the beginning of the practical session.</li> <li>Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.</li> <li>Total marks scored by the students are scaled down to 30 marks (60% of maximum marks).</li> </ul>			

- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct 02 tests for 100 marks, the first test shall be conducted after the 8<sup>th</sup> week of the semester and the second test shall be conducted after the 14<sup>th</sup> week of the semester.
- In each test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability. Rubrics suggested in Annexure-II of Regulation book
- The average of 02 tests is scaled down to **20 marks** (40% of the maximum marks).  
The Sum of scaled-down marks scored in the report write-up/journal and average marks of two tests is the total CIE marks scored by the student.

**Semester End Evaluation (SEE):**

- SEE marks for the practical course is 50 Marks.
- SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the University
- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.
- Students can pick one question (experiment) from the questions lot prepared by the internal /external examiners jointly.
- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.
- General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)
- Students can pick one experiment from the questions lot of PART A with equal choice to all the students in a batch.
- **PART B** : Student should develop a mini project and it should be demonstrated in the laboratory examination (with report and presentation).
- Weightage of marks for **PART A is 60%** and for **PART B is 40%**. General rubrics suggested to be followed for part A and part B.
- Change of experiment is allowed only once (in part A) and marks allotted to the procedure part to be made zero.
- The duration of SEE is 03 hours.

<b>Module-1</b>			
<b>Introduction</b> , What Is Bitcoin? History of Bitcoin, Bitcoin Uses, Users, and Their Stories, Getting Started			
<b>How Bitcoin Works:</b> Transactions, Blocks, Miningm and the blockchain. Bitcoin transactions, Constructing a Transaction, Bitcoin mining, Mining transactions in Blocks, Spending the transactions"			
<b>Textbook1: Chapter 1,2</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Problem based learning		
<b>Module-2</b>			
<b>Bitcoin Core:</b> The Reference Implementation: Bitcoin Development Environment, Compiling Bitcoin Core from the Source Code, Selecting a Bitcoin Core Release, Configuring the Bitcoin Core Build, Building the Bitcoin Core Executables, Running a Bitcoin Core Node, Running Bitcoin Core for the First Time, Configuring the Bitcoin Core Node, Bitcoin Core Application Programming Interface (API), Getting Information on the Bitcoin Core Client Status, Exploring and Decoding Transactions, Exploring Blocks, Using Bitcoin Core's Programmatic Interface, Alternative Clients, Libraries, and Toolkits			
<b>Keys, Addresses:</b> Introduction, Public Key Cryptography and Cryptocurrency, Private and Public Keys,			

Private Keys, Public Keys, Generating a Public Key, Bitcoin Addresses, Base58 and Base58Check Encoding, Key Formats, Implementing Keys and Addresses in Python, Advanced Keys and Addresses, Pay-to-Script Hash (P2SH) and Multisig Addresses, Vanity Addresses, Paper Wallets.	
<b>Textbook1: Chapter 3,4</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration
<b>Module-3</b>	
<b>Wallets:</b> Wallet Technology Overview, Nondeterministic (Random) Wallets, Deterministic (Seeded) Wallets, Seeds and Mnemonic Codes (BIP-39), Wallet Best Practices, Using a Bitcoin Wallet, Wallet Technology Details, Creating an HD Wallet from the Seed, Using an Extended Public Key on a Web Store	
<b>Transactions:</b> Introduction, Transactions in Detail, Transactions—Behind the Scenes, Transaction Outputs and Inputs, Transaction Outputs, Transaction Inputs, Transaction Fees, Adding Fees to Transactions, Transaction Scripts and Script Language, Turing Incompleteness, Stateless Verification, Script Construction (Lock + Unlock), Pay-to-Public-Key-Hash (P2PKH), How Digital Signatures Work, Verifying the Signature, Signature Hash Types (SIGHASH), ECDSA Math, The Importance of Randomness in Signatures, Bitcoin Addresses, Balances, and Other Abstractions.	
<b>Textbook1: Chapter 5,6</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration
<b>Module-4</b>	
<b>Advanced Transactions and Scripting:</b> Introduction, Multisignature, Pay-to-Script-Hash (P2SH), P2SH Addresses, Benefits of P2SH, Redeem Script and Validation, Data Recording Output (RETURN), Timelocks, Scripts with Flow Control (Conditional Clauses), Complex Script Example.	
<b>The Bitcoin Network:</b> Peer-to-Peer Network Architecture, Node Types and Roles, The Extended Bitcoin Network, Bitcoin Relay Networks, Network Discovery, Full Nodes, Exchanging “Inventory”, Simplified Payment Verification (SPV) Nodes, Bloom Filters, How SPV Nodes Use Bloom Filters, SPV Nodes and Privacy, Encrypted and Authenticated Connections, Transaction Pools.	
<b>Textbook1: Chapter 7,8</b>	
<b>Teaching-Learning Process</b>	Chalk& board, Problem based learning
<b>Module-5</b>	
<b>The Blockchain:</b> Introduction, Structure of a Block, Block Header, Block Identifiers: Block Header Hash and Block Height, The Genesis Block, Linking Blocks in the Blockchain, Merkle Trees, Merkle Trees and Simplified Payment Verification (SPV), Bitcoin’s Test Blockchains, Using Test Blockchains for Development.	
<b>Mining and Consensus:</b> Introduction, Bitcoin Economics and Currency Creation, Decentralized Consensus, Independent Verification of Transactions, Mining Nodes, Aggregating Transactions into Blocks, Constructing the Block Header, Mining the Block, Successfully Mining the Block, Validating a New Block, Assembling and Selecting Chains of Blocks, Mining and the Hashing Race, Consensus Attacks, Changing the Consensus Rules, Soft Fork Signaling with Block Version, Consensus Software Development.	
<b>Textbook1: Chapter 9, 10</b>	
<b>Teaching-Learning Process</b>	Chalk and board, MOOC
<b>Course Outcomes</b>	

At the end of the course the student will be able to:

- CO 1. Define Bitcoin and explain the working of bitcoin
- CO 2. Demonstrate the implementation of bitcoin
- CO 3. Explain the concept of cryptography applied in bitcoin
- CO 4. Analyze transactions in bitcoin network
- CO 5. Illustrate bitcoin in blockchain and demonstrate the concepts of mining and consensus.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 35% ( 18 Marks out of 50)in the semester-end examination(SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous Internal Evaluation:**

Three Unit Tests each of **20 Marks (duration 01 hour)**

1. First test at the end of 5<sup>th</sup> week of the semester
2. Second test at the end of the 10<sup>th</sup> week of the semester
3. Third test at the end of the 15<sup>th</sup> week of the semester

Two assignments each of **10 Marks**

4. First assignment at the end of 4<sup>th</sup> week of the semester
5. Second assignment at the end of 9<sup>th</sup> week of the semester
6. At the end of the 13<sup>th</sup> week of the semester- Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for **20 Marks (duration 01 hours)**

The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be **scaled down to 50 marks**

(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Suggested Learning Resources:**

**Text Books**

1. Andreas M. Antonopoulos, Mastering Bitcoin, O Reilly, 2nd Edition, 2017

**Web links and Video Lectures (e-Resources):**

1. <https://www.youtube.com/c/BitcoinLectures>

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- **Demonstration of Bitcoin Project**

## VII Semester

<b>CLOUD SECURITY</b>			
Course Code	21IC731	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
<p>CLO 1. Explain security best practices for multivendor cloud environments,  CLO 2. Discuss cloud-specific techniques for securing popular cloud platforms  CLO 3. Explain data asset management, identity and access management, vulnerability management</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>Use of Video/Animation to explain functioning of various concepts.</li> <li>Encourage collaborative (Group Learning) Learning in the class.</li> <li>Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>Introduce Topics in manifold representations.</li> <li>Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
Principles and Concepts: Least Privilege, Defense in Depth, Threat Actors, Diagrams, and Trust Boundaries, Cloud Delivery Models, The Cloud Shared Responsibility Model, Risk Management			
Data Asset Management and Protection: Data Identification and Classification, Example Data Classification Levels, Relevant Industry or Regulatory Requirements, Data Asset Management in the Cloud, Tagging Cloud Resources, Protecting Data in the Cloud, Tokenization, Encryption			
<b>Textbook1: Ch 1,2</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Demonstration		
<b>Module-2</b>			
Cloud Asset Management and Protection: Differences from Traditional IT, Types of Cloud Assets, Compute Assets, Storage Assets, Network Assets, Asset Management Pipeline, Procurement Leaks, Processing Leaks, Tooling Leaks, Findings Leaks, Tagging Cloud Assets			
<b>Textbook1: Ch 3</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Demonstration		
<b>Module-3</b>			
Identity and Access Management: Differences from Traditional IT, Life Cycle for Identity and Access, Request, Approve, Create, Delete, Grant, or Revoke, Authentication, Cloud IAM Identities, Business-to-Consumer and Business-to-Employee, Multi-Factor Authentication, Passwords and API Keys, Shared IDs, Federated Identity, Single Sign-On, Instance Metadata and Identity Documents, Secrets Management, Authorization,			

Centralized Authorization, Roles, Revalidate.	
<b>Textbook1: Ch 4</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Demonstration
<b>Module-4</b>	
Vulnerability Management: Differences from Traditional IT, Vulnerable Areas, Data Access, Application, Middleware, Operating System, Network, Virtualized Infrastructure, Physical Infrastructure, Finding and Fixing Vulnerabilities, Network Vulnerability Scanners, Differences from Traditional IT, Vulnerable Areas, Data Access, Application, Middleware, Operating System, Network, Virtualized infrastructure, Physical Infrastructure, Finding and Fixing Vulnerabilities, Network Vulnerability Scanners. Agentless Scanners and Configuration Management, Agent-Based Scanners and Configuration Management, Cloud Provider Security Management Tools, Container Scanners, Dynamic Application Scanners (DAST), Static Application Scanners (SAST), Software Composition Analysis Scanners (SCA), Interactive Application Scanners (IAST), Runtime Application Self-Protection Scanners (RASP), Manual Code Reviews	
<b>Textbook 1: Ch5</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Demonstration
<b>Module-5</b>	
User Reports, Example Tools for Vulnerability and Configuration Management, Risk Management Processes, Vulnerability Management Metrics, Tool Coverage, Mean Time to Remediate, Systems/Applications with Open Vulnerabilities, Percentage of False Positives, Percentage of False Negatives, Vulnerability Recurrence Rate, Change Management, Putting It All Together in the Sample Application	
<b>Textbook 1: Ch5</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Demonstration
<b>Course Outcomes</b>	
At the end of the course the student will be able to:	
CO 1. Tell user responsibilities in the cloud and how they differ from in on-premises environments.	
CO 2. Explain assets users have, what the most likely threats are to those assets and some protections for them.	
CO 3. Describe Identity and management and Vulnerability management.	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
1. First test at the end of 5 <sup>th</sup> week of the semester	
2. Second test at the end of the 10 <sup>th</sup> week of the semester	
3. Third test at the end of the 15 <sup>th</sup> week of the semester	
Two assignments each of <b>10 Marks</b>	
4. First assignment at the end of 4 <sup>th</sup> week of the semester	
5. Second assignment at the end of 9 <sup>th</sup> week of the semester	
Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b>	
6. At the end of the 13 <sup>th</sup> week of the semester	
The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks	

and will be **scaled down to 50 marks**

(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

## VII Semester

<b>DIGITAL IMAGE PROCESSING</b>			
Course Code	21CS732	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
<p>CLO 1. Understand the fundamentals of digital image processing</p> <p>CLO 2. Explain the image transform techniques used in digital image processing</p> <p>CLO 3. Apply different image enhancement techniques on digital images</p> <p>CLO 4. Evaluate image restoration techniques and methods used in digital image processing</p> <p>CLO 5. Understand the Morphological Operations and Segmentation used in digital image processing</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Digital Image Fundamentals:</b> What is Digital Image Processing? Origins of Digital Image Processing, Examples of fields that use DIP, Fundamental Steps in Digital Image Processing, Components of an Image Processing System, Elements of Visual Perception, Image Sensing and Acquisition, Image Sampling and Quantization, Some Basic Relationships Between Pixels, Linear and Nonlinear Operations.			
<b>Textbook 1: Chapter 1 and Chapter 2: Sections 2.1 to 2.5, 2.6.2</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Problem based learning		
<b>Module-2</b>			
<b>Spatial Domain:</b> Some Basic Intensity Transformation Functions, Histogram Processing, Fundamentals of Spatial Filtering, Smoothing Spatial Filters, Sharpening Spatial Filters			
<b>Frequency Domain:</b> Preliminary Concepts, The Discrete Fourier Transform (DFT) of Two Variables, Properties of the 2-D DFT, Filtering in the Frequency Domain, Image Smoothing and Image Sharpening Using Frequency Domain Filters, Selective Filtering.			
<b>Textbook 1: Chapter 3: Sections 3.2 to 3.6 and Chapter 4: Sections 4.2, 4.5 to 4.10</b>			
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Chalk and board, Active Learning, Demonstration</li> <li>2. Laboratory Demonstration</li> </ol>		
<b>Module-3</b>			
<b>Restoration:</b> Noise models, Restoration in the Presence of Noise Only using Spatial Filtering and			

Frequency Domain Filtering, Linear, Position-Invariant Degradations, Estimating the Degradation Function, InverseFiltering, Minimum Mean Square Error (Wiener) Filtering, ConstrainedLeast Squares Filtering.	
<b>Textbook 1: Chapter 5: Sections 5.2, to 5.9</b>	
<b>Teaching-Learning Process</b>	1. Chalk and board
<b>Module-4</b>	
<b>Color Image Processing:</b> Color Fundamentals, Color Models, Pseudo color Image Processing. Wavelets: Background, Multiresolution Expansions.	
<b>Morphological Image Processing:</b> Preliminaries, Erosion and Dilation, Opening and Closing, The Hit-or-Miss Transforms, Some Basic Morphological Algorithms.	
<b>Text: Chapter 6: Sections 6.1 to 6.3, Chapter 7: Sections 7.1 and 7.2, Chapter 9: Sections 9.1 to 9.5</b>	
<b>Teaching-Learning Process</b>	1.Chalk& board 2.Demonstartion of Case study /Application for wavelet transfer method
<b>Module-5</b>	
<b>Segmentation:</b> Introduction, classification of image segmentation algorithms, Detection of Discontinuities, Edge Detection, Hough Transforms and Shape Detection, Corner Detection, Principles of Thresholding.	
<b>Representation and Description:</b> Representation, Boundary descriptors.	
<b>Text2: Chapter 9: Sections 9.1, to 9.7 and Text 1: Chapter 11: Sections 11.1and 11.2</b>	
<b>Teaching-Learning Process</b>	1.Chalk and board, MOOC. 2. Poster making activity for various image segmentation algorithms
<b>Course Outcomes</b> At the end of the course the student will be able to: CO 1. Understand the fundamentals of Digital Image Processing. CO 2. Apply different Image transformation techniques CO 3. Analyze various image restoration techniques CO 4. Understand colour image and morphological processing CO 5. Design image analysis and segmentation techniques	
<b>Assessment Details (both CIE and SEE)</b>  The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>  Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>  1. First test at the end of 5 <sup>th</sup> week of the semester 2. Second test at the end of the 10 <sup>th</sup> week of the semester 3. Third test at the end of the 15 <sup>th</sup> week of the semester  Two assignments each of <b>10 Marks</b>  4. First assignment at the end of 4 <sup>th</sup> week of the semester 5. Second assignment at the end of 9 <sup>th</sup> week of the semester  Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20</b>	

**Marks (duration 01 hours)**

6. At the end of the 13<sup>th</sup> week of the semester

The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be **scaled down to 50 marks**

(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Textbooks**

2. S. Sridhar, Digital Image Processing, Oxford University Press, 2<sup>nd</sup> Edition, 2016

**Reference:**

1. Digital Image Processing- S.Jayaraman, S.Esakkirajan, T.Veerakumar, TataMcGraw Hill 2014.
2. Fundamentals of Digital Image Processing-A. K. Jain, Pearson 2004

**Weblinks and Video Lectures (e-Resources):**

1. [https://https://nptel.ac.in/courses/106/105/106105032/](https://nptel.ac.in/courses/106/105/106105032/)
2. <https://github.com/PrajwalPrabhuiisc/Image-processing-assignments>

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

Demonstration of finding the histogram from grayscale image, to check the low pass filter properties, filtering the images using Gaussian low pass filter, etc... using Python programming

Practical Based Assignment like following or any topic which is in-line with the course requirement. Students shall present and demonstrate their work at the end of semester.

- Program to show rotation, scaling, and translation of an image.
- Read an image and extract and display low-level features such as edges, textures using filtering techniques
- Demonstrate enhancing and segmenting low contrast 2D images.
- To Read an image, first apply erosion to the image and then subtract the result from the original.

## VII Semester

<b>FULLSTACK DEVELOPMENT</b>			
Course Code	21A1733	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40 T	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives:</b>			
CLO 1.Explain the use of learning full stack web development.			
CLO 2.Make use of rapid application development in the design of responsive web pages.			
CLO 3.Illustrate Models, Views and Templates with their connectivity in Django for full stack web development.			
CLO 4.Demonstrate the use of state management and admin interfaces automation in Django.			
CLO 5.Design and implement Django apps containing dynamic pages with SQL databases.			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.			
<ol style="list-style-type: none"> <li>1. Lecturer method (L) does not mean only traditional lecture method, but different type of teaching methods may be adopted to develop the outcomes.</li> <li>2. Show Video/animation films to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop thinking skills such as the ability to evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Topics will be introduced in a multiple representation.</li> <li>7. Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1: MVC based Web Designing</b>			
Web framework, MVC Design Pattern, Django Evolution, Views, Mapping URL to Views, Working of Django URL Confs and Loose Coupling, Errors in Django, Wild Card patterns in URLs.			
<b>Textbook 1: Chapter 1 and Chapter 3</b>			
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Demonstration using Visual Studio Code</li> <li>2. PPT/Prezi Presentation for Architecture and Design Patterns</li> <li>3. Live coding of all concepts with simple examples</li> </ol>		
<b>Module-2: Django Templates and Models</b>			
Template System Basics, Using Django Template System, Basic Template Tags and Filters, MVT Development Pattern, Template Loading, Template Inheritance, MVT Development Pattern.			
Configuring Databases, Defining and Implementing Models, Basic Data Access, Adding Model String Representations, Inserting/Updating data, Selecting and deleting objects, Schema Evolution			
<b>Textbook 1: Chapter 4 and Chapter 5</b>			
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Demonstration using Visual Studio Code</li> <li>2. PPT/Prezi Presentation for Architecture and Design Patterns</li> <li>3. Live coding of all concepts with simple examples</li> </ol>		

	4. Case Study: Apply concepts learnt for an Online Ticket Booking System
<b>Module-3: Django Admin Interfaces and Model Forms</b>	
Activating Admin Interfaces, Using Admin Interfaces, Customizing Admin Interfaces, Reasons to use Admin Interfaces.	
Form Processing, Creating Feedback forms, Form submissions, custom validation, creating Model Forms, URLConf Ticks, Including Other URLConfs.	
<b>Textbook 1: Chapters 6, 7 and 8</b>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Demonstration using Visual Studio Code</li> <li>2. PPT/Prezi Presentation for Architecture and Design Patterns</li> <li>3. Live coding of all concepts with simple examples</li> </ol>
<b>Module-4: Generic Views and Django State Persistence</b>	
Using Generic Views, Generic Views of Objects, Extending Generic Views of objects, Extending Generic Views.	
MIME Types, Generating Non-HTML contents like CSV and PDF, Syndication Feed Framework, Sitemap framework, Cookies, Sessions, Users and Authentication.	
<b>Textbook 1: Chapters 9, 11 and 12</b>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Demonstration using Visual Studio Code</li> <li>2. PPT/Prezi Presentation for Architecture and Design Patterns</li> <li>3. Live coding of all concepts with simple examples</li> <li>4. Project Work: Implement all concepts learnt for Student Admission Management.</li> </ol>
<b>Module-5: jQuery and AJAX Integration in Django</b>	
Ajax Solution, Java Script, XMLHttpRequest and Response, HTML, CSS, JSON, iFrames, Settings of Java Script in Django, jQuery and Basic AJAX, jQuery AJAX Facilities, Using jQuery UI Autocomplete in Django	
<b>Textbook 2: Chapters 1, 2 and 7.</b>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Demonstration using Visual Studio Code</li> <li>2. PPT/Prezi Presentation for Architecture and Design Patterns</li> <li>3. Live coding of all concepts with simple examples</li> <li>4. Case Study: Apply the use of AJAX and jQuery for development of EMI calculator.</li> </ol>
<b>Course outcome (Course Skill Set)</b>	
At the end of the course the student will be able to:	
CO 1. Understand the working of MVT based full stack web development with Django.	
CO 2. Designing of Models and Forms for rapid development of web pages.	
CO 3. Analyze the role of Template Inheritance and Generic views for developing full stack web applications.	
CO 4. Apply the Django framework libraries to render nonHTML contents like CSV and PDF.	
CO 5. Perform jQuery based AJAX integration to Django Apps to build responsive full stack web applications,	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is	

50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous Internal Evaluation:**

Three Unit Tests each of **20 Marks (duration 01 hour)**

1. First test at the end of 5<sup>th</sup> week of the semester
2. Second test at the end of the 10<sup>th</sup> week of the semester
3. Third test at the end of the 15<sup>th</sup> week of the semester

Two assignments each of **10 Marks**

4. First assignment at the end of 4<sup>th</sup> week of the semester
5. Second assignment at the end of 9<sup>th</sup> week of the semester

Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for **20 Marks (duration 01 hours)**

6. At the end of the 13<sup>th</sup> week of the semester

The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be **scaled down to 50 marks**

(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Suggested Learning Resources:**

5. AJAX with Django for beginners: <https://www.youtube.com/watch?v=3VaKNyjlxAU>

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

1. Real world problem solving - applying the Django framework concepts and its integration with AJAX to develop any shopping website with admin and user dashboards.

## VII Semester

<b>DISTRIBUTED SYSTEMS</b>			
Course Code	21IC734	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
<p>CLO 1. Explain the concepts underlying distributed computing systems</p> <p>CLO 2. Understand theory and applications of RPC.</p> <p>CLO 3. Apply distributed systems on shared memory</p> <p>CLO 4. Explore the various resource management techniques for distributed systems.</p> <p>CLO 5. Design of good distributed systems</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) needs not to be only traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyse information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<p><b>Fundamentals:</b> What is Distributed Computing Systems? Evolution of Distributed Computing System; Distributed Computing System Models; What is Distributed Operating System? Issues in Designing a Distributed Operating System; Introduction to Distributed Computing Environment (DCE).</p> <p><b>Message Passing:</b> Introduction, Desirable features of a Good Message Passing System, Issues in PC by Message Passing, Synchronization, Buffering, Multi-datagram Messages, Encoding and Decoding of Message Data, Process Addressing, Failure Handling, Group Communication, Case Study: 4.3 BSD UNIX IPC Mechanism.</p>			
<b>Textbook1: Chapter 1, 3</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Problem based learning		
<b>Module-2</b>			
<p><b>Remote Procedure Calls:</b> Introduction, The RPC Model, Transparency of RPC, Implementing RPC Mechanism, Stub Generation, RPC Messages, Marshaling Arguments and Results, Server Management, Parameter-Passing Semantics, Call Semantics, Communication Protocols for RPCs, Complicated RPCs, Client-Server Binding, Exception Handling, Security, Some Special Types of RPCs, RPC in Heterogeneous Environments, Lightweight RPC, Optimization for Better Performance, Case Studies: Sun RPC.</p>			
<b>Textbook1: Chapter 4</b>			
<b>Teaching-Learning</b>	Chalk and board, Active Learning, Demonstration		

<b>Process</b>	
<b>Module-3</b>	
<p><b>Distributed Shared Memory:</b> Introduction, General Architecture of DSM Systems, Design and Implementation Issues of DSM, Granularity, Structure of Shared Memory Space, Consistency Models, Replacement Strategy, Thrashing, Other approaches to DSM, Heterogeneous DSM, Advantages of DSM.</p> <p><b>Synchronization:</b> Introduction, Clock Synchronization, Event Ordering, Mutual Exclusion, Dead Lock, Election Algorithms.</p> <p><b>Textbook1: Chapter 5, 6</b></p>	
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration
<b>Module-4</b>	
<p><b>Resource Management:</b> Introduction, Desirable Features of a Good Global Scheduling Algorithm, Task Assignment Approach, Load – Balancing Approach, Load – Sharing Approach</p> <p><b>Process Management:</b> Introduction, Process Migration, Threads.</p> <p><b>Textbook1: Chapter 7,8</b></p>	
<b>Teaching-Learning Process</b>	Chalk& board, Problem based learning
<b>Module-5</b>	
<p><b>Distributed File Systems:</b> Introduction, Desirable Features of a Good Distributed File System, File models, File-Accessing Models, File – Sharing Semantics, File – Caching Schemes, File Replication, Fault Tolerance, Atomic Transactions and Design Principles.</p> <p><b>Textbook1: Chapter 9</b></p>	
<b>Teaching-Learning Process</b>	Chalk and board, MOOC
<p><b>Course Outcomes</b></p> <p>At the end of the course the student will be able to:</p> <ul style="list-style-type: none"> <li>CO 1. Understand the fundamentals of distributed computing systems</li> <li>CO 2. Apply different distributed computing techniques for RPC</li> <li>CO 3. Analyse distributed systems on shared memory</li> <li>CO 4. Evaluate various resource management techniques for distributed systems.</li> <li>CO 5. Design the distributed computing systems using DFS.</li> </ul>	
<p><b>Assessment Details (both CIE and SEE)</b></p> <p>The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 35% ( 18 Marks out of 50)in the semester-end examination(SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together</p> <p><b>Continuous Internal Evaluation:</b></p> <p>Three Unit Tests each of <b>20 Marks (duration 01 hour)</b></p> <ol style="list-style-type: none"> <li>1. First test at the end of 5<sup>th</sup> week of the semester</li> <li>2. Second test at the end of the 10<sup>th</sup> week of the semester</li> <li>3. Third test at the end of the 15<sup>th</sup> week of the semester</li> </ol> <p>Two assignments each of <b>10 Marks</b></p> <ol style="list-style-type: none"> <li>4. First assignment at the end of 4<sup>th</sup> week of the semester</li> </ol>	

<p>5. Second assignment at the end of 9<sup>th</sup> week of the semester Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b></p> <p>6. At the end of the 13<sup>th</sup> week of the semester The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b> (to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course). <b>CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.</b></p> <p><b>Semester End Examination:</b> Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (<b>duration 03 hours</b>)</p> <ol style="list-style-type: none"> <li>1. The question paper will have ten questions. Each question is set for 20 marks.</li> <li>2. There will be 2 questions from each module. ## VII Semester

<b>ETHICAL HACKING</b>			
Course Code	21IC735	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
<p>CLO 1. Explain the web application and identify its weaknesses.</p> <p>CLO 2. Explain vulnerabilities in authentication, access control, session management, access control and data sources.</p> <p>CLO 3. Explain attacking authentication, access control, session management, access control and data sources.</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>Use of Video/Animation to explain functioning of various concepts.</li> <li>Encourage collaborative (Group Learning) Learning in the class.</li> <li>Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>Introduce Topics in manifold representations.</li> <li>Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<p><b>Web Application (In)security:</b> The Evolution of Web Applications, Common Web Application Functions, Benefits of Web Applications, Web Application Security, "This Site Is Secure", The Core Security Problem: Users Can Submit; Arbitrary Input, Key Problem Factors, The New Security Perimeter, The Future of Web Application Security.</p> <p><b>Core Defense Mechanisms:</b> Handling User Access, Authentication, Session Management, Access Control, Handling User Input, Varieties of Input, Approaches to Input Handling, Boundary Validation, Multistep Validation and Canonicalization, Handling Attackers, Handling Errors, Maintaining Audit Logs, Alerting Administrators, Reacting to Attacks</p>			
<b>Textbook 1: Ch 1, 2</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Problem based learning		
<b>Module-2</b>			
<p><b>Attacking Authentication:</b> Authentication Technologies, Design Flaws in Authentication Mechanisms, Bad Passwords, Brute-Force Login, Verbose Failure Messages, Vulnerable Transmission of Credentials, Password Change Functionality, Forgotten Password Functionality, "Remember Me" Functionality, User Impersonation Functionality, Incomplete Validation of Credentials, Nonunique Usernames, Predictable Usernames, Predictable Initial Passwords, Insecure Distribution of Credentials, Implementation Flaws in</p>			

Authentication, Fail-Open Login Mechanisms, Defects in Multistage Login Mechanisms, Insecure Storage of Credentials, Securing Authentication, Use Strong Credentials, Handle Credentials Secretively, Validate Credentials Properly, Prevent Information Leakage, Prevent Brute-Force Attacks, Prevent Misuse of the Password Change Function, Prevent Misuse of the Account Recovery Function, Log, Monitor, and Notify	
<b>Textbook 1: Ch 6</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration
<b>Module-3</b>	
<b>Attacking Session Management:</b> The Need for State, Alternatives to Sessions, Weaknesses in Token Generation, Meaningful Tokens, Predictable Tokens, Encrypted Tokens, Weaknesses in Session Token Handling, Disclosure of Tokens on the Network, Disclosure of Tokens in Logs, Vulnerable Mapping of Tokens to Sessions, Vulnerable Session Termination, Client Exposure to Token Hijacking, Liberal Cookie Scope, Securing Session Management, Generate Strong Tokens, Protect Tokens Throughout Their Life Cycle, Log, Monitor, and Alert	
<b>Textbook 1: Ch 7</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration
<b>Module-4</b>	
<b>Attacking Access Controls:</b> Common Vulnerabilities, Completely Unprotected Functionality, Identifier-Based Functions, Multistage Functions, Static Files, Platform Misconfiguration, Insecure Access Control Methods, Attacking Access Controls, Testing with Different User Accounts, Testing Multistage Processes, Testing with Limited Access, Testing Direct Access to Methods, Testing Controls Over Static Resources, Testing Restrictions on HTTP Methods, Securing Access Controls, A Multilayered Privilege Model,	
<b>Textbook 1: Ch 8</b>	
<b>Teaching-Learning Process</b>	Chalk & board, Problem based learning
<b>Module-5</b>	
<b>Attacking Access Controls:</b> Common Vulnerabilities, Completely Unprotected Functionality, Identifier-Based Functions, Multistage Functions, Static Files, Platform Misconfiguration, Insecure Access Control Methods, Attacking Access Controls, Testing with Different User Accounts, Testing Multistage Processes, Testing with Limited Access, Testing Direct Access to Methods, Testing Controls Over Static Resources, Testing Restrictions on HTTP Methods, Securing Access Controls, A Multilayered Privilege Model,	
<b>Textbook 1: Ch 9</b>	
<b>Teaching-Learning Process</b>	Chalk and board, MOOC
<b>Course Outcomes</b>	
At the end of the course the student will be able to:	
CO 1. Explain the problem of security in web application. List and discuss on the core defense mechanism.	
CO 2. Identify the flaws in authentication and explain the conduct test for attacking authentication.	
CO 3. Explain the weakness in tokens and methods for attacking session management	
CO 4. Identify vulnerabilities in access controls and discuss methods to attack	
CO 5. Illustrate inject methods for attacking data stores	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
1. First test at the end of 5 <sup>th</sup> week of the semester	

2. Second test at the end of the 10<sup>th</sup> week of the semester
3. Third test at the end of the 15<sup>th</sup> week of the semester

Two assignments each of **10 Marks**

4. First assignment at the end of 4<sup>th</sup> week of the semester
5. Second assignment at the end of 9<sup>th</sup> week of the semester
6. At the end of the 13<sup>th</sup> week of the semester- Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for **20 Marks (duration 01 hours)**

The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be **scaled down to 50 marks**

(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Suggested Learning Resources:**

**Textbooks**

1. Dafydd Stuttard, Marcus Pinto, The web application hacker's handbook: finding and exploiting security flaws, Wiley, Year: 2011

## VII Semester

<b>NATURAL LANGUAGE PROCESSING</b>			
Course Code	21IC741	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
<p>CLO 1. Analyse the natural language text.            CLO 2. Define the importance of natural language.            CLO 3. Understand the concepts Text mining.            CLO 4. Illustrate information retrieval techniques.</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same program</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<p><b>Overview and language modeling:</b> Overview: Origins and challenges of NLP-Language and Grammar-Processing Indian Languages- NLP Applications-Information Retrieval. Language Modeling: Various Grammar- based Language Models-Statistical Language Model.</p>			
<b>Textbook 1: Ch. 1,2</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Online demonstration, Problem based learning		
<b>Module-2</b>			
<p><b>Word level and syntactic analysis:</b> Word Level Analysis: Regular Expressions-Finite-State Automata-Morphological Parsing-Spelling Error Detection and correction-Words and Word classes-Part-of Speech Tagging. Syntactic Analysis: Context-free Grammar-Constituency- Parsing-Probabilistic Parsing.</p>			
<b>Textbook 1: Ch. 3,4</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Online Demonstration		
<b>Module-3</b>			
<p><b>Extracting Relations from Text: From Word Sequences to Dependency Paths:</b> Introduction, Subsequence Kernels for Relation Extraction, A Dependency-Path Kernel for Relation Extraction and Experimental Evaluation.</p>			
<p><b>Mining Diagnostic Text Reports by Learning to Annotate Knowledge Roles:</b> Introduction, Domain Knowledge and Knowledge Roles, Frame Semantics and Semantic Role Labeling, Learning to Annotate Cases with Knowledge Roles and Evaluations.</p>			
<p><b>A Case Study in Natural Language Based Web Search:</b> InFact System Overview, The GlobalSecurity.org</p>			

Experience.	
<b>Textbook 2: Ch. 3,4,5</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Online Demonstration
<b>Module-4</b>	
<b>Evaluating Self-Explanations in iSTART: Word Matching, Latent Semantic Analysis, and Topic Models:</b> Introduction, iSTART: Feedback Systems, iSTART: Evaluation of Feedback Systems,	
<b>Textual Signatures: Identifying Text-Types Using Latent Semantic Analysis to Measure the Cohesion of Text Structures:</b> Introduction, Cohesion, Coh-Metrix, Approaches to Analyzing Texts, Latent Semantic Analysis, Predictions, Results of Experiments.	
<b>Automatic Document Separation: A Combination of Probabilistic Classification and Finite-State Sequence Modeling:</b> Introduction, Related Work, Data Preparation, Document Separation as a Sequence Mapping Problem, Results.	
<b>Evolving Explanatory Novel Patterns for Semantically-Based Text Mining:</b> Related Work, A Semantically Guided Model for Effective Text Mining.	
<b>Textbook 2: Ch. 6,7,8,9</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Online Demonstration
<b>Module-5</b>	
<b>INFORMATION RETRIEVAL AND LEXICAL RESOURCES:</b> Information Retrieval: Design features of Information Retrieval Systems-Classical, Non classical, Alternative Models of Information Retrieval – valuation Lexical Resources: World Net-Frame Net- Stemmers-POS Tagger- Research Corpora.	
<b>Textbook 1: Ch. 9,12</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Online Demonstration
<b>Course Outcomes</b>	
At the end of the course the student will be able to:	
CO 1. Analyse the natural language text.	
CO 2. Define the importance of natural language.	
CO 3. Understand the concepts Text mining.	
CO 4. Illustrate information retrieval techniques.	
<b>Assessment Details (both CIE and SEE)</b>

<b>DEEP LEARNING</b>			
Course Code	21CS743	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	3	Exam Hours	3
<b>Course Learning Objectives</b>			
<p>CLO 1. Understand the fundamentals of deep learning.</p> <p>CLO 2. Know the theory behind Convolutional Neural Networks, Autoencoders, RNN.</p> <p>CLO 3. Illustrate the strength and weaknesses of many popular deep learning approaches.</p> <p>CLO 4. Introduce major deep learning algorithms, the problem settings, and their applications to solve real world problems.</p> <p>CLO 5. Learn the open issues in deep learning, and have a grasp of the current research directions.</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Introduction to Deep Learning:</b> Introduction, Deep learning Model, Historical Trends in Deep Learning,			
<b>Machine Learning Basics:</b> Learning Algorithms, Supervised Learning Algorithms, Unsupervised Learning Algorithms.			
<b>Textbook 1: Chapter1 – 1.1, 1.2, 5.1,5.7-5.8.</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Problem based learning		
<b>Module-2</b>			
<b>Feedforward Networks:</b> Introduction to feedforward neural networks, Gradient-Based Learning, Back-Propagation and Other Differentiation Algorithms. <b>Regularization for Deep Learning,</b>			
<b>Textbook 1: Chapter 6, 7</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration		
<b>Module-3</b>			
<b>Optimization for Training Deep Models:</b> Empirical Risk Minimization, Challenges in Neural Network Optimization, Basic Algorithms: Stochastic Gradient Descent, Parameter Initialization Strategies, Algorithms with Adaptive Learning Rates: The AdaGrad algorithm, The RMSProp algorithm, Choosing the Right Optimization Algorithm.			

<b>Textbook 1: Chapter: 8.1-8.5</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration
<b>Module-4</b>	
<b>Convolutional Networks:</b> The Convolution Operation, Pooling, Convolution and Pooling as an Infinitely Strong Prior, Variants of the Basic Convolution Function, Structured Outputs, Data Types, Efficient Convolution Algorithms, Random or Unsupervised Features- LeNet, AlexNet.	
<b>Textbook 1: Chapter: 9.1-9.9.</b>	
<b>Teaching-Learning Process</b>	Chalk& board, Problem based learning
<b>Module-5</b>	
<b>Recurrent and Recursive Neural Networks:</b> Unfolding Computational Graphs, Recurrent Neural Network, Bidirectional RNNs, Deep Recurrent Networks, Recursive Neural Networks, The Long Short-Term Memory and Other Gated RNNs.	
<b>Applications:</b> Large-Scale Deep Learning, Computer, Speech Recognition, Natural Language Processing and Other Applications.	
<b>Textbook 1: Chapter: 10.1-10.3, 10.5, 10.6, 10.10, 12.</b>	
<b>Teaching-Learning Process</b>	Chalk and board, MOOC
<b>Course Outcomes</b>	
CO1: Understand the fundamental issues and challenges of deep learning data, model selection, model complexity etc.,	
CO2: Describe various knowledge on deep learning and algorithms	
CO3: Apply CNN and RNN model for real time applications	
CO4: Identify various challenges involved in designing and implementing deep learning algorithms.	
CO5: Relate the deep learning algorithms for the given types of learning tasks in varied domain	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
<ol style="list-style-type: none"> <li>1. First test at the end of 5<sup>th</sup> week of the semester</li> <li>2. Second test at the end of the 10<sup>th</sup> week of the semester</li> <li>3. Third test at the end of the 15<sup>th</sup> week of the semester</li> </ol>	
Two assignments each of <b>10 Marks</b>	
<ol style="list-style-type: none"> <li>4. First assignment at the end of 4<sup>th</sup> week of the semester</li> <li>5. Second assignment at the end of 9<sup>th</sup> week of the semester</li> </ol>	
Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b>	
<ol style="list-style-type: none"> <li>6. At the end of the 13<sup>th</sup> week of the semester</li> </ol>	
The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b>	
(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).	
<b>CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy</b>	

as per the outcome defined for the course.

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Suggested Learning Resources:**

**Textbooks**

1. Ian Goodfellow, Yoshua Bengio, Aaron Courville, "Deep Learning", MIT Press, 2016.

**Reference:**

## VII Semester

<b>BIGDATA ANALYTICS</b>			
Course Code	21CD744	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives:</b>			
<p>CLO 1. Understand fundamentals and applications of Big Data analytics</p> <p>CLO 2. Explore the Hadoop framework and Hadoop Distributed File system and essential Hadoop Tools</p> <p>CLO 3. Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data</p> <p>CLO 4. Employ MapReduce programming model to process the big data</p> <p>CLO 5. Understand various machine learning algorithms for Big Data Analytics, Web Mining and Social Network Analysis.</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) does not mean only traditional lecture method, but different type of teaching methods may be adopted to develop the outcomes.</li> <li>2. Show Video/animation films to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOTS (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop thinking skills such as the ability to evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Topics will be introduced in a multiple representation.</li> <li>7. Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<p><b>Introduction to Big Data Analytics:</b> Big Data, Scalability and Parallel Processing, Designing Data Architecture, Data Sources, Quality, Pre-Processing and Storing, Data Storage and Analysis, Big Data Analytics Applications and Case Studies.</p> <p><b>Text book 1: Chapter 1: 1.2 -1.7</b></p>			
<b>Teaching-Learning Process</b>	<p>Chalk and board</p> <p><a href="https://www.youtube.com/watch?v=n_Krer6YWY4">https://www.youtube.com/watch?v=n_Krer6YWY4</a></p> <p><a href="https://onlinecourses.nptel.ac.in/noc20_cs92/preview">https://onlinecourses.nptel.ac.in/noc20_cs92/preview</a></p>		
<b>Module-2</b>			
<p><b>Introduction to Hadoop (T1):</b> Introduction, Hadoop and its Ecosystem, Hadoop Distributed File System, MapReduce Framework and Programming Model, Hadoop Yarn, Hadoop Ecosystem Tools.</p> <p><b>Hadoop Distributed File System Basics (T2):</b> HDFS Design Features, Components, HDFS User Commands.</p> <p><b>Essential Hadoop Tools (T2):</b> Using Apache Pig, Hive, Sqoop, Flume, Oozie, HBase.</p> <p><b>Text book 1: Chapter 2 :2.1-2.6</b></p> <p><b>Text Book 2: Chapter 3</b></p>			

<b>Text Book 2: Chapter 7 (except walk throughs)</b>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Chalk and Board</li> <li>2. Laboratory Demonstration</li> </ol>
<b>Module-3</b>	
<b>NoSQL Big Data Management, MongoDB and Cassandra:</b> Introduction, NoSQL Data Store, NoSQL Data Architecture Patterns, NoSQL to Manage Big Data, Shared-Nothing Architecture for Big Data Tasks, MongoDB, Databases, Cassandra Databases.	
<b>Text book 1: Chapter 3: 3.1-3.7</b>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Chalk and Board</li> <li>2. Laboratory Demonstration</li> </ol> <p><a href="https://www.youtube.com/watch?v=pWbMrx5rVBE">https://www.youtube.com/watch?v=pWbMrx5rVBE</a></p>
<b>Module-4</b>	
Introduction, MapReduce Map Tasks, Reduce Tasks and MapReduce Execution, Composing MapReduce for Calculations and Algorithms, Hive, HiveQL, Pig.	
<b>Text book 1: Chapter 4: 4.1-4.6</b>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Chalk and Board</li> <li>2. Laboratory Demonstration</li> </ol>
<b>Module-5</b>	
<b>Machine Learning Algorithms for Big Data Analytics:</b> Introduction, Estimating the relationships, Outliers, Variances, Probability Distributions, and Correlations, Regression analysis, Finding Similar Items, Similarity of Sets and Collaborative Filtering, Frequent Itemsets and Association Rule Mining.	
<b>Text, Web Content, Link, and Social Network Analytics:</b> Introduction, Text mining, Web Mining, Web Content and Web Usage Analytics, Page Rank, Structure of Web and analyzing a Web Graph, Social Network as Graphs and Social Network Analytics:	
<b>Text book 1: Chapter 6: 6.1 to 6.5</b>	
<b>Text book 1: Chapter 9: 9.1 to 9.5</b>	
<b>Teaching-Learning Process</b>	<ol style="list-style-type: none"> <li>1. Chalk and Board</li> <li>2. Laboratory Demonstration</li> </ol>
<b>Course outcome (Course Skill Set)</b>	
At the end of the course the student will be able to:	
CO 1. Understand fundamentals and applications of Big Data analytics.	
CO 2. Investigate Hadoop framework, Hadoop Distributed File system and essential Hadoop tools.	
CO 3. Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data.	
CO 4. Demonstrate the MapReduce programming model to process the big data along with Hadoop tools.	
CO 5. Apply Machine Learning algorithms for real world big data, web contents and Social Networks to provide analytics with relevant visualization tools.	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 35% ( 18 Marks out of 50)in the semester-end	

examination(SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous Internal Evaluation:**

Three Unit Tests each of **20 Marks (duration 01 hour)**

1. First test at the end of 5<sup>th</sup> week of the semester
2. Second test at the end of the 10<sup>th</sup> week of the semester
3. Third test at the end of the 15<sup>th</sup> week of the semester

Two assignments each of **10 Marks**

4. First assignment at the end of 4<sup>th</sup> week of the semester
5. Second assignment at the end of 9<sup>th</sup> week of the semester

Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for **20 Marks (duration 01 hours)**

6. At the end of the 13<sup>th</sup> week of the semester

The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be **scaled down to 50 marks**

(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

**Mini Project Topics for Practical Based Learning** :Search Engine Optimization, Social Media Reputation Monitoring, Equity Research, Detection of Global Suicide rate, Find the Percentage of Pollution in India, Analyse crime rate in India, Health Status Prediction, Anomaly Detection in cloud server, Tourist Behaviour Analysis, BusBest Not limited to above topics

## VII Semester

<b>NOSQL DATABASE</b>			
Course Code:	21CS745	CIE Marks	50
Teaching Hours/Week (L:T:P:S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Objectives:</b>			
<p>CLO 1. Recognize and Describe the four types of NoSQL Databases, the Document-oriented, KeyValue  CLO 2. Pairs, Column-oriented and Graph databases useful for diverse applications.  CLO 3. Apply performance tuning on Column-oriented NoSQL databases and Document-oriented NoSQL  Databases.  CLO 4. Differentiate the detailed architecture of column oriented NoSQL database, Document database  and Graph Database and relate usage of processor, memory, storage and file system commands.  CLO 5. Evaluate several applications for location based service and recommendation services. Devise an  application using the components of NoSQL.</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course  outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer methods (L) need not to be only traditional lecture methods, but alternative effective  teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical  thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design  thinking skills such as the ability to design, evaluate, generalize, and analyze information rather  than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem and encourage the students to come up with  their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps  improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<p>Why NoSQL? The Value of Relational Databases, Getting at Persistent Data, Concurrency, Integration, A  (Mostly) Standard Model, Impedance Mismatch, Application and Integration Databases, Attack of the  Clusters, The Emergence of NoSQL,</p> <p>Aggregate Data Models; Aggregates, Example of Relations and Aggregates, Consequences of Aggregate  Orientation, Key-Value and Document Data Models, Column-Family Stores, Summarizing Aggregate-  Oriented Databases.</p> <p>More Details on Data Models; Relationships, Graph Databases, Schemaless Databases, Materialized Views,  Modeling for Data Access,  <b>Textbook1: Chapter 1,2,3</b></p>			
<b>Teaching-Learning Process</b>	Active learning		
<b>Module-2</b>			
<p>Distribution Models; Single Server, Sharding, Master-Slave Replication, Peer-to-Peer Replication,  Combining Sharding and Replication.</p>			

Consistency, Update Consistency, Read Consistency, Relaxing Consistency, The CAP Theorem, Relaxing Durability, Quorums.	
Version Stamps, Business and System Transactions, Version Stamps on Multiple Nodes <b>Textbook1: Chapter 4,5,6</b>	
<b>Teaching-Learning Process</b>	Active Learning and Demonstrations
<b>Module-3</b>	
Map-Reduce, Basic Map-Reduce, Partitioning and Combining, Composing Map-Reduce Calculations, A Two Stage Map-Reduce Example, Incremental Map-Reduce	
Key-Value Databases, What Is a Key-Value Store, Key-Value Store Features, Consistency, Transactions, Query Features, Structure of Data, Scaling, Suitable Use Cases, Storing Session Information, User Profiles, Preference, Shopping Cart Data, When Not to Use, Relationships among Data, Multioperation Transactions, Query by Data, Operations by Sets	
<b>Textbook1: Chapter 7,8</b>	
<b>Teaching-Learning Process</b>	Active Learning, Problem solving based
<b>Module-4</b>	
Document Databases, What Is a Document Database?, Features, Consistency, Transactions, Availability, Query Features, Scaling, Suitable Use Cases, Event Logging, Content Management Systems, Blogging Platforms, Web Analytics or Real-Time Analytics, E- Commerce Applications, When Not to Use, Complex Transactions Spanning Different Operations, Queries against Varying Aggregate Structure	
<b>Textbook1: Chapter 9</b>	
<b>Teaching-Learning Process</b>	Active learning
<b>Module-5</b>	
Graph Databases, What Is a Graph Database?, Features, Consistency, Transactions, Availability, Query Features, Scaling, Suitable Use Cases, Connected Data, Routing, Dispatch, and Location-Based Services, Recommendation Engines, When Not to Use.	
<b>Textbook1: Chapter 11</b>	
<b>Teaching-Learning Process</b>	Active learning
<b>Course Outcomes (Course Skill Set)</b>	
At the end of the course the student will be able to:	
CO1. Demonstrate an understanding of the detailed architecture of Column Oriented NoSQL databases, Document databases, Graph databases.	
CO2. Use the concepts pertaining to all the types of databases.	
CO3. Analyze the structural Models of NoSQL.	
CO4. Develop various applications using NoSQL databases.	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
1. First test at the end of 5 <sup>th</sup> week of the semester	
2. Second test at the end of the 10 <sup>th</sup> week of the semester	
3. Third test at the end of the 15 <sup>th</sup> week of the semester	
Two assignments each of <b>10 Marks</b>	

<p>4. First assignment at the end of 4<sup>th</sup> week of the semester</p> <p>5. Second assignment at the end of 9<sup>th</sup> week of the semester</p> <p>Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b></p> <p>6. At the end of the 13<sup>th</sup> week of the semester</p> <p>The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b></p> <p>(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).</p> <p><b>CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.</b></p> <p><b>Semester End Examination:</b></p> <p>Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (<b>duration 03 hours</b>)</p> <ol style="list-style-type: none"> <li>1. The question paper will have ten questions. Each question is set for 20 marks.</li> <li>2. There will be 2 questions from each module. ## VII Semester

<b>PROGRAMMING IN PYTHON</b>			
Course Code	21CS751	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
<p>CLO 1. To understand why Python is a useful scripting language for developers</p> <p>CLO 2. To read and write simple Python programs</p> <p>CLO 3. To learn how to identify Python object types.</p> <p>CLO 4. To learn how to write functions and pass arguments in Python.</p> <p>CLO 5. To use Python data structures -- lists, tuples, dictionaries.</p>			
<b>Teaching-Learning Process (General Instructions)</b>			
<p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>INTRODUCTION DATA, EXPRESSIONS, STATEMENTS:08 Hours</b>			
Introduction: Creativity and motivation, understanding programming, Terminology: Interpreter and compiler, Running Python, The First Program; Data types: Int, float, Boolean, string, and list, variables, expressions, statements, Operators and operands.			
<b>Textbook 1: Chapter 1.1,1.2,1.3,1.6, Chapter 2.1-2.6</b>			
<b>Textbook 2: Chapter 1</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning		
<b>Module-2</b>			
<b>CONTROL FLOW, LOOPS:</b>			
Conditionals: Boolean values and operators, conditional (if), alternative (if-else), chained conditional (if-elif-else); Iteration: while, for, break, continue, pass statement.			
<b>Textbook 1: Chapter 3.1-3.6, chapter 5</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration		
<b>Module-3</b>			
<b>FUNCTIONS AND STRINGS:</b>			
Functions: Function calls, adding new functions, definition and uses, local and global scope, return values. Strings: strings, length of string, string slices, immutability, multiline comments, string functions and methods;			

<b>Textbook 1: Chapter 6</b>	
<b>Textbook 2: Chapter 3</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration
<b>Module-4</b>	
<b>LISTS, TUPLES, DICTIONARIES:08 Hours</b>	
<b>Lists:</b> List operations, list slices, list methods, list loop, mutability, aliasing, cloning lists, listparameters, list comprehension;	
<b>Tuples:</b> tuple assignment, tuple as return value, tuple comprehension;	
<b>Dictionaries:</b> operations and methods, comprehension;	
<b>Textbook 2: Chapter 10,11,12</b>	
<b>Teaching-Learning Process</b>	Chalk& board, Active Learning
<b>Module-5</b>	
<b>REGULAR EXPRESSIONS,FILES AND EXCEPTION:</b>	
<b>Regular expressions:</b> Character matching in regular expressions, extracting data using regular expressions, Escape character	
<b>Files and exception:</b> Text files, reading and writing files, command line arguments, errors and exceptions, handling exceptions, modules.	
<b>Textbook 1: Chapter 11.1,11.2,11.4</b>	
<b>Textbook 2: Chapter 14</b>	
<b>Teaching-Learning Process</b>	Chalk and board, MOOC
<b>Suggested Course Outcomes</b>	
At the end of the course the student will be able to:	
CO 1. Understand Python syntax and semantics and be fluent in the use of Python flow control and functions.	
CO 2. Demonstrate proficiency in handling Strings and File Systems.	
CO 3. Represent compound data using Python lists, tuples, Strings, dictionaries.	
CO 4. Read and write data from/to files in Python Programs	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
1. First test at the end of 5 <sup>th</sup> week of the semester	
2. Second test at the end of the 10 <sup>th</sup> week of the semester	
3. Third test at the end of the 15 <sup>th</sup> week of the semester	
Two assignments each of <b>10 Marks</b>	
4. First assignment at the end of 4 <sup>th</sup> week of the semester	
5. Second assignment at the end of 9 <sup>th</sup> week of the semester	
Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b>	
6. At the end of the 13 <sup>th</sup> week of the semester	
The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b>	
(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the	

methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

Real world problem solving: Demonstration of projects developed using python language

## VII Semester

<b>INTRODUCTION TO AI AND ML</b>			
Course Code	21CS752	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
<b>Course Learning Objectives</b>			
CLO1. Understands the basics of AI, history of AI and its foundations, basic principles of AI for problem solving			
CLO2. Explore the basics of Machine Learning & Machine Learning process, understanding data			
CLO3. Understand the Working of Artificial Neural Networks			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.			
<ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Introduction:</b> What is AI, The foundation of Artificial Intelligence, The history of Artificial Intelligence, Intelligent Agents: Agents and Environments, Good Behaviour: The concept of rationality, the nature of Environments, the structure of Agents.			
<b>Textbook 1: Chapter: 1 and 2</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Problem based learning		
<b>Module-2</b>			
<b>Problem solving by searching:</b> Problem solving agents, Example problems, Searching for solutions, Uniformed search strategies, Informed search strategies, Heuristic functions			
<b>Textbook 1: Chapter: 3</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration		
<b>Module-3</b>			
<b>Introduction to machine learning:</b> Need for Machine Learning, Machine Learning Explained, and Machine Learning in relation to other fields, Types of Machine Learning. Challenges of Machine Learning, Machine Learning process, Machine Learning applications.			
<b>Understanding Data:</b> What is data, types of data, Big data analytics and types of analytics, Big data analytics framework, Descriptive statistics, univariate data analysis and visualization			
<b>Textbook 2: Chapter: 1 and 2.1 to 2.5</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration		
<b>Module-4</b>			

**Understanding Data**

Bivariate and Multivariate data, Multivariate statistics, Essential mathematics for Multivariate data, Overview hypothesis, Feature engineering and dimensionality reduction techniques,

**Basics of Learning Theory:** Introduction to learning and its types, Introduction computation learning theory, Design of learning system, Introduction concept learning.

**Similarity-based learning:** Introduction to Similarity or instance based learning, Nearest-neighbour learning, weighted k- Nearest - Neighbour algorithm.

**Textbook 2: Chapter: 2.6 to 2.10, 3.1 to 3.4, 4.1 to 4.3**

**Teaching-Learning Process**

Chalk & board, Problem based learning

**Module-5**

**Artificial Neural Network:** Introduction, Biological neurons, Artificial neurons, Perceptron and learning theory, types of Artificial neural Network, learning in multilayer Perceptron, Radial basis function neural network, self-organizing feature map,

**Textbook 2: Chapter: 10**

**Teaching-Learning Process**

Chalk and board, MOOC

**Course Outcomes**

At the end of the course the student will be able to:

- CO 1. Design intelligent agents for solving simple gaming problems.
- CO 2. Have a good understanding of machine learning in relation to other fields and fundamental issues and Challenges of machine learning
- CO 3. Understand data and applying machine learning algorithms to predict the outputs.
- CO 4. Model the neuron and Neural Network, and to analyze ANN learning and its applications.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous Internal Evaluation:**

Three Unit Tests each of **20 Marks (duration 01 hour)**

1. First test at the end of 5<sup>th</sup> week of the semester
2. Second test at the end of the 10<sup>th</sup> week of the semester
3. Third test at the end of the 15<sup>th</sup> week of the semester

Two assignments each of **10 Marks**

4. First assignment at the end of 4<sup>th</sup> week of the semester
5. Second assignment at the end of 9<sup>th</sup> week of the semester

Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for **20 Marks (duration 01 hours)**

6. At the end of the 13<sup>th</sup> week of the semester

The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be **scaled down to 50 marks**

(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question

papers for the subject (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks

Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>Hadoop Distributed file system:</b> HDFS Design, Features, HDFS Components, HDFS user commands			
Hadoop MapReduce Framework: The MapReduce Model, Map-reduce Parallel Data Flow,Map Reduce Programming			
<b>Textbook 1: Chapter 3,5,68hr</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Problem based learning		
<b>Module-2</b>			
<b>Essential Hadoop Tools:</b> Using apache Pig, Using Apache Hive, Using Apache Sqoop, Using Apache Apache Flume, Apache H Base			
<b>Textbook 1: Chapter 78hr</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, Demonstration		
<b>Module-3</b>			
<b>Data Warehousing:</b> Introduction, Design Consideration, DW Development Approaches, DW Architectures			
<b>Data Mining:</b> Introduction, Gathering, and Selection, data cleaning and preparation, outputs of Data Mining, Data Mining Techniques			
<b>Textbook 2: Chapter 4,5</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Problem based learning, Demonstration		
<b>Module-4</b>			

<b>Decision Trees:</b> Introduction, Decision Tree Problem, Decision Tree Constructions, Lessons from Construction Trees. Decision Tree Algorithm	
<b>Regressions:</b> Introduction, Correlations and Relationships, Non-Linear Regression, Logistic Regression, Advantages and disadvantages.	
<b>Textbook 2: Chapter 6,7</b>	
<b>Teaching-Learning Process</b>	Chalk& board, Problem based learning
<b>Module-5</b>	
<b>Text Mining:</b> Introduction, Text Mining Applications, Text Mining Process, Term Document Matrix, Mining the TDM, Comparison, Best Practices	
<b>Web Mining:</b> Introduction, Web Content Mining, Web Structured Mining, Web Usage Mining, Web Mining Algorithms.	
<b>Textbook 2: Chapter 11,14</b>	
<b>Teaching-Learning Process</b>	Chalk and board, MOOC
<b>Suggested Course Outcomes</b>	
At the end of the course the students will be able to:	
CO 1. Master the concepts of HDFS and MapReduce framework.	
CO 2. Investigate Hadoop related tools for Big Data Analytics and perform basic	
CO 3. Infer the importance of core data mining techniques for data analytics	
CO 4. Use Machine Learning algorithms for real world big data.	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
1. First test at the end of 5 <sup>th</sup> week of the semester	
2. Second test at the end of the 10 <sup>th</sup> week of the semester	
3. Third test at the end of the 15 <sup>th</sup> week of the semester	
Two assignments each of <b>10 Marks</b>	
4. First assignment at the end of 4 <sup>th</sup> week of the semester	
5. Second assignment at the end of 9 <sup>th</sup> week of the semester	
Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b>	
6. At the end of the 13 <sup>th</sup> week of the semester	
The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b>	
(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).	
<b>CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.</b>	
<b>Semester End Examination:</b>	
Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject ( <b>duration 03 hours</b> )	
1. The question paper will have ten questions. Each question is set for 20 marks.	
2. There will be 2 questions from each module. Each of the two questions under a module (with a	

<p>maximum of 3 sub-questions), <b>should have a mix of topics</b> under that module.</p> <p>The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks</p>

Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<b>PREPARING AND GATHERING DATA AND KNOWLEDGE</b>			
Philosophies of data science - Data science in a big data world - Benefits and uses of data science and big data - facts of data: Structured data, Unstructured data, Natural Language, Machine generated data, Audio, Image and video streaming data - The Big data Eco system: Distributed file system, Distributed Programming framework, Data Integration frame work, Machine learning Framework, NoSQL Databases, Scheduling tools, Benchmarking Tools, System Deployment, Service programming and Security.			
<b>Textbook 1: Ch 1.1 to 1.4</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, PPT Based presentation		
<b>Module-2</b>			
<b>THE DATA SCIENCE PROCESS</b> -Overview of the data science process- defining research goals and creating project charter, retrieving data, cleansing, integrating and transforming data, exploratory data analysis, Build the models, presenting findings and building application on top of them.			
<b>Textbook 1:,Ch 2</b>			
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, PPT Based presentation		
<b>Module-3</b>			
<b>MACHINE LEARNING:</b> Application for machine learning in data science- Tools used in machine learning- Modeling Process – Training model – Validating model – Predicting new observations –Types of machine learning Algorithm : Supervised learning algorithms, Unsupervised learning algorithms.			
<b>Textbook 1: Ch 3.1 to 3.3</b>			

<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, PPT Based presentation, Video
<b>Module-4</b>	
<b>VISUALIZATION</b> –Introduction to data visualization – Data visualization options – Filters – MapReduce – Dashboard development tools.	
<b>Textbook 1: Ch 9</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, PPT Based presentation, MOOC
<b>Module-5</b>	
<b>CASE STUDIES</b> Distributing data storage and processing with frameworks - Case study: e.g, Assessing risk when lending money.	
<b>Textbook 1: Ch 5.1, 5.2</b>	
<b>Teaching-Learning Process</b>	Chalk and board, Active Learning, PPT Based presentation, Video
<b>Course Outcomes</b>	
At the end of the course the student will be able to:	
<ul style="list-style-type: none"> <li>CO 1. Describe the data science terminologies</li> <li>CO 2. Apply the Data Science process on real time scenario.</li> <li>CO 3. Analyze data visualization tools</li> <li>CO 4. Apply Data storage and processing with frameworks</li> </ul>	
<b>Assessment Details (both CIE and SEE)</b>	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together	
<b>Continuous Internal Evaluation:</b>	
Three Unit Tests each of <b>20 Marks (duration 01 hour)</b>	
<ul style="list-style-type: none"> <li>1. First test at the end of 5<sup>th</sup> week of the semester</li> <li>2. Second test at the end of the 10<sup>th</sup> week of the semester</li> <li>3. Third test at the end of the 15<sup>th</sup> week of the semester</li> </ul>	
Two assignments each of <b>10 Marks</b>	
<ul style="list-style-type: none"> <li>4. First assignment at the end of 4<sup>th</sup> week of the semester</li> <li>5. Second assignment at the end of 9<sup>th</sup> week of the semester</li> </ul>	
Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for <b>20 Marks (duration 01 hours)</b>	
<ul style="list-style-type: none"> <li>6. At the end of the 13<sup>th</sup> week of the semester</li> </ul>	
The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be <b>scaled down to 50 marks</b>	
(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).	
<b>CIE methods /question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.</b>	
<b>Semester End Examination:</b>	
Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject ( <b>duration 03 hours</b> )	
<ul style="list-style-type: none"> <li>1. The question paper will have ten questions. Each question is set for 20 marks.</li> <li>2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), <b>should have a mix of topics</b> under that module.</li> </ul>	
The students have to answer 5 full questions, selecting one full question from each module. Marks scored out of 100 shall be reduced proportionally to 50 marks	

**Textbooks**

1. Introducing Data Science, Davy Cielen, Arno D. B. Meysman and Mohamed Ali, Manning Publications, 2016.

**Reference Books**

1. Doing Data Science, Straight Talk from the Frontline, Cathy O'Neil, Rachel Schutt, O' Reilly, 1st edition, 2013.
2. Mining of Massive Datasets, Jure Leskovec, Anand Rajaraman, Jeffrey David Ullman, Cambridge University Press, 2nd edition, 2014
3. An Introduction to Statistical Learning: with Applications in R, Gareth James, Daniela Witten, Trevor Hastie, Robert Tibshirani, Springer, 1st edition, 2013
4. Think Like a Data Scientist, Brian Godsey, Manning Publications, 2017.
